Investing in Information Andy Bytheway,2014-11-28 This book gathers together, in a new way, established and contemporary thinking about how to get the best out of information technology and information systems investments. Working managers who are beset by the complexities of information management in the age of Big Data and the Social Web, and students who are trying to make sense of information management in a chaotic world that is more and more driven by the Internet, will all benefit from this new treatment of a long-standing and problematic domain. Importantly, the book reveals and clarifies the dependencies that exist between the inner world of information technology and the outer world of people and organisations at work. The book differs from other books in its reflective approach. It avoids lengthy, descriptive, and prescriptive dogma. Rather, it provides tools for thinking about information management and it identifies strategic and tactical options at six levels: from the simple consideration of information technology and information systems, right through to issues of organisational performance and business strategy. At the heart of the matter are two critical and tightly connected issues: the ways that we conceive and manage an organisation's processes, and the ways that we conceive and manage the information that an organisation needs to sustain those processes. The six-level framework that achieves this clarity is the "Information Management Body of Knowledge" (familiarily known as the "IMBOK"). This easy-to-understand and easy-to-remember framework has been found to be extremely useful in business, in government, in civil society and in education. Throughout the book, selected research papers are identified and summarised. There are also summary chapters from three different operational perspectives: performance and competency assessment using the IMBOK, undertaking research into related issues, and a review of parallel expert thinking. This book stands as a reference point and resource for all those who need to straddle the disparate worlds of "information technology" and "business". It provides firm pedagogical foundations for courses dealing with business management in the information age, and it provides a sound reference framework for researchers who need to position research projects related to information technology and information systems in a wider context. For busy managers, who simply wish to identify, understand and successfully manage information technology-related opportunities, it provides an ideal arrangement of ideas and tools that will help them.

Top of the Rock Warren Littlefield,T. R. Here the story is vividly told through the words of the actors, writers, producers, creators, and network executives who helped the Peacock rise to its greatest heights—and then saw it all fall apart. Under the supervision of President of Entertainment Warren Littlefield, NBC went from being an also-ran, losing millions of dollars in failed shows, to the number one station, generating billions of dollars in profit. At its height, the Thursday night lineup alone brought in more revenue than the other six nights of programming combined. The Designful Company Marty Neumeier,2009-03-30 Part manifesto, part handbook, THE DESIGNFUL COMPANY provides a lively overview of a growing trend in management—design thinking as a business competence. According to the author, traditional managers have relied on a two-step process to make decisions, which he calls “knowing” and “doing.” Yet in today’s innovation-driven marketplace, managers need to insert a middle step, called “making.” Making is a phase in which assumptions are questioned, futures are imagined, and prototypes are tested, producing a wide range of options that didn’t exist before. The reader is challenged to consider the author’s bold assertion: There can be no real innovation without design. Those who are new to Marty Neumeier’s “whiteboard” series may want to ramp up with the first two books, THE BRAND GAP and ZAG. Both are easy reads. Covered in THE DESIGNFUL COMPANY: - the top 10 “wicked problems” that only design can solve - a new, broader definition of design - why designing trumps deciding in an era of change - how to harness the “organic drivetrain” of value creation - how aesthetics add nuance to managing - 16 levers to transform your company - why you should bring design management inside - how to assemble an innovation metateam - how to recognize and reward talent From the back cover: The complex business problems we face today can’t be solved with the same thinking that created them. Instead, we need to start from a place outside traditional management. Forget total quality. Forget top-down strategy. In an era of fast-moving markets and leap-frogging innovations, we can no longer “decide” the way forward. Today we have to “design” the way forward—or risk ending up in the fossil layers of history. Marty Neumeier, author of THE BRAND GAP and ZAG, presents the new management engine that can transform your company into a powerhouse of nonstop innovation.
