*Submission* Michel Houellebecq, 2016-09-08 As the 2022 French Presidential election looms, two candidates emerge as favourites: Marine Le Pen of the Front National, and the charismatic Muhammed Ben Abbes of the growing Muslim Fraternity. Forming a controversial alliance with the political left to block the Front National's alarming ascendancy, Ben Abbes sweeps to power, and overnight the country is transformed. This proves to be the death knell of French secularism, as Islamic law comes into force: women are veiled, polygamy is encouraged and, for our narrator François – misanthropic, middle-aged and alienated – life is set on a new course. Submission is a devastating satire, comic and melancholy by turns, and a profound meditation on faith and meaning in Western society.

**The Book of Basketball** Bill Simmons, 2010-12-07 NEW YORK TIMES BESTSELLER • The NBA according to The Sports Guy—now updated with fresh takes on LeBron, the Celtics, and more! Foreword by Malcom Gladwell • “The work of a true fan . . . it might just represent the next phase of sports commentary.”—The Atlantic Bill Simmons, the wildly opinionated and thoroughly entertaining basketball addict known to millions as ESPN's The Sports Guy, has written the definitive book on the past, present, and future of the NBA. From the age-old question of who actually won the rivalry between Bill Russell and Wilt Chamberlain to the one about which team was truly the best of all time, Simmons opens—and then closes, once and for all—every major pro basketball debate. Then he takes it further by completely reevaluating not only how NBA Hall of Fame inductees should be chosen but how the institution must be reshaped from the ground up, the result being the Pyramid: Simmons's one-of-a-kind five-level shrine to the ninety-six greatest players in the history of pro basketball. And ultimately he takes fans to the heart of it all, as he uses a conversation with one NBA great to uncover that coveted thing: The Secret of Basketball. Comprehensive, authoritative, controversial, hilarious, and impossible to put down (even for Celtic-haters), The Book of Basketball offers every hardwood fan a courtside seat beside the game's finest, funniest, and fiercest chronicler.

**Global Meets Digital** Vinod Jain, 2023-06-02 The world today is at the intersection of two megatrends – Globalization and Digitalization – a business revolution unfolding in real time. Global Meets Digital captures the

many nuances of this revolution succinctly, including its impact on our lives and business. An immediate implication of this revolution is that the economic principles that underpinned business and strategy for hundreds of years, such as diminishing returns to scale and resource scarcity, are no longer valid for a large and growing number of products and services. The book will challenge you to think differently not just about digital products, but also about physical products. In the global-digital world, products are of three kinds—physical, digital, and smart machines (products that are both physical and digital, and connected to the internet)—a distinction missed by most books on strategy and global business. The economics of each kind of products is distinct from that of the others, which has strategic implications for all kinds of businesses –implications such as how to compete and how to create and capture value. With several mini case studies and over 100 company examples, the book covers themes and cutting-edge issues like the paradox of globalization, digital disruption, disruptive business models, exponential technologies, Internet of Things, competition in digital markets, winner-take-all market dynamics, Industry 4.0, how to innovate, strategizing for the New Normal, and value creation and value capture in both B2C and B2B contexts. The book derives its underpinnings from the practice of global and digital business, while theory remains in the background. Intended specifically for an executive/professional audience, *Global Meets Digital* should also be of value to business students and professors learning to dip their toes into a digital world. Vinod Jain is an expert in global and digital strategy, award-winning professor, Fulbright Scholar, and author of an MBA textbook, *Global Strategy*. He taught at the Rutgers Business School, Newark and New Brunswick, and the Robert H. Smith School of Business, University of Maryland, College Park. At Maryland, he was also the Founding Director of the federally funded Center for International Business Education and Research and Academic Director of Smith School's Executive MBA program in China. Since leaving Maryland, he has taught in China, Denmark, Finland, Poland, and India as a visiting or term professor. His opinion pieces have appeared in *The Washington Post*, *The Baltimore Sun*, *Mensa Bulletin*, and *Economic Times* and *Mint* (India's #1 and #2 business dailies), among other media. In the past, he worked as a middle- and senior-level executive with American and British multinationals. Vinod has a PhD in Strategy and International Business from the University of Maryland, College Park, MS in Management from UCLA, and MS and BS (Hons) in Statistics from the Indian Statistical Institute, Calcutta.

**How Emotions Are Made** Lisa Feldman Barrett, 2017-03-07 Preeminent psychologist Lisa Barrett lays out how the brain constructs emotions in a way that could revolutionize psychology, health care, the legal system, and our understanding of the human mind. "Fascinating . . . A thought-provoking journey into emotion science."—*The Wall Street Journal* "A singular book, remarkable for the freshness of its ideas and the boldness and clarity with which they are presented."—*Scientific American* "A brilliant and original book on the science of emotion, by the deepest thinker about this topic since Darwin."—Daniel Gilbert, best-selling author of *Stumbling on Happiness* The science of emotion is in the midst of a revolution on par with the discovery of relativity in physics and natural selection in biology. Leading the charge is psychologist and neuroscientist Lisa Feldman Barrett, whose research overturns the long-standing belief that emotions are automatic, universal, and hardwired in different brain regions. Instead, Barrett shows, we construct each instance of emotion through a unique interplay of brain, body, and culture. A lucid report from the cutting edge of emotion science, *How Emotions Are Made* reveals the profound real-world consequences of this breakthrough for everything from neuroscience and medicine to the legal system and even national security, laying bare the immense implications of our latest and most intimate scientific revolution.

**Platforms and Cultural Production** Thomas Poell, David B. Nieborg, Brooke Erin Duffy, 2021-10-14 The widespread uptake of digital platforms – from YouTube and Instagram to Twitch and TikTok – is reconfiguring cultural

production in profound, complex, and highly uneven ways. Longstanding media industries are experiencing tremendous upheaval, while new industrial formations – live-streaming, social media influencing, and podcasting, among others – are evolving at breakneck speed. Poell, Nieborg, and Duffy explore both the processes and the implications of platformization across the cultural industries, identifying key changes in markets, infrastructures, and governance at play in this ongoing transformation, as well as pivotal shifts in the practices of labor, creativity, and democracy. The authors foreground three particular industries – news, gaming, and social media creation – and also draw upon examples from music, advertising, and more. Diverse in its geographic scope, *Platforms and Cultural Production* builds on the latest research and accounts from across North America, Western Europe, Southeast Asia, and China to reveal crucial differences and surprising parallels in the trajectories of platformization across the globe. Offering a novel conceptual framework grounded in illuminating case studies, this book is essential for students, scholars, policymakers, and practitioners seeking to understand how the institutions and practices of cultural production are transforming – and what the stakes are for understanding platform power.

*Studying Mobile Media* Larissa Hjorth, Jean Burgess, Ingrid Richardson, 2012-04-23 The iPhone represents an important moment in both the short history of mobile media and the long history of cultural technologies. Like the Walkman of the 1980s, it marks a juncture in which notions about identity, individualism, lifestyle and sociality require rearticulation. This book explores not only the iPhone's particular characteristics, uses and affects, but also how the iPhone moment functions as a barometer for broader patterns of change. In the iPhone moment, this study considers the convergent trajectories in the evolution of digital and mobile culture, and their implications for future scholarship. Through the lens of the iPhone—as a symbol, culture and a set of material practices around contemporary convergent mobile media—the essays collected here explore the most productive theoretical and methodological approaches for grasping media practice, consumer culture and networked communication in the twenty-first century.

*Reckoning with Social Media* Aleena Chia, Ana Jorge, Tero Karppi, 2021-11-04 Social media use is pervasive, and so is its perceived harmful effects, dubbed 'techlash'. Disconnection practices—restricting, detoxing, deleting—often reinforce rather than confront the ways social media organize attention, everyday life, and society. This book addresses the ambivalence, commodification, and complicity involved in attempts to separate from social media.

Issue Publics Timothy J. Ryan, J Andrew Ehlinger, 2023-05-11 An often-forgotten passage of Philip Converse's classic essay on mass belief systems introduced the concept of an issue public – a segment of voters that has crystallized attitudes about a particular topic. Some people deeply care about particular topics, and they might be equipped to reach judgments on these topics. This simple idea could provide an important corrective to work that casts citizens' political competence in a negative light. But, previous attempts to evaluate the issue publics hypothesis have been unsatisfying. This Element proposes and tests a new measurement approach for identifying issue publics. The evidence gathered leads to the conclusion that issue publics exist, but are smaller and more particularistic than existing scholarship presumes them to be. As such, researchers underappreciate the significance of issue opinions in electoral politics.

Recent technological advances—from dating apps to artificial insemination, from smart phones to portable computers that can instantly search the World Wide Web for information, and from robots performing surgery to cars driving themselves—once remarkable, have become an unremarkable part of our lives.
