Edinburgh Companion to Twentieth-Century British and American War Literature Adam Piette, 2012-03-07 The first reference to literary and cultural representations of war in 20th-century English & US literature and film.Covering the two World Wars, the Spanish Civil War, the Cold War, the Vietnam War, the Troubles in Northern Ireland and the War on Terror, this Companion reveals the influence of modern wars on the imagination. These newly researched and innovative essays connect 'high' literary studies to the engagement of film and theatre with warfare, extensively covers the literary and cultural evaluation of the technologies of war and open the literary field to genre fiction. Divided into 5 sections: 20th-Century Wars and Their Literatures; Bodies, Behaviours, Cultures; The Cultural Impact of the Technologies of Modern War; The Spaces of Modern War & Genres of War Culture. Key Features: * All-new original essays commissioned from major critics and cultural historians. * Reflects the way war studies are currently being taught and researched: in the volume's approach, structure and breadth of coverage. * For scholars: core arguments and detailed research topics. * For students: Historically grounded topicand genre-based essays, useful forstudying the modern period and war modules.

Paul Green, Playwright of the Real South John Herbert Roper, 2003 Drawing on his complete access to Green's papers and on interviews with surviving family members, John Herbert Roper covers all the important aspects of Green's life and career. By word and deed, Paul Green spread the faith of liberalism across the New South, which he insistently called the Real South. Long after literary fashion had left him behind, he wrote daily and remained at the forefront of causes concerning race relations, militarism, women's and workers' rights, and capital punishment.--BOOK JACKET.

Psychotropic Agents ,2012-12-06 The volumes on psychotropic substances in the Handbook of Experimental Phar macology series clearly show that the classical concept of this discipline has become too narrow in recent years. For instance, what substances are psychotropic is determined not by the criteria of the animal trial, i.e. by experimental pharmacology, but by their action on the psy che, which in the final analysis is only accessible to us in man. Psychotropic substances force experimental pharmacology (and thus also this Handbook) outside its tradition allimits, which have essentially depended on animal studies. The antipsychotics and antidepressants were not discovered in animal ex periments, but by chance (or more precisely, by clinical empiricism). Experienced psy chiatrists trained in the observation of patients recognised the efficacy of drugs, the beneficial effect of which nobody had dreamed of before: DELAY and DENICKER in the case of chlorpormazine, KLINE in the case of the monoamine oxidase inhibitors and KUHN in the case of imipramine. It was only after these discoveries that the pharma cologists developed experimental models of the psychoses in animal experiments. However, even today we still do not know with certainty which of the effects shown in animals is relevant for the clinical effect despite the vast abundance of individual investigations. For many years, this uncertainty led to the testing of antipsychotics (e.g. of the neuroleptic type) in models which actually produced the undesired effects.
