Selling Through Independent Reps Harold J. Novick,2000 Managing an independent sales force can be a major challenge--but, if it's done right, it can also be a powerful and lucrative sales strategy. Now in its third edition, this classic guide uncovers a wealth of proven tips and strategies for developing and maintaining a successful independent sales force that will dramatically increase sales and profits. The book explains how to: * Decide if an independent rep force is the right choice * Find, hire, and support a highly productive rep group * Integrate reps into a total market segmentation strategy * Manage reps without controlling them, and more. Plus, it includes completely new information on the changing relationships between customers and suppliers--and the impact these changes have had on sales channels.

The Battle for Room 314 Ed Boland,2016-02-09 In this insightfully honest and moving memoir about the realities of teaching in an inner-city school, Ed Boland smashes the dangerous myth of the hero-teacher [and] shows us how high the stakes are for our most vulnerable students (Piper Kerman, author of *Orange is the New Black*). In a fit of idealism, Ed Boland left a twenty-year career as a non-profit executive to teach in a tough New York City public high school. But his hopes quickly collided headlong with the appalling reality of his students' lives and a hobbled education system unable to help them. Freddy runs a drug ring for

his incarcerated brother; Nee-cole is homeschooled on the subway by her brilliant homeless mother; Byron's Ivy League dream is dashed because he is undocumented. In the end, Boland isn't hoisted on his students' shoulders and no one passes AP anything. This is no urban fairy tale of at-risk kids saved by a Hollywood hero, but a searing indictment of schools that claim to be progressive but still fail their students. Told with compassion, humor, and a keen eye, Boland's story is sure to ignite debate about the future of American education and attempts to reform it.

Mobile Social Networking and Computing Yufeng Wang, Jianhua Ma, 2014-09-05 Recent advancements in mobile device technologies are revolutionizing how we socialize, interact, and connect. By connecting the virtual community with the local environment, mobile social networks (MSNs) create the opportunity for a multitude of new personalized services for mobile users. Along with that comes the need for new paradigms, mechanisms, and techniques with the capacity to autonomously manage their functioning and evolution. Currently, most books about mobile networks focus mainly on the technical point of view. **Mobile Social Networking and Computing: A Multidisciplinary Integrated Perspective** not only addresses the theoretical aspects of MSN and computing, but also introduces and categorizes existing applications. It supplies a multidisciplinary perspective that considers the technology, economics, social sciences, and psychology behind MSNs. In addition to fundamental theory, the book investigates the practical issues in MSN, including characteristics, inner structural relationship, incentive mechanisms, resource allocating, information diffusion, search, ranking, privacy, trust, and reputation. Introducing recently developed technologies, modes, and models, the book provides two distinct (but related) viewpoints about MSN applications: socially inspired networking technology and networking

technology that uses recent advancements to enhance quality of life. The text illustrates the interaction between the macrolevel structure and the local rational behaviors (microlevel) in MSN. It summarizes currently available MSN development platforms, including Android and iOS, and introduces and categorizes existing applications related to MSN and computing. Both location-based service (LBS) and mobile social networks in proximity (MSNPs) are presented in a comprehensive manner. Highlighting key research opportunities, this much-needed reference outlines incentive mechanisms inspired by classical economics, behavioral economics, and social psychology, and, perhaps for the first time, it presents a summary of the economic and business models of MSNs.

Spoken Multimodal Human-Computer Dialogue in Mobile Environments Wolfgang Minker, Dirk Bühler, Laila Dybkjær, 2005-08-17 This book is based on publications from the ISCA Tutorial and Research Workshop on Multi-Modal Dialogue in Mobile Environments held at Kloster Irsee, Germany, in 2002. The workshop covered various aspects of development and evaluation of spoken multimodal dialogue systems and components with particular emphasis on mobile environments, and discussed the state-of-the-art within this area. On the development side the major aspects addressed include speech recognition, dialogue management, multimodal output generation, system architectures, full applications, and user interface issues. On the evaluation side primarily usability evaluation was addressed. A number of high quality papers from the workshop were selected to form the basis of this book. The volume is divided into three major parts which group together the overall aspects covered by the workshop. The selected papers have all been extended, reviewed and improved after the workshop to form the backbone of the book. In addition, we have supplemented each of the three parts by an invited contribution intended to serve as an overview chapter.
