Handbook of Cosmetic Science H. W. Hibbott, 2016-06-06 Handbook of Cosmetic Science: An Introduction to Principles and Applications is a guidebook that aids in addressing several areas of concerns in cosmetic science. The book is comprised of 24 chapters that cover the wide spectrum of issues in cosmetics, from application of products up to the proper handling and packaging of cosmetic products. The text first discusses the importance of the body surfaces to which perfumes and cosmetics are applied such as the skin, hair, and teeth. Next the book deals with the chemistry of the raw materials that are processed in the cosmetics industry. The next chapters cover the formulation, production, and packaging of cosmetic products, along with product evaluation and measures to prevent damage to the goods. The text will be of great use to individuals involved in the research, development, production, and application of cosmetic products.

Delivery System Handbook for Personal Care and Cosmetic Products Meyer Rosen, 2005-09-23 Novel delivery systems designed to facilitate the use of fountain of youth and other functional actives is an idea whose time has come. In a rapidly growing global market eager for products that really work, accelerating market pull forces and technology push have set the stage for this foundation text. This must have book has been carefully designed for training, development and synergistic technology transfer across the personal care, cosmetic and pharmaceutical industries. It is not only intended for scientists and technologists but will also be of high interest to market development and business personnel. This book will cause a breakthrough in effective interaction among technology and marketing. It is a showcase for understanding, using and marketing the technology of why and how delivery systems work as well as current, emerging/potential applications and working formulations. Each chapter is written by one or more experts in the field. A wide range of companies serving the global marketplace are represented. These companies offer numerous types of delivery systems containing highly desirable functional actives, delivery system technology development services, and opportunities for technology licensing, mergers and acquisitions. A unique feature of the book is the use of Mind Map technology to capture and present the essence of the thinking of over 80 authors in a Book-at-a-Glance Executive Overview section. This section has been specifically designed to empower decision making leading to the development of innovative product differentiation in a global context.

Coloring the Cosmetic World Edwin B. Faulkner, 2021-06-11 A comprehensive resource on the regulations, applications, properties and processing of pigments used in color cosmetics, now in its second edition. Coloring the Cosmetic World is a highly practical guide to colorant selection for product formulations in the modern cosmetics and toiletries industry. Providing the essential knowledge required to successfully incorporate pigments into cosmetic formulations, this unique resource covers all essential aspects of color selection—including regulations, economics, color esthetics, and stability—as well as processing, color measurement, pigment testing, natural colorants, and more. This new edition contains carefully revised content and includes updated coverage of economic and regulatory criteria. Drawing upon their decades of experience in the color industry, the author and editor focus on the specific color additives that are approved for use in cosmetics formulations. The book's twelve in-depth chapters include full mass representations of numerous pigments to help readers appreciate subtleties and differences in absorption pigments, effect pigments, specialty pigments, and others. Appendices contain various pigment test methods, a glossary, and an up-to-date listing of treated pigment patents. Covering the chemistry, regulations, evaluation, processing, and properties of worldwide cosmetic pigments, this one-of-a-kind book: Covers the common pigments used in lipsticks, face makeup, eye shadow, mascara, nail lacquer, and other color cosmetics Provides detailed information on a variety of specific pigments, including their chemical properties, esthetic quality, and application in a wide range of products Discusses regulatory considerations and the economics of selecting colors for use in different decorative cosmetics Highlights practical concerns such as colorants' stability, interactions with other chemicals, manufacturing conditions, and packaging Explains how the effects of heat, light, pH, humidity, and other environmental factors inform pigment selection for different product types and use cases Coloring the Cosmetic World: Using Pigments in Decorative Cosmetic Formulations, Second Edition, is an indispensable guide for cosmetic chemists, a useful reference for purchasing agents, supply coordinators, and marketers working in the cosmetics industry, and a valuable supplementary text for undergraduate and graduate university programs in the field.
