Gaming Cultures and Place in Asia-Pacific Larissa Hjorth,Dean Chan,2009-06-24 This collection explores the relationship between digital gaming and its cultural context by focusing on the burgeoning Asia-Pacific region. Encompassing key locations for global gaming production and consumption such as Japan, China, and South Korea, as well as increasingly significant sites including Australia and Singapore, the region provides a wealth of divergent examples of the role of gaming as a socio-cultural phenomenon. Drawing from micro ethnographic studies of specific games and gaming locales to macro political economy analyses of techno-nationalisms and trans-cultural flows, this collection provides an interdisciplinary model for thinking through the politics of gaming production, representation, and consumption in the region.

Video Games Around the World Mark J. P. Wolf,2015-05-22 Thirty-nine essays explore the vast diversity of video game history and culture across all the world's continents. Video games have become a global industry, and their history spans dozens of national industries where foreign imports compete with domestic productions, legitimate industry contends with piracy, and national identity faces the global marketplace. This volume describes video game history and culture across every continent, with essays covering areas as disparate and far-flung as Argentina and Thailand, Hungary and Indonesia, Iran and Ireland. Most of the essays are written by natives of the countries they discuss, many of them game designers and founders of game companies, offering distinctively firsthand perspectives. Some of these national histories appear for the first time in English, and some for the first time in any language. Readers will learn, for example, about the rapid growth of mobile games in Africa; how a meat-packing company held the rights to import the Atari VCS 2600 into Mexico; and how the Indonesian MMORPG Nusantara Online reflects that country's cultural history and folklore. Every country or region's unique conditions provide the context that shapes its national industry; for example, the long history of computer science in the United Kingdom and Scandinavia, the problems of piracy in China, the PC Bangs of South Korea, or the Dutch industry's emphasis on serious games. As these essays demonstrate, local innovation and diversification thrive alongside productions and corporations with global aspirations. Routledge Handbook of Science, Technology, and Society Daniel Lee Kleinman,Kelly Moore,2014-06-05 Over the last decade or so, the field of science and technology studies (STS) has become an intellectually dynamic interdisciplinary arena. Concepts, methods, and theoretical perspectives are being drawn both from long-established and relatively young disciplines. From its origins in philosophical and political debates about the creation and use of scientific knowledge, STS has become a wide and deep space for the consideration of the place of science and technology in the world, past and present. The Routledge Handbook of Science, Technology and Society seeks to capture the dynamism and breadth of the field by presenting work that pushes the reader to think about science and technology and their intersections with social life in new ways. The interdisciplinary contributions by international experts in this handbook are organized around six topic areas: embodiment consuming technoscience digitization environments science as work rules and standards This volume highlights a range of theoretical and empirical approaches to some of the persistent – and new – questions in the field. It will be useful for students and scholars throughout the social sciences and humanities, including in science and technology studies, history, geography, critical race studies, sociology, communications, women's and gender studies, anthropology, and political science.

This Bright Light of Ours Maria Gitin,2014-02-11 This Bright Light of Ours combines a memoir with oral history to create a very vivid portrait of the Freedom Summer of 1965 in Wilcox County, Alabama, when volunteers and long-standing local black leaders were shaking the cultural norms, registering thousands of new voters. This book documents the first-person experience of Maria Gitin, an idealistic 18-year-old college freshman from San Francisco who felt called to action when she viewed televised images of the brutal treatment of peaceful demonstrators during what became known as Bloody Sunday in Selma, Alabama--

Returning Foreign Fighters: Responses, Legal Challenges and Ways Forward Francesca Capone,Christophe Paulussen,Rebecca Mignot-Mahdavi,2023-03-24 This book, a follow-up publication to the 2016 volume Foreign Fighters under International Law and Beyond, zooms in on the responses that the international community and individual States are implementing in response to (prospective and actual) returning foreign fighters (FFs) and their families, focusing on returnees from Syria and Iraq to European countries. As States and international organisations are still 'learning by doing', the role of the academic community is to help steer the process by bridging the divide between international standards and their implementation at the national level and between security concerns and human rights law. Furthermore, the academic community can and should assist in identifying ways forward that are both effective, sustainable and international law-compliant. Those are, ultimately, the goals that the present volume seeks to pursue. The observations, recommendations and warnings included in this book will be useful in future debates on (returning) FFs,

both in the academic world and in the world of policy makers and practitioners, as well as to the public at large. Francesca Capone is Associate Professor of International Law at the Istituto DIRPOLIS of the Scuola Superiore Sant'Anna in Pisa, Italy. Christophe Paulussen is Senior Researcher International Law at the T.M.C. Asser Instituut in The Hague, The Netherlands. Rebecca Mignot-Mahdavi is Lecturer in International Law at the Manchester International Law Centre, University of Manchester, School of Law in Manchester, United Kingdom.

Playing to Win David Sirlin, 2006-04-01 Winning at competitive games requires a results-oriented mindset that many players are simply not willing to adopt. This book walks players through the entire process: how to choose a game and learn basic proficiency, how to break through the mental barriers that hold most players back, and how to handle the issues that top players face. It also includes a complete analysis of Sun Tzu's book *The Art of War* and its applications to games of today. These foundational concepts apply to virtually all competitive games, and even have some application to real life. Trade paperback. 142 pages.

Freedom Climbers Bernadette McDonald, 2013-02-20 [CLICK HERE](#) to download the first chapter from *Freedom Climbers* (Provide us with a little information and we'll send your download directly to your inbox) One of the most important mountaineering books to be written for many years. —Boardman-Tasker Prize See this book trailer for *Freedom Climbers* made by RMB Books, its publisher in Canada, where the cover is slightly different from the Mountaineers Books U.S. edition * Behind the Iron Curtain, Cold War mountaineers found freedom on the world's highest peaks—and paid an awful price to achieve it * Winner of the Boardman-Tasker Prize, Banff Grand Prize, and American Alpine Club Literary Award *Freedom Climbers* tells the story of Poland's truly remarkable mountaineers who dominated Himalayan climbing during the period between the end of World War II and the start of the new millennium. The emphasis here is on their golden age in the 1980s and 1990s when, despite the economic and social baggage of their struggling country, Polish climbers were the first to tackle the world's highest mountains during winter, including the first winter ascents on seven of the world's fourteen 8000-meter peaks: Everest, Manaslu, Dhaulagiri, Cho Oyu, Kanchenjunga, Annapurna, and Lhotse. Such successes, however, came at a serious cost: 80 percent of Poland's finest high-altitude climbers died on the high mountains during the same period they were pursuing these first ascents. Award-winning writer Bernadette McDonald addresses the social, political, and cultural context of this golden age, and the hardships of life under Soviet rule. Polish climbers, she argues, were so tough because their lives at home were so tough—they lost family members to World War II and its aftermath and were so much more poverty-stricken than their Western counterparts that they made much of their own climbing gear. While *Freedom Climbers* tells the larger story of an era, McDonald shares charismatic personal narratives such as that of Wanda Rutkiewicz, expected to be the first woman to climb all 8000-meter peaks until she disappeared on Kanchenjunga in 1992; Jerzy Kukuczka, who died in a fall while attempting the south face of Lhotse; and numerous other renowned climbers including Voytek Kurtyka, Artur Hajzer, Andrej Zawaka, and Krzysztof Wielicki. This is a fascinating window into a different world, far-removed from modernity yet connected by the strange allure of the mountain landscape, and a story of inspiring passion against all odds. The Greek Search for Wisdom Michael K. Kellogg, 2012-07-10 The philosopher Alfred North Whitehead once said that all of Western philosophy was but a series of footnotes to Plato. By the same token, one could argue that all of Western civilization is but an extension of the ancient Greek cultural legacy. The Greeks invented tragedy, comedy, lyric poetry, history, philosophy, and democracy. They also made remarkable advances in science, medicine, and mathematics. In the author's view, what ties this wide-ranging intellectual ferment together is a restless search for wisdom. The author looks at ten outstanding examples of Greek wisdom, offering fresh and engaging portraits of the epic poets (Homer, Hesiod); dramatists (Aeschylus, Sophocles, Euripides, Aristophanes); historians (Herodotus, Thucydides); and philosophers (Plato, Aristotle) against the background of Greek history. In each case he asks what the author has to tell us—regardless of genre—about our place in the world and how we should live our lives. By surveying some of the highest peaks of ancient civilization, the author argues that we gain perspective on the historical terrain that lies below. This book presents an eloquent and convincing case that a study of the Greek classics, as Gustave Flaubert explained, makes us greater, wiser, purer.

Defence Offsets and the Global Arms Trade Jonata Anicetti, 2024-02-06 This book offers the first comprehensive study of defence offsets and its economic, security, political and theoretical implications. Originating in the second half of the 19th century, defence offsets - additional economic, industrial and technological benefits to states for buying foreign weapons - have since been a key feature of the global arms trade and defence industry. And yet, offsets are an under-researched and under-theorised phenomenon. This book fills this gap in the literature by offering the first general theory of defence offsets, as well as the first systematic analysis of the offset phenomenon. By building on the insights of scholars of defence economics and drawing from the International Relations liberal paradigm, as well as reviving and adapting Robert Putnam's two-level game framework, the book proposes a liberal-rationalist theory of defence offsets. It then proves the worth of such a theory through Qualitative Comparative Analysis (QCA) of fifty-four fighter aircraft transfers from 1992 to 2021 inclusive, and three in-depth case studies addressing offsets negotiated and agreed to as part of fighter aircraft competitions in Brazil, India, and South Korea. This book will be of interest to students of defence studies, defence economics, security studies and international relations.

The Gentleman Boxer Ion Grumeza, 2012-08-16 And the winner is...JOE GRIMM! He scored 24 KOs in a row and was never knocked out. He was a winner in the ring, and a winner in life. This is the story of a bantam boxer, his chaperoning older brother, and the time in which they lived. It is the 1920s, and there are boxing clubs in nearly every city in America. Joe Grimm weighs 118 pounds and is flat-footed—but he has a punch and a KO record that draw leading managers to add Joe to their stables. He trains in the same gym as Jim Braddock, the future Cinderella Man. Joe's awesome winning streak is interrupted when he and his brother are called home. He leaves the arenas with their cheering crowds and works as a butcher in his grocery shop bought with ring money for his family. Now the character traits that made him a boxing wonder make him a success in business. *The Gentleman Boxer* captures the excitement and hope of an era when anything was possible and anyone could become a hero—or a champion. It is a tribute to the thousands of forgotten bantam prizefighters in the Golden Age of Boxing.

Death in the City of Light David King, 2012-06-05 The gripping, true story of a brutal serial killer who unleashed his own reign of terror in Nazi-Occupied Paris. As decapitated heads and dismembered body parts surfaced in the Seine, Commissaire Georges-Victor Massu, head of the Brigade Criminelle, was tasked with tracking down the elusive murderer in a twilight world of Gestapo, gangsters, resistance fighters, pimps, prostitutes, spies, and other shadowy figures of the Parisian underworld. But while trying to solve the many mysteries of the case, Massu would unravel a plot of unspeakable deviousness. The main suspect, Dr. Marcel Petiot, was a handsome, charming physician with remarkable charisma. He was the "People's Doctor," known for his many acts of kindness and generosity, not least in providing free medical care for the poor. Petiot, however, would soon be charged with twenty-seven murders, though authorities suspected the total was considerably higher, perhaps even as many as 150. Petiot's trial quickly became a circus. Attempting to try all twenty-seven cases at once, the prosecution stumbled in its marathon cross-examinations, and Petiot, enjoying the spotlight, responded with astonishing ease. Soon, despite a team of prosecuting attorneys, dozens of witnesses, and over one ton of evidence, Petiot's brilliance and wit threatened to win the day. Drawing extensively on many new sources, including the massive, classified French police file on Dr. Petiot, *Death in the City of Light* is a brilliant evocation of Nazi-Occupied Paris and a harrowing exploration of murder, betrayal, and evil of staggering proportions.

Contemporary Military Culture and Strategic Studies Alastair Finlan, 2013-09-02 This book explores and compares the contemporary military cultures of the United States and the United Kingdom. The last decade has witnessed astonishing global events, from 9/11 and military operations in Afghanistan in the same year, to the military intervention in Libya in 2011. Western military forces have been involved in all of these campaigns and have been engaged in continuous military operations for over ten years. It is therefore now apt to focus a spotlight on the military cultures of these state-based armed forces. This book examines how contemporary American and British military culture is formed, focusing explicitly on the six major military institutions. The author dedicates a chapter to each of these institutions with each one sharing a unifying analytical framework. These chapters explore the formation and sustenance of US/UK military culture under the rubric of common themes that include social origins, transformative events, leaders, approaches to war, technology and contemporary identity. To conclude, the book considers the impact of the War on Terror on the military

cultures of the US and UK, as well as likely directions for the future. This book will be of much interest to students of military studies, strategic studies, security studies and comparative politics.

King of the World David Remnick,2014-04-02 The bestselling biography of Muhammad Ali--with an Introduction by Salman Rushdie On the night in 1964 that Muhammad Ali (then known as Cassius Clay) stepped into the ring with Sonny Liston, he was widely regarded as an irritating freak who danced and talked way too much. Six rounds later Ali was not only the new world heavyweight boxing champion: He was a new kind of black man who would shortly transform America's racial politics, its popular culture, and its notions of heroism. No one has captured Ali--and the era that he exhilarated and sometimes infuriated--with greater vibrancy, drama, and astuteness than David Remnick, the Pulitzer Prize-winning author of *Lenin's Tomb* (and editor of *The New Yorker*). In charting Ali's rise from the gyms of Louisville, Kentucky, to his epochal fights against Liston and Floyd Patterson, Remnick creates a canvas of unparalleled richness. He gives us empathetic portraits of wisecracking sportswriters and bone-breaking mobsters; of the baleful Liston and the haunted Patterson; of an audacious Norman Mailer and an enigmatic Malcolm X. Most of all, *King of the World* does justice to the speed, grace, courage, humor, and ebullience of one of the greatest athletes and irresistibly dynamic personalities of our time.
