

The Impossible Enigma Lite 161

Gregory Freidin

The Poetic Enigma of Alfred de Vigny Denise Bonhomme,2003 This book is devoted to the veiled message transmitted in the works of famous authors over a period of centuries. Esoteric literature is the massive body of Western and other writings containing a philosophical contraband-ever the same under a deceptive variety of surfaces or veils. In the words of Marcel Proust, the great writers have never done but one work. Alfred de Vigny- a nineteenth century poet, novelist and playwright- belongs to the literary brotherhood involved in the transmission of the concealed message. Rabelais, Voltaire, Anatole France, Ibsen and Proust are only a few of his fellow-smugglers. English and American literatures have their share of such writers. So does the literary heritage of other European nations and of Latin America. This book contains a glossary of major key-words of the verbal algebra used by esoteric writers. Sensitive readers are encouraged to read the biography and the glossary first and the poetry of Vigny next. This will enable some of them to discover by and for themselves the full beauty and depth of the texts. Extraordinary findings await the esoteric readers of the literary production of Vigny. There are hints of the greatness of Atlantis. There is a vast panorama of Time and Space. There are suggestions of a startling view of the inner structure of planet Earth, a view that is also reflected in the various utopias of classical authors. Last but not least, there is the generally unsuspected, radiant reality of the works and the life of Vigny. Please visit: www.degn.org/Bonhomme

Sheela-na-gigs Barbara Freitag,2005-08-15 A study of the mysterious stone carvings of naked females exposing their genitals on medieval churches all over the British Isles.

The Enigma of Isaac Babel Gregory Freidin,2009-10-21 A literary cult figure on a par with Franz Kafka, Isaac Babel has remained an enigma ever since he disappeared, along with his archive, inside Stalin's secret police headquarters in May of 1939. Made famous by *Red Cavalry*, a book about the Russian civil war (he was the world's first embedded war reporter), another book about the Jewish gangsters of his native Odessa, and yet another about his own Russian Jewish childhood, Babel has been celebrated by generations of readers, all craving fuller knowledge of his works and days. Bringing together scholars of different countries and areas of specialization, the present volume is the first examination of Babel's life and art since the fall of communism and the opening of Soviet archives. Part biography, part history, part critical examination of the writer's legacy in Russian, European, and Jewish cultural contexts, *The Enigma of Isaac Babel* will be of interest to the general reader and specialist alike.

Physics of the Impossible Michio Kaku,2008-03-11 NATIONAL BESTSELLER • Inspired by the fantastic worlds of Star Trek, Star Wars, and Back to the Future, the renowned theoretical physicist and national bestselling author of *The God Equation* takes an informed, serious, and often surprising look at what our current understanding of the universe's physical laws may permit in the near and distant future. Teleportation, time machines, force fields, and interstellar space ships—the stuff of science fiction or potentially attainable future technologies? Entertaining, informative, and imaginative, *Physics of the Impossible* probes the very limits of human ingenuity and scientific possibility.

The Voynich Manuscript M. E. D'Imperio,1978 In spite of all the papers that others have written about the manuscript, there is no complete survey of all the approaches, ideas, background information and analytic studies that have accumulated over the nearly fifty-five years since the manuscript was discovered by Wilfrid M. Voynich in 1912. This report pulls together all the information the author could obtain from all the sources she has examined, and to present it in an orderly fashion. The resulting survey will provide a firm basis upon which other students may build their work, whether they seek to decipher the text or simply to learn more about the problem.

The Fourth Dimension Dayalanand Roy,2021 Einstein shocked the world by revealing that time can be different for different observers. This book offers a possible explanation of why it is so. It offers a never-attempted-before approach to understand the secret of time. As we all know, there is an intimate relationship between time and age of objects. But what is this relationship? The author dives deep into the possible relationships between time and age of objects- animate or inanimate- and, in turn, emerges with a novel concept of time- time is a measurement of age. The book proposes that time is acquired by age, not required for it; and thus, time is an acquired property of objects. The author also proposes that just as length, width and height are the measurements of physical extensions of objects (their three spatial dimensions) and not any independent entities; time too, being the measurement of their age, is not independent of objects. In this sense, time seems to be the fourth dimension of objects instead of space. The book attempts to justify its hypothesis by testing its compatibility with Theory of Relativity. Also discussed is the meaning of the so called passage of time and the arrow of time on the basis of the model of time proposed here. The meaning of the much debated concept of time-travel is thoroughly discussed here and it is proposed that this concept, in the sense that we usually take, is a myth. Even if you can manage to reach your future by overcoming all technological limitations (as we all know, theory of relativity allows it), all your friends will be there with you, witnessing the same future. The only difference will be- your clocks will not agree with those of your friends.

Adorno and Modern Theatre K. Gritzner,2016-04-29 Adorno and Modern Theatre explores the drama of Edward Bond, David Rudkin, Howard Barker and Sarah Kane in the context of the work of leading philosopher Theodor W. Adorno (1903-1969). The book engages with key principles of Adorno's aesthetic theory and cultural critique and examines their influence on a generation of seminal post-war dramatists.

Aphorism in the Francophone Novel of the Twentieth Century Mark Bell,1997-03-27 Aphorism in the Francophone Novel of the Twentieth Century includes critical readings of *Terre des hommes* by Antoine de Saint-Exupéry, *Alexandre Chenevert* by Gabrielle Roy, *Gouverneurs de la rosée* by Jacques Roumain, *Pluie et vent sur Télumée* miracle by Simone Schwarz-Bart, *La route des Flandres* by Claude Simon, *Présence de la mort* by C.F. Ramuz, and *Neige noire* by Hubert Aquin. Bell addresses the problems inherent in the term aphorism, the narrative and discourse function of aphorism within the genre of the novel, the interrelation between the structure of aphorism and the epistemological and hermeneutical functions this sub-genre may perform as a component part of the narrative fabric, the national character of aphoristics, and the problems that arise from anthologizing a novel's aphorisms. The importance of aphoristic formulation in the French literary tradition and its undeniable presence in the modern novel make this a particularly significant and fruitful study.

Image Making in Byzantium, Sasanian Persia and the Early Muslim World Anthony Cutler,2023-05-31 Relations between Byzantium and its neighbours are the focus of this volume. The papers address questions of cultural exchange, with special attention to art historical relations as shown by technical, iconographic and diplomatic exchanges. While addressed to specialists, both their approach and the language make these papers accessible to students at all levels.

Stargazing at Noon Amanda Torroni,2019-02-12 In this collection, Amanda Torroni expands on her previously published chapbook, *Stargazing at Noon*, adding over seventy poems and brand-new material. Torroni writes about intimacy, distance, the body, self-doubt, nostalgia, and love—both lost and found. Her poems weave disparate source material into beautiful metaphor; readers are as likely to find Plato and neurological terminology as they are moonlit lovers and broken hearts.

The Seven Mysteries of Life Guy Murchie,1999 All life in all worlds -this was the object of the author's seventeen-year quest for knowledge and discovery, culminating in this book. In a manner unmistakably his own, Murchie delves into the interconnectedness of all life on the planet and of such fields as biology, geology, sociology, mathematics, and physics. He offers us what the poet May Sarton has called a good book to take to a desert island as sole companion, so rich is it in knowledge and insight.
