**Caught in the Middle** David Booth, 2011 This title offers a richly textured picture of the world of middle-school students. It describes who middle-school students are, explains why fostering their voice is important, and discusses the creation of a community of literacy partners.

**American Political Humor [2 volumes]** Jody C. Baumgartner, 2019-10-07 This two-volume set surveys the profound impact of political humor and satire on American culture and politics over the years, paying special attention to the explosion of political humor in today's wide-ranging and turbulent media environment. Historically, there has been a tendency to regard political satire and humor as a sideshow to the wider world of American politics—entertaining and sometimes insightful, but ultimately only of modest interest to students and others surveying the trajectory of American politics and culture. This set documents just how mistaken that assumption is. By examining political humor and satire throughout US history, these volumes not only illustrate how expressions of political satire and humor reflect changes in American attitudes about presidents, parties, and issues but also how satirists, comedians, cartoonists, and filmmakers have helped to shape popular attitudes about landmark historical events, major American

institutions and movements, and the nation's political leaders and cultural giants. Finally, this work examines how today's brand of political humor may be more influential than ever before in shaping American attitudes about the nation in which we live.

**Literacy Teacher Educators** Clare Kosnik,Jennifer Rowsell,Peter Williamson,Rob Simon,2013-04-19 Literacy Teacher Educators: Preparing Teachers for a Changing World brings together the perspectives of 26 literacy/English teacher educators from four countries: Canada, U.S., UK, and Australia. In this unique text the contributors, of whom many are renowned experts in critical literacy and multiliteracies, provide readers with an overview of trends in literacy/English teacher education. The chapters begin with authors' personal stories and current research, giving readers insight into the personal and professional worlds of the contributors. Included in each chapter is a rich description of approaches to literacy instruction in teacher education. These exemplary teacher educators show in concrete detail how they are addressing our evolving understanding of literacy . This timely text, written in a highly engaging style, will be of value to teacher educators throughout the world. I have never read anything quite like this book. It contains explicit representations of the conceptual frames and work of distinguished literacy teacher educators at various stages in their careers, accounts that provide a strong counter-narrative to the mainstream discourse in policy and education, that fully embrace the uncertainties and complexities of practice. From the Forward by Susan L. Lytle, Professor Emerita of Education in the Graduate School of Education, University of Pennsylvania

**Being Self-Study Researchers in a Digital World** Dawn Garbett,Alan Ovens,2016-09-13 This book presents research on the intersection of self-study research, digital technologies, and the development of future-oriented practices in teacher education. It explores the changing teacher education landscape

by considering issues that are central to doing self-study: context and location; data access, generation and analysis; social and personal media; forms and transformations of pedagogy; identity; and ethics in an increasingly digital world. Self-study research on, with, and around digital technologies is highly significant in education where the rapid development and ubiquity of such technologies are an integral part of teacher educators' everyday pedagogical and research practices. Blended and virtual environments are now not only commonplaces in which to teach about teaching but also to research about teaching. The book highlights how digital technologies can enhance the pedagogies and knowledge base of teacher education research and practice while remaining circumspect of grandiose claims. Each chapter addresses aspects of doing self-study with educational technology, and provides issues for discussion and debate for readers wanting to engage in self-study.

Libraries, Literacy, and African American Youth Sandra Hughes-Hassell, Pauletta Brown Bracy, Casey H. Rawson, 2016-10-31 This important book is a call to action for the library community to address the literacy and life outcome gaps impacting African American youth. It provides strategies that enable school and public librarians to transform their services, programs, and collections to be more responsive to the literacy strengths, experiences, and needs of African American youth. According to National Assessment of Educational Progress (NEAP), only 18 percent of African American fourth graders and 17 percent of African American eighth graders performed at or above proficiency in reading in 2013. This book draws on research from various academic fields to explore the issues surrounding African American literacy and to aid in developing culturally responsive school and library programs with the goal of helping to close the achievement gap and improve the quality of life for African American youth. The book merges the work of its three authors along with the findings of other researchers and

practitioners, highlighting exemplary programs, such as the award-winning Pearl Bailey Library Program, the Maker Jawn initiative at the Free Library of Philadelphia, and the Blue Ribbon Mentor Advocate writing institute in the Chapel Hill-Carrboro City Schools, among others. Readers will understand how these culturally responsive programs put theory and research-based best practices into local action and see how to adapt them to meet the needs of their communities.

*Reinventing Project-Based Learning* Suzie Boss, Jane Krauss, 2014-07-21 This newly revised book explores proven strategies for overcoming the limitations of the traditional classroom, including a wealth of technology tools for inquiry, collaboration, and global connection to support this new vision of instructional design. The book follows the arc of a project, providing guided opportunities to direct and reflect educators own learning and professional development. In the expanded second edition, educators will find new examples of the latest tools, assessment strategies and promising practices that are poised to shape education in the future.

**Practical (and Fun) Guide to Assistive Technology in Public Schools** Christopher R. Bugaj, Sally Norton-Darr, 2010-03-21 From setting up a stellar team to consultations and evaluations, and from implementation to assessing success, this guide presents detailed advice and ideas to provide assistive technology (AT) services that effectively and efficiently help students. The nuts and bolts of each area are presented in a practical way (with amusing metaphors thrown in for good measure) so that you can directly apply what's in the book and see tangible results.
