Monsters Under the Bed and Other Childhood Fears Stephen W. Garber, Ph.D.,Robyn Freedman Spizman,Marianne Daniels Garber,2011-04-13 A step-by-step manual designed to help parents cope with children's fears; *Monsters Under the Bed and Other Childhood Fears* discusses common fears, how to respond to childhood anxieties, and other ways to deal with frightened children. “With the culture getting scarier and parents getting busier, there is a growing need to help parents understand and cope with childhood fears. This thoughtful and practical work fulfills that need extraordinarily well.”—Stan and Jan Berenstain, authors of *The Berenstain Bears* children's book series This book is about how to respond to your child's fears. Most children experience fears of the dark, strangers, unidentified noises, and numerous other things for a short time and then they pass. By supporting your child and filling in the gaps in her knowledge, you can minimize most of the normal childhood fears many children experience. By preparing your child in advance for the new situations she must meet, you may be able to avoid new fears.—From the Introduction Praise for *Monsters Under the Bed* “The authors of *Monsters Under the Bed* have created a great resource for parents to help their children. The fun part is that some of the basic wisdom in this book may also apply when the occasional wayward monster slips under an adult bed.”—Sheryl Leach, president of The Lyons Group, creator of Barney “Fears often annoy, disturb, and sometimes even prevent a child from enjoying childhood. At no time are fears a laughing matter. This book offers parents a variety of clever suggestions on how to help their child 'slay' the ubiquitous monsters that lurk under the bed, in the hall, and outside the window. Today's concerned but busy parents will appreciate the straightforward yet family-oriented language of this book.”—Ted Ayllon, Ph.D., professor of psychology and special education, Georgia State University; author, with Mori Freed, of *Stopping Baby's Colic*

Insects Tedd Arnold,2015 During a nature walk, Fly Guy and Buzz learn all about the different types of insects, their life cycles, what they eat, and which ones are dangerous to humans.

I, Fly Bridget Heos,2015-05-12 Fly is fed up with everyone studying butterflies. Flies are so much cooler! They flap their wings 200 times a second, compared to a butterfly's measly five to twelve times. Their babies-maggots-are much cuter than caterpillars (obviously). And when they eat solid food, they even throw up on it to turn it into a liquid. Who wouldn't want to study an insect like that? In an unforgettably fun, fact-filled presentation, this lovable (and highly partisan) narrator promotes his species to a sometimes engrossed, sometimes grossed-out, class of kids.

Backcountry Flies Steve Kantner,2019-03-01 Florida's coastal fishing has suffered over the years, and more and more anglers are turning toward the inland waters to fish for trophy largemouth bass, peacock bass, snook, baby tarpon, cichlids, and a host of other exotic species. This book is dedicated to fly patterns for these fish and includes step-by-step instructions as well as fishing information.

Norms of Word Association Leo Postman,Geoffrey Keppel,2014-05-10 Norms of Word Association contains a heterogeneous collection of word association norms. This book brings together nine sets of association norms that were collected independently at different times during a 15-year period. Each chapter is a self-contained unit. The order in which the norms are presented is arbitrary, although an attempt is made to group together norms that seem to belong together. The 1952 Minnesota norms are presented first, due to age and in recognition of the fact that a number of the norms that follow are direct outgrowths of this work. The next three norms in this collection are responses to the Russell-Jenkins stimuli obtained from subjects representing different linguistic communities. A summary of association norms collected from British and Australian subjects are reported along with association norms from German and French college students and French workmen. Four sets of norms that are not directly related to the 1952 Minnesota collection are included. The text will be of interest to historians and researchers in the field of verbal learning and verbal behavior.
