Jeremy Black

Age of Discovery Captivating History,2020-05 The Age of Discovery began in the early part of the 15th century and carried on through most of the 17th century. It is sometimes also referred to as the Age of Exploration. This was a time when the people of Europe began to travel, discover, and explore more of the world than ever before, mapping and naming the places they found.

The Age of Exploration Andrew A. Kling,2013-01-14 Swashbuckling pirates raiding treasure galleons and dashing explorers traversing the unknown; this is how many perceive the Age of Exploration. The quest to explore beyond the horizon was driven by more than a need to understand the unknown. Great political and financial prospects lured those individuals and nations who dared explore. This compelling volume offers readers an in-depth account of the eccentric characters, cutting-edge technologies, and the exotic locations, real and imagined, that drove exploration of the New World as well as the Old World. Chapters engage pertinent critical discussions including early exploration of trade routes through the Muslim world; Bartolomeu Dias sailing around the southern cape of Africa; Christopher Columbus reaching the Bahamas Islands, Cuba and Hispaniola; Vasco da Gama rounding Africa and reaches the Indian port of Calicut; and many more. The edition also offers readers a timeline, maps, quotations from primary source materials, and a thorough subject index.

Christopher Columbus and the Age of Exploration for Kids Ronald A. Reis,2013-10-01 An NCSS Notable Social Studies Trade Book for Young People Christopher Columbus is one of the most famous people in world history, yet few know the full story of the amazing, resourceful, and tragic Italian explorer. Christopher Columbus and the Age of Exploration for Kids portrays the Admiral of the Ocean Seas neither as hero nor heel but as a flawed and complex man whose significance is undeniably monumental. Kids will gain a fuller picture of the seafarer's life, his impact, and the dangers and thrills of exploration as they learn about all four of Columbus's voyages to the New World, not just his first, as well as the year that Columbus spent stranded on the island of Jamaica without hope of rescue. Students, parents, and teachers will appreciate the in-depth discussions of the indigenous peoples of the New World and of the consequences of Columbus's voyages—the exchange of diseases, ideas, crops, and populations between the New World and the Old. Fun hands-on activities illuminate both the nautical concepts introduced and the times in which Columbus lived. Kids can: Tie nautical knots Conduct a blanket (silent) trade Make a compass Simulate a hurricane Take nautical measurements And much more

Spain in the Age of Exploration, 1492-1819 Chiyo Ishikawa,Seattle Art Museum,2004-01-01 This publication accompanies an exhibition of approximately 120 works of art and science loaned mostly from the Royal Collection of Spain (Patrimonio Nacional) to the Seattle Art Museum. Featuring the work of such artists as Bosch, Titian, El Greco, Bernini, Velázquez, Murillo, Zubarán, and Goya, this publication includes paintings, sculpture, tapestries, scientific instruments, maps, armor, books, and documents. Eight essays provide historical context and artistic explication. Chronologically organized, the book charts the evolution of Spanish attitudes toward knowledge, exploration, and faith during three dynasties of Spain's golden age, when the fervor for scientific and geographical knowledge coexisted with the expansion of empire and promotion of Christianity. The four themes of the exhibition are: The Image of Empire; Spirituality and Worldliness; Encounters across Cultures; Science and the Court. Spain in the Age of Exploration, 1492-1819, presents art and science from one of the most ambitious, magnificent, and complex enterprises in history.

Maritime Exploration in the Age of Discovery, 1415-1800 Ronald S.

Love, 2006-09-30 Despite earlier naval expeditions undertaken for reasons of diplomacy or trade, it wasn't until the early 1400s that European maritime explorers established sea routes through most of the globe's inhabited regions, uniting a divided earth into a single system of navigation. From the early Portuguese and Spanish quests for gold and glory, to later scientific explorations of land and culture, this new understanding of the world's geography created global trade, built empires, defined taste and alliances of power, and began the journey toward the cultural, political, and economic globalization in which we live today. Ronald Love's engaging narrative chapters guide the reader from Marco Polo's exploration of the Mongol empire to Ferdinand Magellan's circumnavigation of the globe, the search for a Northern Passage, Henry Hudson's voyage to Greenland, the discovery of Tahiti, the perils of scurvy, mutiny, and warring empires, and the eventual extension of Western influence into almost every corner of the globe. Biographies and primary documents round out the work.

What Was the Age of Exploration? Catherine Daly, Who HQ, Jake Murray, 2021-03-09

Land ho! Discover what the Age of Exploration was all about in this wonderful addition to the bestselling Who HQ series! Before the fifteenth century, European sailors were unsure what waited for them beyond their well-known travel routes around the Mediterranean Sea, so they kept within sight of land. But all of that changed after Prince Henry the Navigator of Portugal started sending ships down the coast in the hope of finding a sea route to India and Africa. This was the beginning of a giant leap toward understanding what the globe actually looked like. Certain European nations grew rich and powerful from the New World gold and lands they claimed, while advanced, long-standing civilizations like the Aztecs and Incas were destroyed in the cruelest of ways. This book also features the fun black-and-white illustrations and engaging 16-page photo insert that readers have come love about the What Was? series!

The Portuguese in the Age of Discovery c.1340-1665 David Nicolle, 2012-11-20

From humble beginnings, in the course of three centuries the Portuguese built the world's first truly global empire, stretching from modern Brazil to sub-Saharan Africa and from India to the East Indies (Indonesia). Portugal had established its present-day borders by 1300 and the following century saw extensive warfare that confirmed Portugal's independence and allowed it to aspire to maritime expansion, sponsored by monarchs such as Prince Henry the Navigator. During this nearly 300-year period, the Portuguese fought alongside other Iberian forces against the Moors of Andalusia; with English help successfully repelled a Castilian invasion (1385); fought the Moors in Morocco, and Africans, the Ottoman Turks, and the Spanish in colonial competition. The colourful and exotic Portuguese forces that prevailed in these battles on land and sea are the subject of this book.

The Real Story Behind the Age of Exploration Daniel R. Faust, 2019-07-30

Did people in the Middle Ages really believe the Earth was flat? Was Columbus the first European to reach the New World? Were European explorers really treated like gods by the indigenous peoples they encountered? You probably think you know the answers to these questions, but sometimes textbooks don't tell the whole truth. This book takes a deep dive into the Age of Exploration, separating myth from reality. Grade-appropriate text is supported by full-color photographs, while fact boxes, sidebars, and timelines provide additional information and historical context.

The Age of Exploration: Totally Getting Lost (Epic Fails #4) Ben Thompson, Erik

Slader, 2019-04-16 Christopher Columbus is one of the most famous explorers of all time,

but he was neither the first nor last adventurer to ever stumble upon a great discovery. From the Silk Road of Asia to the icy shores of Antarctica, our knowledge of the world today is in large part due to several intrepid pioneers, risking life and limb for the sake of exploration. After all, setting off into the dark unknown requires an enormous amount of bravery. But every explorer quickly learns that courage and curiosity aren't enough to save you if you can't read a map or trespass on somebody else's land! In this fourth installment of the Epic Fails series, authors Erik Slader and Ben Thompson introduces readers to an international cast of trailblazers and details every mutiny, wrong turn, and undiscovered city of gold behind the age of exploration.

Exploration Stewart Angus Weaver,2015 This clear, succinct, and elegant contribution to the 'Very Short Introductions' series surveys the history of global exploration and assesses the motives, for good and ill, of those who undertook it. Stewart Weaver traces the history of exploration from the first explorers (including Polynesian and Micronesian peoples, the ancient Greeks, Marco Polo, and Ibn Battūta), to the European discover of America, the Enlightenment and exploration (focusing on James Cook), and the race to the north and south poles

The World Made New Marc Aronson,John W. Glenn,2007 The World Made New provides an account of the charting of the New World and the long-term effects of America's march into history. The text uses primary sources to bring history to life and features profiles of the major explorers of the age. The book is illustrated with full-color artwork, multiple-time lines, and six custom National Geographic maps. The text and layout combine to provide an overview of New World exploration, and outline the historical context for the discoveries that literally changed the world. The narrative carries young readers through this age of adventure. Follow the timeline of history unfolding; how the early colonies were established; how dissemination of products like the potato, tomato, tobacco, and corn made the Americas a major part of the new world economy; and how the Caribbean became a major trading hub.

A Brief History of Italy Jeremy Black, 2018-07-05 Despite the Roman Empire's famous 500-year reign over Europe, parts of Africa and the Middle East, Italy does not have the same long national history as states such as France or England. Divided for much of its history, Italy's regions have been, at various times, parts of bigger, often antagonistic empires, notably those of Spain and Austria. In addition, its challenging and varied terrain made consolidation of political control all the more difficult. This concise history covers, in very readable fashion, the formative events in Italy's past from the rise of Rome, through a unified country in thrall to fascism in the first half of the twentieth century right up to today. The birthplace of the Renaissance and the place where the Baroque was born, Italy has always been a hotbed of culture. Within modern Italy country there is fierce regional pride in the cultures and identities that mark out Tuscany, Rome, Sicily and Venice to name just a few of Italy's many famous regions. Jeremy Black draws on the diaries, memoirs and letters of historic travellers to Italy to gain insight into the passions of its people, first chronologically then regionally. In telling Italy's story, Black examines what it is that has given Italians such cultural clout - from food and drink, music and fashion, to art and architecture - and explores the causes and effects of political events, and the divisions that still exist today.
