Bomb Disposal Carla Mooney, 2014-08-01 Can you imagine having to disable a bomb? Well, that is exactly what bomb disposal experts do every day around the world. Using robots equipped with cameras to see inside suspicious packages, to dogs with special training to sniff out explosive materials, it's all in a day's work for these brave, highly-trained individuals. Learn all about the ways bomb experts detect, disarm, and dispose of bombs and the way scientists are even training bees to become the next buzzing bomb experts! This book will allow students to analyze in detail how a key individual, event, or idea is introduced, illustrated, and elaborated in a text (e.g., through examples or anecdotes).

Bomb Detection Squads Michael Green, 1998 Provides an introduction to bomb squads, including their history, function, equipment, and targeted criminals.

Time Bomb Michael Mathiesen, 2024-02-19 There is a huge bomb that is ticking down to the moment when it must go off and it's right underneath your feet. This almost unseen Time Bomb is so massive that it will kill every man woman, child, dog, cat, birds, insects, donkeys, horses, all the fish in the sea, the whales, the dolphins, plankton, trees, plants, flowers and every other thing that lives here on this planet. Time is ticking away and so I thought I'd better warn everyone. But there's nowhere to run. We have to all take a stand by joining what I call the final SWAT Team. (Save our World Again Today) If you choose not to saddle up and fight the good fight - it's curtains for the human race. In this book, you at least get some basic training in SWAT. You will get the weapons and the sufficient quantity of guts and gumption to get the job done in helping to disarm the Time Bomb. But, most importantly of all, you will get the knowledge of how to use our only effective weapon - Time. Time is not on our side, but when you understand how it flies around the universe in waves, you

will be able to control it and use it to disarm the bomb. The world's most famous genius of all time Albert Einstein once said that Doing the same things over and over again and expecting different results is the definition of insanity. Einstein has been proven correct in many major things he has predicted. Let's not let this prediction of the INSANITY of letting the end of the world come to pass in our generation. We must do something completely different, in fact, we must do all things completely differently, or the insanity of our present march off the cliff will make us just another spot of dust in the heavens. It's ironic also that Einstein's famous equation of - $E=mc^2$ was the key to the production of the most destructive forces humans have ever unleashed, the nuclear weapons that today threaten the greatest mass extinction in history, made more urgently notable since these weapons are now controlled by psychopathic mass murderers. (Not an exaggeration) Just as I was finishing this book, news hit the world that Russia is planning to put a nuclear device like the Death Star in Star Wars, in orbit over our heads that could destroy our entire way of life in seconds. **THUS** the need for this new formula because **TIME IS TICKING** to the final seconds. I introduce here a new equation that I invented that hopefully will have the effect of countering all of the destructive power of Einstein's equation. $T=emc(8)$ Or Time is equal to any amount of energy times any amount of mass times the speed of light raised to the power of infinity. This formula, if applied correctly, will allow anyone to apply a new kind of sanity in which we are all encouraged and even rewarded for doing things differently - and this time, getting different, and even better results. In order to help in this cause, I decided that the very essence of Time has to be unveiled and simplified so that more and more of us can quickly learn how to use it more effectively in our daily lives. Time is something we all think we know everything we need to know about and we take Time for granted because until we expire - We say that Time flies - It is the thesis of this book that Time moves through the universe in waves. Someday soon we may

have the instrument that will prove this theory of mine. In reality, Time is rationed out to each and every one of us as is needed in pursuit of larger goals. The movement of Time around the universe in this manner is broadcast in High and Low Pressure Time Zones. High Pressure Time zones are sunny and warm and Low Pressure Time zones are cold and wintry. Time is ticking towards a terrible conclusion of the end of the Human Race. Learn how to join the only S.W.A.T. Team that can save us all. Get out and MAKE SOME NOISE!

Restricted Data Alex Wellerstein,2021-04-09 Nuclear weapons, since their conception, have been the subject of secrecy. In the months after the dropping of the atomic bombs on Hiroshima and Nagasaki, the American scientific establishment, the American government, and the American public all wrestled with what was called the problem of secrecy, wondering not only whether secrecy was

appropriate and effective as a means of controlling this new technology but also whether it was compatible with the country's core values. Out of a messy context of propaganda, confusion, spy scares, and the grave counsel of competing groups of scientists, what historian Alex Wellerstein calls a new regime of secrecy was put into place. It was unlike any other previous or since. Nuclear secrets were given their own unique legal designation in American law (restricted data), one that operates differently than all other forms of national security classification and exists to this day. Drawing on massive amounts of declassified files, including records released by the government for the first time at the author's request, *Restricted Data* is a narrative account of nuclear secrecy and the tensions and uncertainty that built as the Cold War continued. In the US, both science and democracy are pitted against nuclear secrecy, and this makes its history uniquely compelling and timely--

Freax Tamás, Polgár,2016-04-17 FREAX – the biggest book ever written about the history of the computer demoscene. The book tells the complete history of the Commodore 64 and the Amiga, both about the machines and about the underground subcultures around them, from the cracker- and warez-scene to the demoscene, from hacking and phreaking to the ASCII art scene. Interviews with scene celebrities, former key persons of the computer industry, citations from contemporary magazines and fanzines make the narrative history of the big adventure complete. The book contains 350 pages and is illustrated with 480 color photos and screenshots. This is the comprehensive guide to the golden era of home computers.
