Dadibaajim Helen Olsen Agger, 2021-10-01

Dadibaajim narratives are of and from the land, born from experience and observation. Invoking this critical Anishinaabe methodology for teaching and learning, Helen Olsen Agger documents and reclaims the history, identity, and inherent entitlement of the Namegosibii Anishinaabeg to the care, use, and occupation of their Trout Lake homelands. When Agger's mother, Dedibaayaanimanook, was born in 1922, the community had limited contact with Euro-Canadian settlers and still lived throughout their territory according to seasonal migrations along agricultural, hunting, and fishing routes. By the 1940s, colonialism was in full swing: hydro development had resulted in major flooding of traditional territories, settlers had overrun Trout Lake for its resource, tourism, and recreational potential, and the Namegosibii Anishinaabe were forced out of their homelands in Treaty 3 territory, north-western Ontario. Agger mines an archive of treaty paylists, census records, and the work of influential

anthropologists like A.I. Hallowell, but the dadibaajim narratives of eight community members spanning three generations form the heart of this book. Dadibaajim provide the framework that fills in the silences and omissions of the colonial record. Embedded in Anishinaabe language and epistemology, they record how the people of Namegosibiing experienced the invasion of interlocking forces of colonialism and globalized neo-liberalism into their lives and upon their homelands. Ultimately, Dadibaajim is a message about how all humans may live well on the earth.

Indigenous People and Economic Development Katia Iankova, Azizul Hassan, Rachel L'Abbe, 2016-03-22 Indigenous peoples are an intrinsic part of countries like Australia, New Zealand, Canada, Finland, USA, India, Russia and almost all parts of South America and Africa. A considerable amount of research has been done during the twentieth century mainly by anthropologists, sociologists and linguists in order to describe, and document their traditional life style for the protection and safeguarding of their established knowledge,

skills, languages and beliefs. These communities are engaging and adapting rapidly to the changing circumstances partly caused by post modernisation and the process of globalization. These have led them to aspire to better living standards, as well as preserving their uniqueness, approaches to environment, close proximity to social structures and communities. For at least the last two decades, patterns of increased economic activity by indigenous peoples in many countries have been viewed to be significantly on the rise. Indigenous People and Economic Development reveals some of the characteristics of this economic activity, 'coloured' by the unique regard and philosophy of life that indigenous people around the world have. The successes, difficulties and obstacles to economic development, their solutions and innovative practices in business - all of these elements, based on research findings, are discussed in this book and offer an inside view of the dynamics of the indigenous societies which are evolving in a globalised and highly interconnected contemporary world.
