In Flanders Fields and Other Poems John McCrae,2015-03-28 "In Flanders Fields," the iconic poem which gives its title to this collection of poems and selected prose, is one of Canada's — and the world's — best known poems of the Great War. It was written in 1915 by Canadian John McCrae, an artillery man, poet, and medical doctor, upon the death of a friend and fellow soldier during the Second Battle of Ypres in 1915. This is a faithful reissue of the Canadian first edition of McCrae's writings, originally issued by his friends in 1919 in his honour and memory. It includes the best of his poetry and selections of his letters from the front lines together with a thoughtful essay of appreciation by his friend and fellow medical officer, Sir Andrew Macphail.

Exotic Nuclear Spectroscopy William C. McHarris,2012-12-06 Several hundred nuclear scientists from more than a dozen countries met in Miami Beach, Florida, in September 1989 for a Symposium on Exotic Nuclear Spectroscopy, sponsored by the Division of Nuclear

Chemistry and Technology of the American Chemical Society. Braving five days of beckoning beaches, they presented, listened to, and discussed a series spectroscopy-both experimental and of invited papers covering the renaissance of nuclear theoretical-that has occurred during the past decade and which promises to continue well into the decade to come. This book contains the Proceedings of that Symposium on Exotic Nuclear Spectroscopy. But it is much more: During the ensuing six months, most of the papers were rewritten, polished, and/or expanded; so the resulting book is a much more finished, comprehensive, and up-to-date product than a general proceedings. Chapter sequences follow the original symposium program, which, with a few exceptions, juxtaposes like topics. Each chapter can stand more or less on its own-although, as in any complex, interrelated scientific field, there are many cross-references among chapters. The manuscripts were edited and then uniformly typed in the Department of Chemistry at Michigan State University. I tried to keep the editing to a minimum so as to preserve the flavor of individual styles. A great debt of gratitude goes to those who helped make this volume possible, especially to Vada O'Donnell, who bore the largest burden of typing (and clarifying) the manuscripts.

Computational Techniques for Fluid Dynamics 2

Clive A.J. Fletcher, 2012-12-06 The purpose and organisation of this book are described in the preface to the first edition (1988). In preparing this edition minor changes have been made, particularly to Chap. 1 (Vol. 1) to keep it reasonably current, and to upgrade the treatment of specific techniques, particularly in Chaps. 12-14 and 16-18. However, the rest of the book (Vols. 1 and 2) has required only minor modification to clarify the presentation and to modify or replace individual problems to make them more effective. The answers to the problems are available in

Solutions Manual for Computational Techniques for Fluid Dynamics by K. Srinivas and C. A. J. Fletcher, published by Springer-Verlag, Heidelberg, 1991. The computer programs have also been reviewed and tidied up. These are available on an IBM compatible floppy disc direct from the author. I would like to take this opportunity to thank the many readers for their usually generous comments about the first edition and particularly those readers who went to the trouble of drawing specific errors to my attention. In this revised edition considerable effort has been made to remove a number of minor errors that had found their way into the original. I express the hope that no errors remain but welcome communication that will help me improve future editions. In preparing this revised edition I have received considerable help from Dr. K.
