Meat Quality Wieslaw Przybylski, PhD,David Hopkins, PhD,2015-10-15 One of the biggest challenges faced by meat producers today is the requirement to improve the quality of meat while maintaining focus on efficiency and higher yields. Numerous studies have shown that consumers are willing to pay premiums for meat products with guaranteed eating quality. This book examines the complicated multistep process of producing high-quality meat, from the growth of the animals to the final product. It discusses specific aspects of meat quality for beef, pork, and sheep. Meat Quality: Genetic and Environmental Factors covers key topics such as animal welfare, nutrition, pre-slaughter handling, slaughter technology, breeding strategies, and the influence of common genetic factors on meat quality. It also discusses the latest meat production systems designed to ensure high-quality meat and the role of transgenic animal technology in meat quality. The book devotes separate chapters to beef, pork, and sheep quality, looking at the effects of breed, genetic type, gender, and age on meat quality. The chapters are written by contributors from universities, research institutes, and breeding companies from different countries and continents. The chapters are based on the research and teaching experience of the contributors as well as on a critical evaluation of the current literature. No other book available today covers the key issues regarding meat quality in such a comprehensive way. This book should be of keen interest to students of food technology, nutrition, commodities sciences, and animal sciences, as well as to food scientists and engineers who want to update their knowledge about the determinants of meat quality.

New Aspects of Meat Quality Peter P. Purslow,2022-08-23 New Aspects of Meat Quality, Second Edition continues to be the leading source of scientific information for what constitutes meat quality for consumers, marketers and producers in the 21st century. The book includes traditional measures of meat quality such as texture, water holding, color, flavor/aroma, safety/microbiology and processing characteristics as well as quality assurance schemes, organic/free range, ethical meat production, and the desirability of genetically modified organisms, amongst others. Users will find comprehensive coverage on developments in our understanding of how muscle structure affects the eating qualities of cooked meat, along with techniques for measuring, predicting and producing meat quality. In addition, the book covers how these new techniques help us minimize variability in eating quality and/or maximize value. The book's final section identifies the current qualities of consumer and public perceptions and what is sustainable, ethical, desirable and healthy in meat production and consumption. Provides the latest research techniques and developments presented by top researchers in the field Covers new aspects of meat quality with the same scientific authority as texts on traditional meat quality value Includes five new chapters that cover the role of proteolysis, meat flavor, meat bi-products, and meat and public health

International Economic Law and Governance Julien Chaisse,Tsai-yu Lin,2016-08-11 Nation states have long and successfully claimed to be the proper and sovereign forum for determining a country's international economic policies. Increasingly, however, supranational and non-governmental actors are moving to the front of the stage. New forms of multilateral and global policy-making have emerged, including states and national administrations, key international organizations, international conferences, multinational enterprises, and a wide range of transnational pressure groups and NGOs that all claim their share in exercising power and influence on international and domestic policy-making. In honour of Professor Mitsuo Matsushita's intellectual contributions to the field of international economic law, this volume reflects on the current state and the future of international economic law. The book addresses a broad spectrum of themes in contemporary international economic regulations and focuses specifically on the significant areas of Professor Matsushita's scholarship, including the rise of the soft-law mechanism in international economic regulation, the role of the WTO and dispute settlement, and specific areas such as competition, subsidies, anti-dumping, intellectual property, and natural resources. Part one of the volume provides a comprehensive and critical analysis of the rule-based international dispute settlement mechanisms; Part two investigates the normative influences to and from WTO law; and Part three focuses on policy and law-making issues.

Meathooked Marta Zaraska,2016-02-23 A few years ago, Marta Zaraska's mother decided to go vegetarian after stumbling upon an article on the health risks of eating meat. Her resolve lasted about a fortnight before the juicy hams and the creamy pâtés began creeping back into her refrigerator. Prodded to explain her lapse, she replied, "I like meat, I eat it, end of story." Many of us have had a similar experience. What makes us crave animal protein, and what makes it so hard to give up? And if all the studies are correct, and consuming meat is truly unhealthy for us, why didn't evolution turn us all into vegetarians in the first place? In Meathooked, Zaraska explores what she calls the "meat puzzle": our love of meat, despite its harmful effects. Scientific journals overflow with reports of red meat raising the risk of certain cancers; each hamburger contributes as much to global warming as does driving a car 320 miles; and the horrors of industrial meat production are now well-known. None of these facts have prompted us to give up our hamburgers and steaks. On the contrary, meat

consumption has only increased over the past decades. Taking the reader to India's unusual steakhouses, animal sacrifices at temples in Benin, and labs in Pennsylvania where meat is being grown in petri dishes, Zaraska examines the history and future of meat and meat-eating, showing that while our increasing consumption of meat can be attributed in part to the power of the meat industry and the policies of our governments, the main “hooks” that keep us addicted to meat are much older: genes and culture. An original and thought-provoking exploration of carnivorousness, Meathooked explains one of the most enduring features of human civilization—and why meat-eating will continue to shape our bodies and our world into the foreseeable future.

New Moral Natures in Tourism Bryan S. R. Grimwood,Kellee Caton,Lisa Cooke,2018-04-17 How do we understand human-nature relationships in tourism, or determine the consequences of these relationships to be good, bad, right, wrong, fair, or just? What theoretical and philosophical perspectives can usefully orient us in the production and consumption of tourism towards living and enacting the good life with the more-than-human world? This book addresses such questions by investigating relationships between nature and morality in tourism contexts. Recognizing that morality, much like nature, is embedded in histories and landscapes of power, the book engages with diverse theoretical and philosophical perspectives to critically review, appraise, and advance dialogue on the moral dimensions of natures. Contributing authors explore the very foundations of how we make sense of nature in tourism and leisure contexts—and how we might make sense of it differently. The book will be essential reading for researchers, students, and practitioners grappling with questions about the moral values, frameworks, or practices best suited to mobilizing tourism natures. What will the future of tourism hold in terms of sustainability, justice, resilience, health, and well-being?

Pork Paulo E.S. Munekata,Mirian Pateiro,Daniel Franco,José M. Lorenzo,2021-09-02 The processing of pork is a common technological practice that modifies the taste, flavor, texture and color of raw pork meat. Due to pork's accessible price and versatility, the manufacture of pork products to offer a variety of options to consumers is an important strategy of the meat industries in this sector to improve profits and expand into new markets at the local, regional and international levels. The diversity of pork products reflects the diversity and history of many local cultures around the world, as well as a growing interest in preserving traditional processing practices. *Pork: Meat Quality and Processed Meat Products* delves into the various kinds of pork and the methods used to prepare it for consumption, including fresh meat products, fermented sausages, dry-cured products, blood sausages and cooked sausages. Each category starts with a specific raw material (entire cut vs. minced pork meat) to which is added a unique combination of ingredients (e.g., sodium chloride, starter cultures, blood, seasoning and spices). The method of processing (such as salting, drying, thermal processing and fermenting) takes consumer tastes and storage needs into account, as well as how each product will be consumed (cooked, sliced, spread and as an ingredient in other dishes, for instance). Consequently, a wide range of products made from pork are currently being produced worldwide. Added to this is the increasing importance of ingredients and health factors to consumers; the resulting demand for products that address specific health concerns is having a significant impact on research into and the production of pork meat products. Key Features: Comprehensively presents and discusses the wealth of information about pork products Includes specific details about the processing, quality of final products and innovation in the industry Presents innovative, health-oriented approaches to making traditional and commercial pork products Discusses healthier pork meat products that address consumer trends and government recommendations The production of health-oriented pork products is an emerging and promising investigation area with a direct impact on the current market for meat products.

Gaining Ground Forrest Pritchard,2013-05-21 One fateful day in 1996, upon discovering that five freight cars' worth of glittering corn have reaped a tiny profit of \$18.16, young Forrest Pritchard undertakes to save his family's farm. What ensues—through hilarious encounters with all manner of livestock and colorful local characters—is a crash course in sustainable agriculture. Pritchard's biggest ally is his renegade father, who initially questions his career choice and eschews organic foods for sugary mainstream fare; but just when the farm starts to turn heads at local markets, his father's health takes a turn for the worse. With poetry and humor, this timely memoir tugs on the heartstrings and feeds the soul long after the last page is turned.

Geographies of Meat Harvey Neo,Jody Emel,2017-03-16 With the ever rising demand for meat around the world, the production of meat has changed dramatically in the past few decades. What has brought about the increasing popularity and attendant normalization of factory farms across many parts of the world? What are some of the ways to resist such broad convergences in meat production and how successful are they? This book locates the answers to these questions at the intersection between the culture, science and political economy of meat production and consumption. It details how and why techniques of production have spread across the world, albeit in a spatially uneven way. It argues that the modern meat production and consumption sphere is the outcome of a complex matrix of cultural politics, economics and technological faith. Drawing from examples across the world (including America, Europe and Asia), the tensions and repercussions of meat production and consumption are also analyzed. From a geographical perspective, food animals have been given considerably less attention compared to wild animals or pets. This book, framed conceptually by critical animal studies, governmentality and commodification, is a theoretically driven and empirically rich study that advances the study of food animals in geography as well as in the wider social sciences.
