Behind the Scenes at the Space Stations DK,2022-06-07 Your all-access pass to spectacular space stations. Step inside one of humanity's greatest achievements with a behind-the-scenes guide to space exploration. Revealing a new perspective into the world of space exploration and the daring astronauts who make it possible, Behind the Scenes at the Space Station takes you on a once-in-a-lifetime tour of the space station. Learn what the astronauts do once they make it to the space station, from experiments to repairs and so much more! Have you ever wondered if plants can grow in outer space? Or how the space station doesn't break down in outer space? Or how astronauts go to the toilet in zero gravity? Behind the Scenes at the Space Station is a treasure trove of information. Did you know that during a 24-hour period, the space station completes 16 orbits of Earth and the astronauts on board see 16 sunrises and sunsets everyday? Or that the International Space Station is so enormous that it was launched in pieces and constructed in orbit? Brimming with astonishing visuals, step-by-step explanations of everyday space work in action, and job profiles of the adventurous people who make it happen, Behind the Scenes at the Space Station is the perfect way to experience life in space.

Awesome Adventures at the Smithsonian Emily B. Korrell,2013-03-12 From Dorothy's red slippers to dinosaurs to the Wright brothers' plane, the Smithsonian is filled with objects fascinating to kids. Yet choosing what to see at the Smithsonian can challenge even the most enthusiastic families. Packed with activities, information, and pictures, this lively new guide offers children ages 8-12 years a way to navigate the Smithsonian. Engaging maps, photographs, and illustrations present the main museum halls along with puzzles, games, mad libs, and pages for journal entries, drawings, and superlatives that will help get kids ready for their big trip to the nation's capital and keep them focused and attentive as they navigate the world's largest museum complex that is the Smithsonian Institution. Awesome Adventures at the Smithsonian (spiral bound) is the perfect way to engage any child on their big trip to Washington, DC, and the Smithsonian.

Writing the Dark Side of Travel Jonathan Skinner,2012 The travel experience filled with personal trauma; the pilgrimage through a war-torn place; the journey with those suffering: these represent the darker sides of travel. What is their allure and how are they represented? This volume takes an ethnographic and interdisciplinary approach to explore the writings and texts of dark journeys and travels. In traveling over the dead, amongst the dying, and alongside the suffering, the authors give us a tour of humanity's violence and misery. And yet, from this dark side, there comes great beauty and poignancy in the characterization of plight; creativity in the comic, graphic, and graffiti sketches and comments on life; and the sense of profound and spiritual journeys being undertaken, recorded, and memorialized. Jonathan Skinner is Senior Lecturer in Social Anthropology at Queen's University Belfast. He is the author of *Before the Volcano: Reverberations of Identity on Montserrat* (Arawak Publications 2004), and co-editor of *Managing Island Life* (University of Abertay Press 2006) and *Great Expectations: Imagination and Anticipation in Tourism* (Berghahn 2011).

The Spacesuit Film Gary Westfahl,2012-03-27 Filmmakers employ various images to suggest the strangeness of outer space, but protective spacesuits most powerfully communicate its dangers and the frailty of humans beyond the cradle of Earth. (Many films set in space, however, forgo spacesuits altogether, reluctant to hide famous faces behind bulky helmets and ill-fitting jumpsuits.) This critical history comprehensively examines science fiction films that portray space travel realistically (and sometimes not quite so) by having characters wear spacesuits. Beginning [A] with the pioneering *Himmelskibet* (1918) and *Woman on the Moon* (1929), it discusses [B] other classics in this tradition, including *Destination Moon* (1950), *Riders to the Stars* (1954), and *2001: A Space Odyssey* (1968); [C] films that gesture toward realism but betray that goal with melodramatic villains, low comedy, or improbable monsters; [D] the distinctive spacesuit films of Western Europe, Russia and Japan; and [E] America's spectacular real-life spacesuit film, the televised Apollo 11 moon landing (1969).

Back in the Spaceship Again Karen Sands-O'Connor, Marietta Frank, 1999-08-30 Much literature for children appears in the form of series, in which familiar characters appear in book after book. In the late nineteenth and early twentieth century, authors began to write science fiction series for children. These early series generally had plots that revolved around inventions developed by the protagonist. But it was the development and use of rocket and atomic science during World War II that paved the way for interesting and exciting new themes, conflicts, and plots. While much has been written about the early juvenile science fiction series, particularly the Tom Swift books, comparatively little has been written about children's science fiction series published since 1945. This book provides a broad overview of this previously neglected topic. The volume offers a critical look at the history, themes, characters, settings, and construction of post-1945 juvenile science fiction series, including the A.I. Gang, the Animorphs, Commander Toad, Danny Dunn, Dragonfall Five, the Magic School Bus, and Space Cat. The book begins with an introductory history of juvenile science fiction since 1945, with chapters then devoted to particular topics. Some of these topics include the role of aliens and animals, attitudes toward humor, the absence and presence of science, and the characterization of women. A special feature is an appendix listing the various series. In addition, the volume provides extensive bibliographical information.

Art and Revolution in Latin America, 1910-1990 David Craven, 2006-01-01 In this uniquely wide-ranging book, David Craven investigates the extraordinary impact of three Latin American revolutions on the visual arts and on cultural policy. The three great upheavals - in Mexico (1910-40), in Cuba (1959-89), and in Nicaragua (1979-90) - were defining moments in twentieth-century life in the Americas. Craven discusses the structural logic of each movement's artistic project - by whom, how, and for whom artworks were produced -- and assesses their legacies. In each case, he demonstrates how the consequences of the revolution reverberated in the arts and cultures far beyond national borders. The book not only examines specific artworks originating from each revolution's attempt to deal with the challenge of 'socializing the arts,' but also the engagement of the working classes in Mexico, Cuba, and Nicaragua with a tradition of the fine arts made newly accessible through social transformation. Craven considers how each revolution dealt with the pressing problem of creating a 'dialogical art' -- one that reconfigures the existing artistic resource rather than one that just reproduces a populist art to keep things as they were. In addition, the author charts the impact on the revolutionary processes of theories of art and education, articulated by such thinkers as John Dewey and Paulo Freire. The book provides a fascinating new view of the Latin American revolutionaries -- from artists to political leaders -- who defined art as a fundamental force for the transformation of society and who bequeathed new ways of thinking about the relations among art, ideology, and class, within a revolutionary process.

Driving Visions David Laderman, 2002-07-15 Examines and profiles road movies made since the late 1960s, citing their common theme of journeys as a cultural critique and exploration beyond society and within the self, and tracing the historical evolution of the genre from its Hollywood precursors through the European variations.
