**American Political Discourse on China** Michelle Murray Yang,2017-06-14 Despite the U.S. and China's shared economic and political interests, distrust between the nations persists. How does the United States rhetorically navigate its relationship with China in the midst of continued distrust? This book pursues this question by rhetorically analyzing U.S. news and political discourse concerning the 2008 Beijing Olympic Games, the 2010 U.S. midterm elections, the 2012 U.S. presidential election, and the 2014-2015 Chinese cyber espionage controversy. It finds that memory frames of China as the yellow peril and the red menace have combined to construct China as a threatening red peril. Red peril characterizations revive and revise yellow peril tropes of China as a moral, political, economic and military threat by imbuing them with anti-communist ideology. Tracing the origins, functions, and implications of the red peril, this study illustrates how historical representations of the Chinese threat continue to limit understanding of U.S.-Sino relations by keeping the nations' relationship mired in the past.

**The 'War on Terror', State Crime & Radicalization** Shamila Ahmed,2020-04-22 This book examines the 'war on terror' and radicalization from an ontological, non-state centric perspective. Since 9/11, criminology has developed in its study of terrorism, utilising alternative non-state centric frameworks to uncover and make visible state-initiated harm. Although progress has been achieved, criminology has continued to privilege the state, thereby failing to uncover forms of state crime and how such crimes facilitate radicalization and terrorism. Ahmed aims to rectify this gap by demonstrating how crimes of the state have contributed to the existence of Islamist-inspired terrorism and the emergence of global Jihadist organisations like Al-Qaeda and ISIS. The 'War on Terror' abandons the dominant socially-constructed discourse and application of the 'war on terror' and instead favours a grounded approach whereby actors, actions and consequences are analysed according to the risk they represent. Ahmed achieves this grounded approach through situating state practices in international human rights law and international humanitarian law. Through documenting the intersectionality of these practices with radicalization in the emergence of global Jihadist organisations, the book demonstrates how state crimes contribute to terrorism. Although the book sits at the intersections of critical criminology, state crime, international/transnational crime, it is relevant to all disciplines that are concerned with state crime, terrorism and radicalization.

*Engaging the Private Sector and Developing Partnerships to Advance Health and the Sustainable Development Goals* National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Global Health,Forum on Publicâ"Private Partnerships for Global Health and Safety,2017-11-23 In September 2015, the Sustainable Development Goals (SDGs) were adopted at the United Nations Development Summit to serve as a 15-year plan of action for all countries and people. The SDGs include 17 specific goals, and 169 associated targets that set out quantitative objectives across the social, economic, and environmental dimensions of sustainable development, all to be achieved by 2030. Health has been recognized as crucial for sustainable human development and an essential contributor to the economic growth of society. Beyond the goal to ensure healthy lives and promoting well-being for all at all ages, many of the other SDGs include targets that are essential to address the environmental and social determinants of health. Considering this context, the Forum on Publicâ€Private Partnerships for Global Health and Safety convened a workshop series to examine potential opportunities to engage the private sector and develop partnerships to advance health and the SDGs. This publication summarizes the presentations and discussions from the workshop series.

*The Disobedient Museum* Kylie Message,2017-09-22 The Disobedient Museum: Writing at the Edge aims to motivate disciplinary thinking to reimagine writing about museums as an activity where resistant forms of thinking, seeing, feeling, and acting can be produced, and to theorize this process as a form of protest against disciplinary stagnation. Drawing on a range of cultural, theoretical, and political approaches, Kylie Message examines potential links between methods of critique today and moments of historical and disciplinary crisis, and asks what contribution museums might make to these, either as direct actors or through activities that sit more comfortably within their institutional remit. Identifying the process of writing about museums as a form of activism, that brings together and elaborates on cultural and political agendas for change, the book explores how a process of engaged critique might benefit museum studies, what this critique might look like, and how museum studies might make a contribution to discourses of social and political change. The Disobedient Museum is the first volume in Routledge's innovative 'Museums in Focus' series and will be of great interest to scholars and students in the fields of Museum, Heritage, Public History, and Cultural Studies. It should also be essential reading for museum practitioners, particularly those engaged with questions about the role of museums in regard to social activism and contentious contemporary challenges.

Contemporary Parenting and Parenthood Michelle Y. Janning,2018-11-16 Headlines from news sources are combined with the latest and best social science research to offer scholars, practitioners, and parents a much-needed source for understanding contemporary American parenthood. News and social media headlines abound with contradictory stories about parents, from tales of neglect to fear of helicopter parenting. What readers know about parenting and parenthood can stem from misinformation and oversimplification. In Contemporary Parenting and Parenthood, a wide variety of contributors share research on topics ranging from international

adoption to technology to talking with children about racial issues. Scholars, students, parents, and practitioners alike will find that this book breaks new ground in terms of its timely approach, its spotlight on current topics, and its attention to thinking through exaggerated and conflicting media claims about contemporary parenting. Importantly, the book focuses on both parenting, the lived experiences of parents, and parenthood, the social and cultural construction of parenthood in today's world, making it a resource for those interested in the truth of the everyday lives of American parents.

*The Artist in the Machine* Arthur I. Miller,2020-11-10 An authority on creativity introduces us to AI-powered computers that are creating art, literature, and music that may well surpass the creations of humans. Today's computers are composing music that sounds “more Bach than Bach,” turning photographs into paintings in the style of Van Gogh's *Starry Night*, and even writing screenplays. But are computers truly creative—or are they merely tools to be used by musicians, artists, and writers? In this book, Arthur I. Miller takes us on a tour of creativity in the age of machines. Miller, an authority on creativity, identifies the key factors essential to the creative process, from “the need for introspection” to “the ability to discover the key problem.” He talks to people on the cutting edge of artificial intelligence, encountering computers that mimic the brain and machines that have defeated champions in chess, Jeopardy!, and Go. In the central part of the book, Miller explores the riches of computer-created art, introducing us to artists and computer scientists who have, among much else, unleashed an artificial neural network to create a nightmarish, multi-eyed dog-cat; taught AI to imagine; developed a robot that paints; created algorithms for poetry; and produced the world's first computer-composed musical, *Beyond the Fence*, staged by Android Lloyd Webber and friends. But, Miller writes, in order to be truly creative, machines will need to step into the world. He probes the nature of consciousness and speaks to researchers trying to develop emotions and consciousness in computers. Miller argues that computers can already be as creative as humans—and someday will surpass us. But this is not a dystopian account; Miller celebrates the creative possibilities of artificial intelligence in art, music, and literature.
