Advances in Robotics Research: From Lab to Market Antoni Grau,Yannick Morel,Ana Puig-Pey,Francesca Cecchi,2019-09-17 In this book Part I presents first an overview of the ECHORD++ project, with its mission and vision together with a detailed structure of its functionalities and instruments: Experiments, Robotic Innovation Facilities and Public end-user Driven Technology Innovation PDTI. Chapter 1 explains how the project is born, the partners, the different instruments and the new concept of cascade funding projects. This novelty made ECHORD++ a special project along the huge number of research groups and consortia involved in the whole project. So far, it is the European funded project with more research team and partners involved in the robotic field. In Chapter 2, one of the instruments in ECHORD++ is explained in detail: RIF. Robotic innovation facilities are a set of laboratories across Europe funded with the project with the goal of hosting consortia involved in any experiment that have special needs when testing their robotic research. In the chapter the three different and specific RIFs will be described and analyzed. Chapter 3 explains an important instrument in ECHORD++: the Experiments. In this part, a big number of research groups have been involve in short time funded research projects. The chapter explains the management of such Experiments, from the call for participation, the candidate's selection, the monitoring, reviews and funding for each of the 36 experiments funded for Echord. Chapter 4 is very special because it presents the innovation of funding public end-user driven technology, in particular, robotic technology. Program Management Ginger Levin,2012-08-29 Program management is a rapidly emerging offshoot of project management. So much so that AT&T, IBM, and other organizations, both large and small in all sectors, have initiated a push to certify program managers. And, although universities offer courses in program management, there are few books available to guide program managers through this field that requires a broad level of knowledge and experience. The definitive reference on program management, Program Management: A Life Cycle Approach provides this much needed guidance. Edited by Dr. Ginger Levin, the second person to become a PMI® certified program manager (PgMP®), this handbook presents a cohesive compilation of program management knowledge from more than 20 certified PgMPs. It considers the entire program life cycle and its phases—from initiation to sustainability. Each chapter is written by an experienced PgMP from a wide range of industries and countries. Combining the rigor of an academic reference with easy-to-read language, the book covers the themes in the PMI Standard for Program Management and ties them to program managers' work. The chapters reference PMI's standards, complement the concepts in the standards, and expand on the concepts and issues that the standard mentions in passing. The book also addresses a few issues that the standard does not touch on at all. The book can be read in its entirety, or specific chapters of interest can be read separately. Overall, the book provides practitioners with a reliable source of information on the key themes and issues in program management. It is useful for individuals desiring to attain the PgMP credential and suitable for colleges and universities offering courses in program management.

Blockchain Consortiums - A Comprehensive Handbook Varun Singhi, Murthy Chitlur, Srinivas Mahankali,2020-11-21 The promise of what Blockchain can offer businesses has evolved from a cryptocurrency payment gateway platform to something bigger and truly a game-changer.

Blockchain can be a transformative technology for many businesses as it has the potential to drive a distributed and decentralized way of re-imagining processes and business models. As an inter-organizational paradigm, Blockchain enables cooperation, collaboration, coordination, and communication between hitherto untrusted entities, unknown to each other. And, the best way to participate in this revolution is by being a part of a consortium of eco-system players. Joining a Blockchain consortium raises many questions in the minds of member organisations as this is a relatively new phenomenon. While searching for accurate, ground-level, unbiased and business-oriented information to answer the above questions, we realized that there is no single repository or detailed guide that gives complete information on the best practices of Blockchain consortiums. It was to address these lacunae that we put together this handbook for Blockchain practitioners and business leaders, to help them plan their participation in a holistic way – by cutting through the hype and focusing on the core value propositions that Blockchain consortiums may unlock for their organizations.
