Film Festivals Cindy Hing-Yuk Wong, 2011-08-29 Movies, stars, auteurs, critics, and the sheer excitement of cinema come together in film festivals as quintessential constellations of art, business, and glamour. Yet, how well do we actually understand the forces and meanings that these events embody? Film Festivals offers the first comprehensive overview of the history, people, films, and multiple functions of the festival world. From Sundance to Hong Kong, from the glitter of Cannes to edgier festivals that challenge boundaries or foster LGBTQ cultural production, film festivals celebrate art, promote business, bring cinema to diverse audiences, and raise key issues about how we see our world. Cindy Hing-Yuk Wong situates festivals within changing global practices of film, including their important ties to both Hollywood and independent cinema. She explores how these events have become central in the construction of cinema knowledge as well as the behind-the-scene mechanics of finance, distribution, and evaluation. By linking general structures and connections to specific films and auteurs, Wong addresses the components and creation of film festivals that continue to reshape filmmaking as art and business.

Events, Places and Societies Nicholas Wise, John Harris, 2019-03-21 Events can be synonymous with a particular place, helping shape and promote a location. Given the rise of the global events industry, this book uncovers how events impact upon places and societies, looking at a range of

different events and geographical scales. Geographers are concerned with how notions of space and place impact people, communities and identity, and events have played a central role in how places are perceived, consumed and even contested. This book will discuss international event cases to frame knowledge around the increased demands, pressures and complexities that globalisation, transnationalism, regeneration and competitiveness has put on events, places and societies. Integrating discussions of theory and practice, this book will explore the range of conceptual perspectives linked to how geographers and sociologists understand events and the role events play in contemporary times. This involves recognizing histories and planning strategies, the purpose of bidding for an event or the local meanings that have emerged and changed in the place. This helps us analyse how events have the potential to redefine place identities. This international edited collection will appeal to academics across disciplines such as geography, planning and sociology, as well as students on events management and events studies courses.
