**The End of Shops** Cor Molenaar,2016-03-23 Shops are facing tough times: recession, local legislation, parking problems, competition from the internet and the strong position of suppliers. Buying on the Internet 24/7 has become a real alternative to the local shop with its rigid opening hours and limited choice. So is there still a future for the traditional retailer? What are the latest developments in this environment and how can these be translated into significant business models? Cor Molenaar analyses the struggle and the risks to describe the opportunities and potential for the retail trade to turn the tide. He looks at the new buying behaviour of consumers (the new shopping), the evolution of retail (how it used to be, how it is now and what it has to become) and shows what the future for the shop will actually look like. Shops need to change, to reassess their unique customer appeal and work in new ways with suppliers and customers if they are to survive. Online retailing is often seen as the panacea, but is that really the case? The internet will undergo many changes, too. Many e-retailers will disappear or end up surviving on the margin of the mainstream. Only the most canny suppliers and webshops, those that can make best use of the opportunities offered by the Internet will survive.

**The End of Online Shopping** Jongen Wijnand,1999-01-05 Retail is going through difficult times and is suffering the consequences of both the economic crisis and the digitization of society. Fundamentally, there is a bigger problem: stores cannot keep up with the changing behavior of customers who are connected 24/7, customers for whom there is no distinction between online and offline. The End of Online Shopping: The Future of New Retail in an Always Connected World describes how the smart, the sharing, the circular, and the platform economy are shaping a new era of always connected retail. Retailers urgently need to innovate if they want to stay relevant in a world dominated by marketplaces and sharing platforms. The book contains inspiring examples from different industries -- which include the usual suspects such as Amazon, Alibaba, and Google, but also local startups -- and covers all aspects of the customer journey, from orientation and selection to delivery. The End of Online Shopping provides an excellent overview of shopping trends and developments worldwide, and offers readers indispensable insights into the future of retail.

*The Emotional Life of Money* Mary Cross,2017-09-15 This fascinating book illustrates how human behavior regarding money is triggered by emotion and powered by our psychic makeup, empowering readers to better understand their own behavior and decision making with money. Beyond being an essential medium of exchange, money carries deep psychological significance: having enough of it confers power and status and provides the potential to sustain our lifestyle and fulfill our desires. Not having money triggers a breadth of negative emotions. This book explores the psychological payload money carries and the emotional effects it generates, allowing readers to better understand people's behavior with money and its effects on their own lives. The Emotional Life of Money: How Money Changes the Way We Think and Feel identifies common hang-ups and anxieties about money; summarizes current academic research on money behavior and how people make decisions about their money; discusses the newest branch of economics, behavioral economics; and explores the possibility of the disappearance of cash in the digital future. General readers will be able to comprehend why money has often generated intense feelings of desire, greed, envy, elation, and other emotions, as well as sense of status; and undergraduate students in psychology, economics, and sociology courses will benefit from learning about the latest research on behavior economics and the powerful psychological and emotional effects of money.

**Industrial Organization** Don E. Waldman,Elizabeth J. Jensen,2019-03-04 Industrial Organization: Theory and Practice blends a rigorous theoretical introduction to industrial organization with empirical data, real-world applications and case studies. The book also supports students with a range of problems and exercises, and definitions of key terms and concepts. This balanced approach, which enables students to apply theoretical tools, has earned this book its ranking as one of the leading undergraduate texts in its field. For the fifth edition, relevant data, tables, empirical examples and case studies have been updated to reflect current trends and topics, in the most complete reorganization since the second edition. Further changes include: all public policy topics have been placed in the last section, making it simpler to use for courses that emphasize theory or public policy; an entirely new chapter on international trade and industrial organization; a new chapter on mergers; a separate section on antitrust; a companion website with PowerPoint slides and other supplements. This comprehensive book bridges the gap between economic theory and real-world case studies in an accessible, logical manner, making it the ideal undergraduate text for courses on industrial organization.

**Website Quality and Shopping Behavior** Tereza Semerádová,Petr Weinlich,2020-04-03 This book analyses the impact of web design parameters on user experience and the behaviour of website users. Website design is considered one of the key parameters of a company's Internet presentation, affecting consumer attitudes and buying behaviour. The authors examine the concept of website quality based on the identification of patterns of user behaviour in the online environment, particularly focusing on the functional and aesthetic parameters of web design and causal relationships between them. **From Great to Gone** Peter Lorange, Jimmi Rembiszewski, 2016-04-15 The modern consumer is no longer attracted by single-minded, predictable and one-benefit-focused brand promises. The old-fashioned FMCG communication strategies based on television, radio and print with constant repetition have become outdated. From Great to Gone shows that what's needed are 'Lego' strategies, whereby the marketing and communication strategies are built up by many key facets (like building blocks) and delivered to the consumer through a mix of various touch points. Most importantly, you need to leave consumers to put all of that together themselves. There are major internal and external hurdles to transforming FMCGs successfully into FICGs - Fast Innovating Consumer Goods. It requires new brand strategies and flatter, more top-down than bottom-up, decision-making organisations and a 21st-century model for advertising agencies. Externally these companies need a new route to market through transformation of their old retail dependencies. Changes are also required in all communication delivery, reflecting modern consumers' connectivity and unlimited access to information. In the book the authors showcase what the winners of the 21st century have in common that has enabled them to become FICGs. New, unimagined models continue emerge, to which, with the authors' guidance producers and retailers may develop their own sustainable responses.

**Digital Dieting** Tara Brabazon, 2016-04-22 Imagine if a student spent as much time managing information as celebrities doted on dieting? While eating too much food may be the basis of a moral panic about obesity, excessive information is rarely discussed as a crisis of a similar scale. Obviously, plentiful and high quality food is not a problem if eating is balanced with exercise. But without the skills of media and information literacy, students and citizens wade through low quality online information that fills their day yet does not enable intellectual challenge, imagination and questioning. Digital Dieting: From Information Obesity to Intellectual Fitness probes the social, political and academic difficulties in managing large quantities of low quality information. But this book does not diagnose a crisis. Instead, Digital Dieting provides strategies to develop intellectual fitness that sorts the important from the irrelevant and the remarkable from the banal. In April 2010, and for the first time, Facebook received more independent visitors than Google. Increasingly there is a desire to share rather than search. But what is the impact of such a change on higher education? If students complain that the reading is 'too hard', then one response is to make it easier. If students complain that assignments are too difficult, then one way to manage this challenge is to make the assignments simpler. Both are passive responses that damage the calibre of education and universities in the long term. Digital Dieting: From Information Obesity to Intellectual Fitness provides active, conscious, careful and applicable strategies to move students and citizens from searching to researching, sharing to thinking, and shopping to reading.
