**My Buddy Bill** Rick Cleveland,2010 THE STORY: On a visit to the White House, a dog-loving screenwriter reprimands Buddy, the First Dog, for piddling on the Oval Office rug. Little does he know that this canine interaction will spark a lasting friendship with President Clinton and gi

**Churchill, Roosevelt & Company** Lewis E. Lehrman,2017-01-30 During World War II the “special relationship” between the United States and Great Britain cemented the alliance that won the war. But the ultimate victory of that partnership has obscured many of the conflicts behind Franklin Roosevelt’s grins and Winston Churchill’s victory signs, the clashes of principles and especially personalities between and within the two nations. Synthesizing an impressive variety of sources from memoirs and letters to histories and biographies, Lewis Lehrman explains how the Anglo-American alliance worked--and occasionally did not work--by presenting portraits and case studies of the men who worked the back channels and back rooms, the secretaries and under secretaries, ambassadors and ministers, responsible for carrying out Roosevelt’s and Churchill’s agendas while also pursuing their own and thwarting others’. This was the domain of Joseph Kennedy, American ambassador to England often at odds with his boss; spymasters William Donovan and William Stephenson; Secretary of State Cordell Hull, whom FDR frequently bypassed in favor of Under

Secretary Sumner Welles; British ambassadors Lord Lothian and Lord Halifax; and, above them all, Roosevelt and Churchill, who had the difficult task, not always well performed, of managing their subordinates and who frequently chose to conduct foreign policy directly between themselves. Scrupulous in its research and fair in its judgments, Lehrman's book reveals the personal diplomacy at the core of the Anglo-American alliance.

**Strength and Drive** Robert A. Doughty, 2014-12-18 The Class of 1965 entered the Military Academy in July 1961. As cadets, they received a traditional West Point education but also studied new fields such as computers and nuclear physics. Upon graduation, members of the class received numerous national scholarships, including one Rhodes scholarship. During the Vietnam War members of the class received no less than one Medal of Honor, four Distinguished Service Crosses, one Air Force Cross, 94 Silver Stars, 5 Soldier's Medals, 175 Bronze Stars with V device for valor, and 129 Purple Hearts. In later years, members of the class served with distinction in Grenada, Panama, Iraq, and elsewhere. They became leaders in transforming the army after the Cold War into a much leaner, more agile, technologically advanced force. Those who left the service, whether after four years in uniform or more, contributed to the nation in a similarly impressive manner. As civilians they excelled in numerous fields and exhibited as much patriotism and Strength and Drive as those still in uniform. Whether in uniform or not, members of the class of 1965 served their communities and nation and never lost sight of the meaning of West Point's motto: Duty, Honor, Country.

*Women and Pressure* Caroline E. Fife, Marguerite St. Leger Dowse, 2010-01-01 *Women and Pressure* is a remarkable look at women's progress in the fields of diving and altitude. With content ranging from the history of women divers, combat pilots, and astronauts to the unique physiological characteristics of females working and playing in altered barometric pressure environments, this book is long overdue. Featuring contributions from 35 authors, many of whom are pioneers in their field, it represents a wide range of disciplines and offers a comprehensive dialogue about the effects of pressure on women. This book is a must-read for women divers, dive instructors, men who dive with women, and anyone involved in these fields. As an admirable collection of the current research and attitudes regarding the most frequent concerns of divers, instructors, and aviators, topics are explored on a level of seriousness and urgency. The essays included in this text contain crucial discussions of such relevant factors as: pregnancy, the menstrual cycle and decompression illness, decompression illness susceptibility compared with men, fitness to dive, thermal tolerance, equipment, legal issues, and women in the workplace. The pool of information in this book displays the serious nature of a text addressing the past, present, and future of issues of consequence in relation to the well-being of the women involved. From the Foreword: It is obviously important to have a good understanding of how women's physical and psychological responses might differ from those experienced by men. I believe that this book is a scholarly attempt to answer these questions, and I hope that it will make a valuable contribution to the health and welfare of women engaged in these highly specialized occupations. -HRH Prince Philip, Duke of Edinburgh Over the years, different data, theories, and hypotheses have been proffered, but there has never been an authoritative compendium on these issues. . . This is perhaps the only work in existence that, in one place, provides physicians, physiologists, and other interested dive and aerospace

professionals with what's broadly known about the subject of women in diving and aerospace. -Karl Shreeves, The Undersea Journal, 2010 Proceeds from this book will go to the Diving Diseases Research Center to support further diving research.

**America's Failure in Iraq** Michael M. O'Brien, 2010

America's Failure In Iraq (402 pages, 198 photographs, 2 maps), explores the involvement of the United States in Iraq beginning with the Gulf War of 1991, under the 'leadership' of President George H.W. Bush and Colin Powell. It continues through the post-war years of the impotent United Nations sanctions that destroyed the Iraqi economy, the events of September 11, 2001, and the ineptitude of our nation's senior leadership, that culminated with the US invasion of Iraq in the spring of 2003. The termination of the Gulf War was one of the worst political-military decisions of modern times. But the invasion of Iraq by his son 12 years later led the United States into a 'mini-Vietnam' scenario that has split our nation down the middle again.

Neurogenesis Research Advances Martina P. Klausen, 2008

Neurogenesis, or the birth of new neuronal cells, was thought to occur only in developing organisms. However, recent research has demonstrated that neurogenesis does indeed continue into and throughout adult life. On going neurogenesis is thought to be an important mechanism underlying neuronal plasticity, enabling organisms to adapt to environmental changes and influencing learning and memory throughout life. A number of different factors that regulate neurogenesis have been identified. Physical activity and environmental conditions have been known to affect proliferation and survival of neurons. Hormones have also been found to influence the rate of neurogenesis in vertebrates (e.g. testosterone) and invertebrates (eg: ecdysone). Serotonin is believed to play a key role in neurogenesis.

**On the Wings of Hope** D.G. Waugh, 2011-10-31 This book contains three stimulating stories of human struggles. Miriam struggle as she takes care of her young nephew, Johnny, whose father, Paul Simeon she suspects of being responsible for her sister's untimely death. Her sister's last letter indicated that there was enough information to have Paul and his gang arrested. She cringes while watching Johnny act nervous and edgy when he is around his father. What does that child know, she asks herself. Is her new friend, Mrs. Worth justified in believing that Paul and his co-hort, Stubby are planning to get rid of both of them? The second book, *Dont Wake a Sleeping Lion* has Esther struggling with trying to find a way to escape from her kidnappers. She and her co-worker were on the trail of a series of missing persons. How do they handle the death of one of their members as he is found beaten until he is almost not recognized? The third book is

The second part of Beth has her grown up into a teen and she and the boy next door are praying for each other. God is good...all the time

*The Big Conspiracy* Folasade Odutola,2013-05-20 Aviation safety is of global concern. This book is about one person's experience as a non-hypocritical safety regulator in a challenging environment. The author has found her amazing career experience interesting to share. The hazards of playing politics and being hypocritical with safety regulation are clearly reflected in this book. From the human angle, it shows the ugly face of office politics and power play and their detrimental effects on those at the receiving end. The rather slow pace of progress in the aviation regulatory entity since the author's ordeal and her subsequent forceful retirement is a lesson in why responsible authorities shouldn't be cutting their noses to spite their faces.
