*The Origin of Consciousness in the Breakdown of the*

*Bicameral Mind* Julian Jaynes, 2000-08-15 National Book Award

Finalist: “This man’s ideas may be the most influential, not to say controversial, of the second half of the twentieth century.”—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. “Don’t be put off by the academic title of Julian Jaynes’s *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor.”—The New York Times “When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis.”—John Updike, *The New Yorker* “He is as startling as Freud was in *The Interpretation*

of Dreams, and Jaynes is equally as adept at forcing a new view of known human behavior.”—American Journal of Psychiatry

**Slow Journey South** Paula Constant,2008 When Paula Constant and her husband, Gary, attempt to break away from the conventional 9-to-5 routine, a few weeks lazing in a resort or packed in a tour bus is not what they have in mind. What starts out as an idle daydream to embark on 'a travel to end all travels' turns into something far greater: an epic year-long 5000-kilometre walk from Trafalgar Square in London to Morocco and the threshold of the Sahara Desert--Publisher.

**The Noonday Demon** Andrew Solomon,2014-09-16 The author offers a look at depression, drawing on his own battle with the illness and interviews with fellow sufferers, researchers, and doctors to assess the disease's complexities, causes, symptoms, and available therapies.

**All that is Solid Melts Into Air** Marshall Berman,1983 The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account.

**Actionable Gamification** Yu-kai Chou,2019-12-03 Learn all

about implementing a good gamification design into your products, workplace, and lifestyle

**Key Features** Explore what makes a game fun and engaging Gain insight into the Octalysis Framework and its applications Discover the potential of the Core Drives of gamification through real-world scenarios

**Book Description** Effective gamification is a combination of game design, game dynamics, user experience, and ROI-driving business implementations. This book explores the interplay between these disciplines and captures the core principles that contribute to a good gamification design. The book starts with an overview of the Octalysis Framework and the 8 Core Drives that can be used to build strategies around the various systems that make games engaging. As the book progresses, each chapter delves deep into a Core Drive, explaining its design and how it should be used. Finally, to apply all the concepts and techniques that you learn throughout, the book contains a brief showcase of using the Octalysis Framework to design a project experience from scratch. After reading this book, you'll have the knowledge and skills to enable the widespread adoption of good gamification and human-focused design in all types of industries. What you will learn

Discover ways to use gamification techniques in real-world situations Design fun,

engaging, and rewarding experiences with Octalysis Understand what gamification means and how to categorize it Leverage the power of different Core Drives in your applications Explore how Left Brain and Right Brain Core Drives differ in motivation and design methodologies Examine the fascinating intricacies of White Hat and Black Hat Core Drives Who this book is for Anyone who wants to implement gamification principles and techniques into their products, workplace, and lifestyle will find this book useful.

The Knowledge Illusion Steven Sloman, Philip

Fernbach, 2017-03-14 “The Knowledge Illusion is filled with insights on how we should deal with our individual ignorance and collective wisdom.” –Steven Pinker We all think we know more than we actually do. Humans have built hugely complex societies and technologies, but most of us don’t even know how a pen or a toilet works. How have we achieved so much despite understanding so little? Cognitive scientists Steven Sloman and Philip Fernbach argue that we survive and thrive despite our mental shortcomings because we live in a rich community of knowledge. The key to our intelligence lies in the people and things around us. We’re constantly drawing on information and expertise stored outside our heads: in our bodies, our environment, our possessions, and the community with which we interact—and usually we don’t even realize we’re doing it. The human mind is both brilliant and pathetic. We have mastered fire, created democratic institutions, stood on the moon, and sequenced our genome. And yet each of us is error prone, sometimes irrational, and often ignorant. The fundamentally communal nature of intelligence and knowledge

explains why we often assume we know more than we really do, why political opinions and false beliefs are so hard to change, and why individual-oriented approaches to education and management frequently fail. But our collaborative minds also enable us to do amazing things. The Knowledge Illusion contends that true genius can be found in the ways we create intelligence using the community around us.

**Writing Spaces 1** Charles Lowe, Pavel Zemliansky, 2010-06-18  
Volumes in Writing Spaces: Readings on Writing offer multiple perspectives on a wide-range of topics about writing, much like the model made famous by Wendy Bishop's "The Subject Is . . ." series. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about developing nearly every aspect of craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in writing or writing-intensive courses across the disciplines at any level. Topics in Volume 1 of the series include academic writing, how to interpret writing assignments, motives for writing, rhetorical analysis, revision,

invention, writing centers, argumentation, narrative, reflective writing, Wikipedia, patchwriting, collaboration, and genres.

**Don't Unplug** Chris Dancy, 2018-09-18 Chris Dancy, the world's most connected person, inspires readers with practical advice to live a happier and healthier life using technology In 2002, Chris Dancy was overweight, unemployed, and addicted to technology. He chain-smoked cigarettes, popped pills, and was angry and depressed. But when he discovered that his mother kept a record of almost every detail of his childhood, an idea began to form. Could knowing the status of every aspect of his body and how his lifestyle affected his health help him learn to take care of himself? By harnessing the story of his life, could he learn to harness his own bad habits? With a little tech know-how combined with a healthy dose of reality, every app, sensor, and data point in Dancy's life was turned upside down and examined. Now he's sharing what he knows. That knowledge includes the fact that changing the color of his credit card helps him to use it less often, and that nostalgia is a trigger for gratitude for him. A modern-day story of rebirth and redemption, Chris' wisdom and insight will show readers how to improve their lives by paying attention to the relationship between how we move, what we eat, who we spend

time with, and how it all makes us feel. But Chris has done all the hard work: Don't Unplug shows us how we too can transform our lives.

**Black Stone Heart** Michael R Fletcher, 2020-03-29 A broken man, Khraen awakens alone and lost. His stone heart has been shattered, littered across the world. With each piece, he regains some small shard of the man he once was. He follows the trail, fragment by fragment, remembering his terrible past. There was a woman. There was a sword. There was an end to sorrow. Khraen walks the obsidian path.

The Ballad of the Lone Medievalist Kisha G. Tracy, John P. Sexton, 2018 Working medievalists are often the only scholar of the Middle Ages in a department, a university, or a hundred-mile radius. While working to build a body of focused scholarly work, the lone medievalist is expected to be a generalist in the classroom and a contributing member of a campus community that rarely offers disciplinary community in return. As a result, overtasked and single medievalists often find it challenging to advocate for their work and field. As other responsibilities and expectations crowd in, we come to feel disconnected from the projects and subjects that sustain our intellectual passion. An insidious isolation even from

one another creeps in, and soon, even attending a conference of fellow medievalists can become a lonely experience. Surrounded by scholars with greater institutional support, lower teaching loads, or more robust research agendas, we may feel alienated from our work - the work to which we've dedicated our careers. The Lone Medievalist (the collaborative community and the book) is intended as an antidote to the problem of professional isolation. It is offered in the spirit of common weal that marks the ideals (if not always the realities) of so many of the communities we study - agricultural, professional, national, notional, and of course, monastic. The Ballad of the Lone Medievalist isn't only about scholarship, or teaching, or institutional life, or the pursuit of new learning - it's about all of them. The essays in this volume address all aspects of the professional and intellectual life of medievalists. Though many of us acknowledge and address the challenges in being Lone Medievalists, these essays are not intended as voces clamantium; they are offered to provide strategies, camaraderie, and an occasional bit of inspiration. They are a call to action, a sharing of hard-won wisdom, and a helping hand - and, above all, a reminder that we are not alone.

How Not to Hate Your Husband After Kids Jancee

Dunn, 2017-03-21 Get this for your pregnant friends, or yourself (People): a hilariously candid account of one woman's quest to bring her post-baby marriage back from the brink, with life-changing, real-world advice. Recommended by Nicole Cliffe in Slate Featured in People Picks A Red Tricycle Best Baby and Toddler Parenting Book of the Year One of Mother magazine's favorite parenting books of the Year How Not To Hate Your Husband After Kids tackles the last taboo subject of parenthood: the startling, white-hot fury that new (and not-so-new) mothers often have for their mates. After Jancee Dunn had her baby, she found that she was doing virtually all the household chores, even though she and her husband worked equal hours. She asked herself: How did I become the 'expert' at changing a diaper? Many expectant parents spend weeks researching the best crib or safest car seat, but spend little if any time thinking about the titanic impact the baby will have on their marriage - and the way their marriage will affect their child. Enter Dunn, her well-meaning but blithely unhelpful husband, their daughter, and her boisterous extended family, who show us the ways in which outmoded family patterns and traditions thwart the overworked, overloaded parents of today. On the brink of marital Armageddon, Dunn plunges into the latest

relationship research, solicits the counsel of the country's most renowned couples' and sex therapists, canvasses fellow parents, and even consults an FBI hostage negotiator on how to effectively contain an explosive situation. Instead of having the same fights over and over, Dunn and her husband must figure out a way to resolve their larger issues and fix their family while there is still time. As they discover, adding a demanding new person to your relationship means you have to reevaluate -- and rebuild -- your marriage. In an exhilarating twist, they work together to save the day, happily returning to the kind of peaceful life they previously thought was the sole province of couples without children. Part memoir, part self-help book with actionable and achievable advice, *How Not To Hate Your Husband After Kids* is an eye-opening look at how the man who got you into this position in the first place is the ally you didn't know you had.

**Criminal Justice and Mental Health** Jada Hector, David

Khey, 2018-04-18 This textbook provides an overview for students in Criminology and Criminal Justice about the overlap between the criminal justice system and mental health. It provides an accessible overview of basic signs and symptoms of major mental illnesses and size of scope of justice-involved individuals with mental illness.

In the United States, the criminal justice system is often the first public service to be in contact with individuals suffering from mental illness or in mental distress. Those with untreated mental illnesses are often at higher risk for committing criminal acts, yet research on this population continues to shed light on common myths – such as a prevailing assumption that those with mental illness tend to commit more violent crimes. Law enforcement agents may be called in as first responders for cases of mental distress; and due to a lack of mental health facilities, resources, and pervasive misconceptions about this population, those with mental illness often end up in the corrections system. In this environment, students in Criminology and Criminal Justice are likely to encounter those with mental illness in their future career paths, and need to be prepared for this reality. This timely work covers the roles of each part of the criminal justice system interacting with mentally ill individuals, from law enforcement and first responders, social services, public health services, sentencing and corrections, to release and re-entry. It also covers the crucial topic of mental health for criminal justice professionals, who suffer from high rates of job stress, PTSD, and other mental health issues. The final section of the book includes suggestions for future research. This

work will be of interest to students of criminology and criminal justice with an interest in working in the professional sector, as well as those in related fields of sociology, psychology, and public health. It will also be of interest to policy-makers and practitioners already working in the field. The overall goal of this work is to inform, educate, and inspire change.

### **Women and Weapons in the Viking World Leszek**

Gardela, 2021-11-30 The Viking Age (c. 750–1050 AD) is conventionally seen as a tumultuous time when hordes of fierce warriors from Scandinavia wreaked havoc across the European continent and when Norse merchants travelled to distant corners of the world in pursuit of slaves, silver, and exotic commodities. Until relatively recently, archaeologists and textual scholars had the tendency to weave a largely male-dominated image of this pivotal period in world history, dismissing or substantially downplaying women's roles in Norse society. Today, however, there is ample evidence to suggest that many of the most spectacular achievements of Viking Age Scandinavians - for instance in craftsmanship, exploration, cross-cultural trade, warfare and other spheres of life - would not have been possible without the active involvement of women. Extant textual sources as well as the

perpetually expanding corpus of archaeological evidence thus demonstrate unequivocally that both within the walls of the household and in the wider public arena women's voices were heard, respected and followed. This pioneering and lavishly illustrated monograph provides an in-depth exploration of women's associations with the martial sphere of life in the Viking Age. The multifarious motivations and circumstances that led women to engage in armed conflict or other activities whereby weapons served as potent symbols of prestige and empowerment are illuminated and interpreted through an interdisciplinary approach to medieval literature and archaeological evidence from Scandinavia and the wider Viking world. Additional cross-cultural excursions into the lives and legends of female warriors in other past and present cultural milieus - from the Asiatic steppes to the savannas of Africa and European battlefields - lead to a nuanced understanding of the idea of the armed woman and its embodiments in Norse literature, myth and archaeological reality.

**Mirror's Truth** Michael R. Fletcher, 2017 Bedeckt defined himself by the list of crimes he was unwilling to commit. It was such a short list. How could straying from it have gone so wrong? Now Bedeckt must undo the damage caused by wandering from

his precious list. The Geborene god seeks to remake the world with his obsessive need for cleanliness and perfection, but Bedeckt is going to bring him down. Nothing can stop him. Not even death. The two friends he abandoned in the Afterdeath chase after Bedeckt, bent on revenge. Psychotic assassins hunt him. Something cold and evil follows, lurking in the clouds above, shredding reality with its delusions. Madness and sanity war, stretching and tearing the very fabric of existence. The dead shall rise.

**Ghosts of Tomorrow** Michael R Fletcher, 2017-02-19 The children are the future. And someone is turning them into highly trained killing machines. Straight out of school, Griffin, a junior Investigations agent for the North American Trade Union, is put on the case: Find and close the illegal creches. No one expects him to succeed, Griffin least of all. Installed in a combat chassis Abdul, a depressed seventeen year old killed during the Secession Wars in Old Montreal, is assigned as Griffin's Heavy Weapons support. Nadia, a state-sanctioned investigative reporter working the stolen children story, pushes Griffin ever deeper into the nightmare of the black market brain trade. Deep in the La Carpio slums of Costa Rica, the scanned mind of an autistic girl runs the South American

Mafia's business interests. But she wants more. She wants freedom. And she has come to see humanity as a threat. She has an answer: Archaeidae. At fourteen, he is the deadliest assassin alive. Two children against the world. The world is going to need some help.

Behold a Pale Horse William Cooper, 2012-04-11 Bill Cooper, former United States Naval Intelligence Briefing Team member, reveals information that remains hidden from the public eye. This information has been kept in Top Secret government files since the 1940s. His audiences hear the truth unfold as he writes about the

assassination of John F. Kennedy, the war on drugs, the Secret Government and UFOs. Bill is a lucid, rational and powerful speaker who intent is to inform and to empower his audience. Standing room only is normal. His presentation and information transcend partisan affiliations as he clearly addresses issues in a way that has a striking impact on listeners of all backgrounds and interests. He has spoken to many groups throughout the United States and has appeared regularly on many radio talk shows and on television. In 1988 Bill decided to talk due to events then taking place worldwide, events which he had seen plans for back in the early '70s. Since Bill has been talking, he has correctly predicted the lowering of the Iron Curtain, the fall of the Berlin Wall and the invasion of Panama. All Bill's predictions were on record well before the events occurred. Bill is not a psychic. His information comes from Top Secret documents that he read while with the Intelligence Briefing Team and from over 17 years of thorough research. Bill Cooper is the world's leading expert on UFOs. -- Billy Goodman, KVEG, Las Vegas. The onlt man in America who has all the pieces to the puzzle that has troubled so many for so long. -- Anthony Hilder, Radio Free America William Cooper may be one of America's greatest heros, and this story may be the biggest story

in the history of the world. -- Mills Crenshaw, KTALK, Salt Lake City. Like it or not, everything is changing. The result will be the most wonderful experience in the history of man or the most horrible enslavement that you can imagine. Be active or abdicate, the future is in your hands. -- William Cooper, October 24, 1989.

Focusing on twenty major obstacles to effective time management, a guide to using time well offers practical solutions to the problem.

Making Sense Sam Harris, 2020-08-11 A New York Times New and Noteworthy Book From the bestselling author of *Waking Up* and *The End of Faith*, an adaptation of his wildly popular, often controversial podcast “Sam Harris is the most intellectually courageous man I know, unafraid to speak truths out in the open where others keep those very same thoughts buried, fearful of the modish thought police. With his literate intelligence and fluency with words, he brings out the best in his guests, including those with whom he disagrees.” -- Richard Dawkins, author of *The Selfish Gene* “Civilization rests on a series of successful conversations.” —Sam Harris Sam Harris—neuroscientist, philosopher, and bestselling author—has been exploring some of the most important questions about the human mind, society, and current events on

his podcast, *Making Sense*. With over one million downloads per episode, these discussions have clearly hit a nerve, frequently walking a tightrope where either host or guest—and sometimes both—lose their footing, but always in search of a greater understanding of the world in which we live. For Harris, honest conversation, no matter how difficult or controversial, represents the only path to moral and intellectual progress. This book includes a dozen of the best conversations from *Making Sense*, including talks with Daniel Kahneman, Timothy Snyder, Nick Bostrom, and Glenn Loury, on topics that range from the nature of consciousness and free will, to politics and extremism, to living ethically. Together they shine a light on what it means to “make sense” in the modern world.
