Cycling the North Coast 500 Mike Wells,2024-02-15 This guidebook describes a 528-mile cycling route in northern Scotland.

Starting and finishing in the highland capital Inverness, the circular route passes through the ancient counties and districts of Wester Ross, Sutherland, Caithness, Easter Ross and the Black Isle and is suitable for all types of bike: the going is entirely on asphalt-surfaced roads, though many are quiet with little traffic. The circuit can be comfortably completed in a fortnight. Featuring clear and concise route description, together with 1:150,000 mapping, gradient profiles, suggested schedules and invaluable practical information - including complete lists of all hostel/bunkhouse accommodation, official campsites and services for cyclists and advice on other accommodation and refreshment opportunities, this guidebook provides all the information needed to plan and execute a terrific cycle tour. Alternative routes are provided in case you should wish to avoid the steep ascent of Bealach na Bà or the undulating Assynt peninsula, or to include the busier A9 east coast road. The route boasts stunning scenery and rich historical interest and cyclists will be treated to mile upon mile of unspoilt wilderness. The journey takes in varied landscapes of craggy mountains, verdant glens, rolling peat moorland dotted with lochs and wild rugged coastlines - and if the scenery isn't enough, there are many distilleries and micro-breweries on or near the route guaranteed to entice. With notes on history, geology, wildlife and local points of interest, the guide offers a perfect way to get to know Scotland's captivating far north.

Tourism and Sustainable Community Development Greg Richards,Derek R. Hall,2003 As the tourist industry becomes increasingly important to communities around the world, the need to develop tourism sustainably has also become a primary concern. This collection of international case-studies addresses this crucial issue by asking what local communities can contribute to sustainable tourism, and what sustainability can offer local communities. Individually these investigations present a wealth of original research and source material. Collectively the book illuminates the term 'community', the meaning of which, it is argued, is vital to understanding how sustainable tourism development can be implemented in practice.

EBOOK: Transport, Environment And Society Michael Cahill,2010-02-16 I have no hesitation in suggesting that it should be required reading for students of transport studies and social policy if for no other reason than because it provides an excellent overview of a particular perspective on transport and the consequences of automobility for particular groups. Justin Spinney, University of East London, UK It is an excellent and comprehensive means of providing an introduction to those not familiar with social issues associated with contemporary transport....this reviewer recommends this book as an essential reading for all involved in the social policy field, not just students. Graham Currie, Monash University, Australia This topical book examines the consequences of our car-based transport system for social policy. Readers are introduced to the complexity of the relationship between transport and society together with the debates about the social inequalities produced by the transport system and the connection between social inequality, social exclusion and transport disadvantage. The social inequalities which result from the ways we travel are related to key areas of social policy. The book also traces the move from public to private transport during the last half century in the UK. Adopting a lifecourse approach Transport, Environment and Society demonstrates the impact of car dependence on children, adults, disabled people and older people, demonstrating the ways in which transport and mobility policy have changed perceptions of freedom, risk and safety. Throughout the book, the environmental impact of transport is kept to the fore. Reviewing the evidence on the social impact of transport the book discusses the ways in which a sustainable transport policy could emerge and argues that questions of mobility and transport should be integral to social policies which are concerned with environmental and social justice. The book assumes no previous knowledge of transport or transport policy and outlines the roles and functions of the relevant departments and agencies. Written primarily for social science students, Transport, Environment and Society is also key reading for environmental studies and transport studies students who need to understand the impact of transport on society.

Cycling & Walking for Regional Development Paolo Pileri,Rossella Moscarelli,2020-08-28 This book investigates why and how cycle and walking paths can help to promote the regeneration of marginalized areas facing depopulation and economic decline. In addition, it offers a broad overview of recent scientific research into slow tourism and marginality/spatial inequality and explores the linkages between these topics. Key issues are addressed by experts from various disciplinary backgrounds, and potential measures are proposed for the integration of slow tourism into strategies for regional development. Particular attention is devoted to the VENTO project, which involves the creation of a 700-km-long cycle route from Venice to Turin that passes through various rural and marginalized areas of northern Italy. The goal, research process, design, and early lessons from this important project are all discussed in detail. Moreover, the book describes policies and strategies that have successfully been used to enhance the slow tourism infrastructure in other European countries. Given its scope, the book will appeal to researchers, professionals, and students interested in e.g. policymaking, tourism planning, regional development, and landscape and urban planning.
