The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Construction Project Management Alison Dykstra, 2018 Construction Project Management provides the reader with crucial background information often overlooked in other texts: The roles of the major players owners and designers, general and specialty contractors; Why contractors should avoid some jobs, and how to get the right ones; What bidding is, and why the low bid is not always the best bid; Why different types of construction contracts carry different levels of risk; Why cost estimates and schedules are keys to project success; How a contractor brings in a job on time and on budget; And much more: Alternative project delivery and BIM; Change orders and getting paid; MasterFormat; ConsensusDocs and AIA Documents; An expanded and updated introduction to Green Construction.

Software Business Pasi Tyrväinen, Slinger Jansen, Michael A. Cusumano, 2010-06-18 The advancement of the software industry has had a substantial impact not only on productivity and on GDP growth globally, but also on our daily work and life. Software business refers to commercial activity of the software industry, aimed at generating income from delivery of software products and software services. Although software business shares common features with other international knowledge-intensive businesses, it carries many inherent features making it an intriguing and challenging domain for research. Until now, however, software business has received little attention from the academic community. The First International Conference on Software Business (ICSOB 2010) was organized in Jyväskylä during June 21-23, 2010. This inaugural conference brought together a strong Program Committee of 52 members with research disciplines from various fields of business management and technology management as well as international, with members coming from 17 countries from South and North America to Europe, India and Australia. We received 35 research paper submissions. The papers went through a double-blind review process producing at least three reviews for each accepted paper. The Program Committee accepted 13 submissions to be presented as full papers in the conference, equaling 37% of the submissions. In addition, ten papers were accepted as short papers. The accepted papers represent the wide variety of research activity on software business. For the purposes of the conference program, the papers were organized under eight themes: business models, business management, ecosystems, education and research, internationalization, open source software and social media, product management, and software as a service. In addition to the paper sessions, the conference program included three keynote presentations and a Business Innovation Track containing

best-practice presentations from the software industry. The conference program also included two workshops, three tutorials and an adjunct meeting of the Cloud Software Consortia.

The Routledge Handbook of Architecture, Urban Space and Politics, Volume I Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century, we cannot merely reignite the approaches of thought and design that were operative in the last century. This is despite, or because of, the nexus between politics and space often being theorized as a representation or by-product of politics. As a symbol or an effect, the spatial dimension is depoliticized. Consequently, architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role. This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing. Considering both ongoing and unprecedented global problems – from violence and urban warfare, the refugee crisis, borderization, detention camps, terrorist attacks to capitalist urbanization, inequity, social unrest and climate change – this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics, architecture and urban space. Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times. The operative and active political reading of space is disseminated through five thematics: Violence and War Machines; Security and Borders; Race, Identity and Ideology; Spectacle and the Screen; and Mapping Landscapes and Big Data. This first volume of the handbook frames cutting-edge contemporary debates and presents studies of actual theories and projects that address spatial politics. This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities.

The \$10 Trillion Prize Michael J. Silverstein, Abheek Singhi, Carol Liao, 2012 This is the first detailed look at the new generation of consumers in emerging markets - how they think, shop, buy and dream - and what companies must do to win them over, from the heads of Boston Consulting Group's consumer and globalization practices in the US, China and India. It is the dawn of the emerging consumer: Are you ready? By 2020, consumers in China and India will generate more than \$10 trillion of total annual revenue for companies selling to them. Already the world's biggest buyers of cars, mobile phones, shoes, home appliances, and more-consumers in these countries are waiting for your firm's products and services. But are you ready for the demand?

Encyclopedia of African American Education Kofi Lomotey,2010 The Encyclopedia of African American Education covers educational institutions at every level, from preschool through graduate and professional training, with special attention to historically black and predominantly black colleges and universities. Other entries cover individuals, organizations, associations, and publications that have had a significant impact on African American education. The Encyclopedia also presents information on public policy affecting the education of African Americans, including both court decisions and legislation. It includes a discussion of curriculum, concepts, theories, and alternative models of education, and addresses the topics of gender and sexual orientation, religion, and the media. The Encyclopedia also includes a Reader's Guide, provided to help readers find entries on related topics. It classifies entries in sixteen categories: Alternative Educational Models Associations and Organizations Biographies Collegiate Education Curriculum Economics Gender Graduate and Professional Education Historically Black Colleges and Universities Legal Cases Pre-Collegiate Education Psychology and Human Development Public Policy Publications Religious Institutions Segregation/Desegregation. Some entries appear in more than one category. This two-volume reference work will be an invaluable resource not only for educators and students but for all readers who seek an understanding of African American education both historically and in the 21st century.
