Unlocking Sustained Innovation Success in Healthcare Gregory C. McLaughlin, Suzanne Richins, 2014-10-09

Outlining the critical need to apply innovation to reduce costs and improve efficiency in the healthcare industry, *Unlocking Sustained Innovation Success in Healthcare* explains why innovation management is a must for all healthcare organizations. It describes how innovation, when implemented as a strategy, can yield sustainable success. This book is the first in a series that examines how ENOVALE™ innovation process management operates for a specific market group. The ENOVALE process integrates practical innovation management techniques and scholarly research. Supplying insights garnered through research conducted at the Project Impact Institute, the authors present their own innovation process management technology that enables innovation to flow upward from individuals within your organization. They also detail a strategy for ensuring effective innovation process management and project success. The book demonstrates how the ENOVALE process is used and how it can provide for innovation success in the healthcare sector. Numerous examples of various healthcare businesses and practices illustrate the key principles and practices of the ENOVALE process. The book includes a chapter on leadership in the healthcare sector that demonstrates how to apply the methodologies discussed to achieve sustained success. It also includes a chapter on innovation and the individual that explains how companies, organizations, and non-profits can benefit from the ENOVALE approach. Describing how high-performing organizations can create a strategy and build a culture of innovation and learning, the book includes extensive citations of authors in the field who add value and justification for the practices covered in the text. After reading the book, you will gain an understanding of how to foster and apply the power of innovation to reduce costs, while increasing the quality of care provided in your healthcare

organization.

The Multiple Facets of Innovation Project Management Sandrine Fernez-Walch, 2018-03-13 For firms and other organizations, innovation has become a means of anticipating and managing major changes in their external context and overcoming societal challenges such as sustainable development. As a result, they must innovate repeatedly and continuously. This book explores the multiple facets of innovation project management, defined as the set of activities implemented to bring into being and successfully complete one or several innovation projects. It combines research experience, in cooperation with practitioners, and a theoretical, transversal and global overview inspired from different research streams. The author develops methodologies and frameworks that might be put into practice, provides a case study of research conducted with an air systems manufacturing firm, and outlines avenues for further reflection on innovation project management practice improvement.

Engines of Innovation Holden Thorp, Buck Goldstein, 2013-08-12 In *Engines of Innovation*, Holden Thorp and Buck Goldstein make the case for the pivotal role of research universities as agents of societal change. They argue that universities must use their vast intellectual and financial resources to confront global challenges such as climate change, extreme poverty, childhood diseases, and an impending worldwide shortage of clean water. They provide not only an urgent call to action but also a practical guide for our nation's leading institutions to make the most of the opportunities available to be major players in solving the world's biggest problems. A preface and a new chapter by the authors address recent developments, including innovative licensing strategies, developments in online education, and the value of arts and sciences in an entrepreneurial society.

Innovation, Entrepreneurship and Sustainability Norbert Grünwald, 2015-06-03 The ICEBE

conference in Windhoek is the sixth in a series of annual conferences on engineering and business education. It is organized by the Robert-Schmidt-Institute (University Wismar), hosted by Polytechnic of Namibia and co-organised by University of Applied Sciences Jena. The conferences were held in Sibiu (Romania), Manila (Philippines), Cape Town (South Africa) and Wismar (Germany). The theme of the Windhoek Conference is “Innovation, Entrepreneurship and Sustainability which describes the emphasis that is laid on always using these three terms in combination, i.e., not to consider one in isolation from the others. Thus the primary target of this conference is to provide the delegates with cross-disciplinary thinking related to the three main streams in engineering and business education.

Handbook on Innovation and Project Management Andrew Davies, Sylvain Lenfle, Christoph H. Loch, Christophe Midler, 2023-10-06 Identifying the origins and evolution of innovation and project management, this unique Handbook explains why and how the two fields have grown and developed as separate disciplines, highlighting how and why they are now converging. It explores the theoretical and practical connections between the management of innovations and projects, examining the close relationship between the disciplines.

The Accelerating Transport Innovation Revolution George Giannopoulos, DIC, MSc, PhD, John F. Munro, 2019-04-15 The Accelerating Transport Innovation Revolution: A Global, Case Study-based Assessment of Current Experience, Cross-sectorial Effects and Socioeconomic Transformations, offers a comprehensive view of current state-of-the-art and practices around the world to create innovation on a revolutionary scale and connect research to commercial exploitation of its results. It offers a fascinating new model of the innovation process based on theories of biological ecosystems, general systems theory and basins of attraction (represented through space-time graphs well known in mathematics). Furthermore, it considers - through a number of dedicated chapters - key issues and

elements of innovation ecosystems, such as: Causal Factors and system constraints affecting the development and sustainability of innovation ecosystems (Chapter 4); Review of innovation organization and governance in key countries and regions (Chapter 5); the role of technological Spillovers (Chapter 6); Collection and use of data for innovation monitoring and benchmarking (Chapter 7); Intellectual Property protection between competing ecosystems (Chapter 8); Economics of innovation (Chapter 9); Public and private sector involvement in Transport innovation creation (Chapter 10); the role of the individual entrepreneur - innovator in energizing change (Chapter 11). Finally, in Chapter 12, there is a thorough summary of key findings. This book uses a paradigmatic approach to augment the innovation ecosystem model of innovation that integrates beliefs and learning into the innovation ecosystems model. It therefore includes ten case studies from the U.S., Europe and Asia, detailing how innovation is created across continents and different ecosystems and what are the critical lessons to be learned. It does this, effectively, at five different levels of analysis i.e. the individual innovator / entrepreneur level, the organization level (government agency or company), the regional ecosystem level, the nation-state level and the global - systemic or international level. Each level of analysis, reveals unique features of the innovation landscape and the ten case studies allow the reader to assess when and where specific enablers are facilitating innovation especially on a revolutionary scale. The need for the book came from the realization that despite the billions of dollars spent on various research programs over the past 20 years (especially in the public sector), there have been few clear and tangible efforts directed at exploring how innovation production increasingly occurs and the critical factors necessary to sustain large-scale, revolutionary change as the future unfolds. Thus, a primary theme of the book is that understanding how research results translate into market innovation and implementation, especially understanding the nature of

revolutionary innovation, is as important as the creation of innovations themselves. While the focus of the book is on Transportation, the concepts and recommendations presented apply to other fields too. Formulates and presents a workable and comprehensive new model of innovation Defines and analyzes many concepts and notions related to innovation, research and market implementation Examines the critical factors affecting innovation production and successful commercial implementation of research results Examines organizational models of coordination, governance, data collection, process analysis and use of intellectual property tools Includes recent, well-researched and documented case studies of successful innovation ecosystems across the world mainly - but not only - in the Transport field

New Waves in Innovation Management Research (ISPIM Insights) Marcus Tynnhammar, 2018 Launched in 2011 to recognize the prolific contribution that PhD dissertations make to the field of Innovation Management, the ISPIM Dissertation Award selects three winners from the possible 100+ entries every year. Aided in the selection process by the generous support of Innovation Leaders, the ISPIM presents the awards at their annual Innovation Conference. With only three finalists being selected each year, many excellent submissions do not receive the recognition they deserve. To rectify this, the 2018 ISPIM Dissertation Award cast its spotlight beyond the top three dissertations and onto a much greater number of entries. Compiling the top 28 submissions received this year, 'New Waves in Innovation Management Research' is organized into six thematic sections that cover areas such as investments, collaboration, and creativity. Presenting a broad range of case studies and data from across global, this edited volume illustrates the breadth of research potential in the coming wave of innovation management. This book will be of interest to students, researchers and professional managers, alike, who are interested in or actively involved in the latest

research on innovation management.

Projects on “Innovation in SMEs” in the Baltic Sea Region Max Hogeforster, Philipp Jarke, 2014-04-29 At the end of 2012 the Baltic Sea Region Programme initiated the cluster “Innovation in SMEs”, starting with ten projects that focused their work on this important topic. During 2013 three additional projects joined the initiative. Most projects are flagship projects within the EU Strategy for the Baltic Sea region, namely in Priority SME Networks, Innovation and Education. Maintaining a high level of innovative thinking and entrepreneurship is crucial for SMEs to stay competitive and allow growth in the region. This publication gives an short overview of the 13 projects that were implemented between 2010 and 2014. The projects participated in workshops and surveys to increase the mutual learning and share experience. The findings are summarized. In 2013 a survey was conducted to learn more about the status quo of “Innovation in SMEs” in the Baltic Sea Region and learn more about the relevant topics for the future. More than 600 stakeholders participated in the survey. The publication shows the most relevant questions and answers and draws the conclusions from the survey.

Project-Based Knowledge in Organizing Open Innovation Sara Bonesso, Anna Comacchio, Claudio Pizzi, 2014-07-10 Enriching understanding of the current theoretical debate on project-based learning and R&D sourcing, ‘Project-based Knowledge in Organizing Open Innovation’ draws on innovation literature and knowledge-based perspectives to solve open problems in the relationship between knowledge development at project level and how firms organize product innovation combining in-house R&D activities with inbound open innovation. Through field research in different industrial settings (pharmaceutical, automotive and machine tools) and with complementary methodological approaches, this book provides empirical evidence on how project knowledge features affect sourcing

decisions at firm level. Due to the emerging interest in the management literature on project-based organizations and on the relevance of project forms of organizing in a knowledge-based economy, this volume will appeal to scholars and students in business and management, in particular those in innovation management, organization theory and strategic management. Addressing the still open issue of how the firm level should be complemented by studies at the project level of analysis, this book provides theoretical and empirical arguments on the advantages of a more fine-grained level of analysis to understand how firms organize their innovation processes across boundaries.

Building the Innovation School T. Philip Nichols, 2022 There is no shortage of innovations on offer for schools. Hardly a week passes without someone marching out the latest device, app, service, curricular add-on, or instructional technique that, we are told, is sure to cure the perennial woes of systemic education. This book is an investigation of this enchantment with “innovation” and its implications for not only everyday teaching and learning, but also the future of public education. Based on a study of The Innovation School—a public high school organized around makerspaces, design thinking, and personalized technology—the author challenges conventional wisdom about how educational transformation unfolds and argues that the popular understanding of innovation exacerbates inequality and undermines teacher and student autonomy. Building the Innovation School demonstrates how attending to the infrastructures of innovation leads to educational change that is driven by the interests and values of educators. Repair rather than disruption is the focus—a commitment to schools that allow all students to flourish. Book Features: Shows how specific innovations actually work over time in the everyday life of the classroom. Challenges the conventional wisdom about innovation, offering resources for breaking through the hype of current (and future) innovations-of-the-day. Offers a framework for “innovating from below,” tailoring local innovations to

the needs, values, and priorities of students, educators, and the community. Includes an appendix of resources for teachers and administrators interested in applying the frameworks from the book in their schools and classrooms.

Exploiting Intellectual Property To Promote Innovation And Create Value Tidd

Joe, 2017-10-05 There are two traditional views of the role of intellectual property (IP) within the field of innovation management: in innovation management research, as an indicator or proxy for innovation inputs or outputs, e.g. patents or licensing income; or in innovation management practice, as a means of protecting knowledge. Exploiting Intellectual Property to Promote Innovation and Create Value argues that whilst both of these perspectives are useful, neither capture the full potential contribution of intellectual property in innovation management research and practice. The management of IP has become a central challenge in current strategies of Open Innovation and Business Model Innovation, but there is relatively little empirical work available. Theoretical arguments and empirical research suggest that from both an innovation policy and management perspective, the challenge is to use IP to encourage risk-taking and innovation, and that a broader repertoire of strategies is necessary to create and capture the economic and social benefits of innovation. This book identifies how intellectual property can be harnessed to create and capture value through exploiting new opportunities for innovation. It is organized around three related themes: public policies for IP; firm strategies for IP; and creating value from IP, and offers insights from the latest research on IP strategies and practices to create and capture the economic and social benefits of innovation. ENOVALE Greg McLaughlin, Vinny Caraballo, 2013-10-16 Without sustained innovation, most organizations will simply fade away. Explaining how to achieve sustained innovation success in today's increasingly competitive global environment, *ENOVALE: How to Unlock Sustained Innovation Project Success* provides a validated strategy for implementing innovation projects following the ENOVALE™ methodology: envision the need, nominate, objectify, validate, align and adapt, link, and execute. The authors' first book, *Chance or Choice: Unlocking Innovation Success*, introduced a proven management process, using the ENOVALE methodology, for identifying innovation opportunities through validated outcomes. This book takes the outcome and provides a method—from project initiation to completion. Goes beyond the typical innovation book to outline specific solutions and strategies Includes templates, flow charts, tools, and strategies for each means of innovation Provides business examples of the philosophy, strategic elements, and success criteria that readers can easily relate to The text begins by explaining what strategy means in terms of innovation and how it can be transformative for products, processes, and services. After an overview of innovation, the book discusses a series of strategies for each of the three means of innovation. These strategies outline a systematic process you can use to initiate and conduct your own innovation projects. The book includes numerous business examples that illustrate the authors' philosophy, strategic elements, and success criteria. After reading this book you will gain a solid understanding of five time-proven implementation strategies that can be applied to any type of innovation project.

The Routledge Companion to Innovation Management Jin Chen, Alexander Brem, Eric Viardot, Poh Kam Wong, 2019-02-14 Innovation contributes to corporate competitiveness, economic performance and environmental sustainability. In the Internet era, innovation intelligence is transferred across borders and languages at an unprecedented rate, yet the ability to benefit from it seems to become more divergent among different corporations and countries. How much an organization can benefit from innovation largely depends on how well innovation is managed in it. Thus, there is a discernible increase in interest in the study of innovation management. This handbook provides a comprehensive guide to this subject. The handbook introduces the basic framework of innovation and innovation

management. It also presents innovation management from the perspectives of strategy, organization and resource, as well as institution and culture. The book's comprehensive coverage on all areas of innovation management makes this a very useful reference for anyone interested in the subject.

Innovation Performance in the 21st Century Raphaël Murswieck, 2021-07-30
Performant business models in the 21st century are characterized by the intelligent integration of soft, human-based aspects on the one hand and technology-based opportunities on the other hand to foster not only economic but also environmental results. Based on a mixed research approach, the presented business innovation model (BIM) shows a practical way in how organizations can lever their cultural human-based potential to increase and manage their innovation performance. The studies reveal cultural determinants supporting innovation performance at the beginning of the process respecting the value aspect by adopting digital technologies and deploying environmentally friendly circular

principles within business models to develop more sustainable products and services.
