Contemporary Chinese Cinema and Visual Culture

Sheldon Lu, 2021-07-15 Honourable Mention, Best Monograph Award, BAFTSS Publication Awards 2022

Sheldon Lu's wide-ranging new book investigates how filmmakers and visual artists from mainland China, Hong Kong and Taiwan have envisioned China as it transitions from a socialist to a globalized capitalist state. It examines how the modern nation has been refashioned and re-imagined in order to keep pace with globalization and transnationalism. At the heart of Lu's analysis is a double movement in the relationship between nation and transnationalism in the Chinese post-socialist state. He considers the complexity of how the Chinese economy is integrated in the global capitalist system while also remaining a repressive body politic with mechanisms of control and surveillance. He explores the interrelations of the local, the national, the subnational, and the global as China repositions itself in the world. Lu considers examples from feature and documentary film, mainstream and marginal cinema, and a variety of visual arts: photography, painting, digital video, architecture, and installation. His close case studies include representations of class, masculinity and sexuality in contemporary Taiwanese and Chinese cinema; the figure of the sex worker as a symbol of modernity and mobility; and artists' representations of Beijing at the time of the 2008 Olympics.

A Grammar of Spoken Chinese, 1979

Viewpoint and the Fabric of Meaning Barbara

Dancygier, Wei-lun Lu, Arie Verhagen, 2016-03-21 This volume explores the cross-linguistic diversity, and possibly inconsistency, of the span of linguistic means that signal reported speech and thought. The integration of broad linguistic (viewpoint in conversation and narrative) and cognitive (theory of mind and understanding the inner life and thought of others) strategies for handling mixed points of view will be considered.

Great Walls of Discourse and Other Adventures in Cultural China Haun Saussy, 2001 In six interpretive studies of China, the author examines the ways in which the networks of assumption and consensus that make communication possible within a discipline affect collective thinking about the object of study.

Little Byron Rebecca Juetten, 2015-11-05 The flagship book of Little Crab Edutainment is *Little Byron*, the first in a Mandarin-and-English children's series written by Rebecca Juetten and illustrated by Mikaila Maidment. Byron is a little boy who plays dress-up and goes on imaginative adventures with his three pets - one dog and two cats! The bilingual books offered by Little Crab Edutainment are intended for younger children but can also be read and enjoyed by older children or adults who are at a beginning level in their language studies. Find Little Crab Edutainment on Facebook and Twitter to learn more. As this series continues, friends of Byron will be introduced who reflect the multicultural mosaic of children in North American classrooms. Each book in the series also introduces a new piece of lexis; for example, the target language in *Little Byron* is the numbers

1 to 10. The English, Mandarin, and Pin Yin are shown all on the same page rather unlike most other bilingual books, which often separate the languages onto different pages. (Pin Yin is a system of transcribing Chinese characters so that Mandarin learners can pronounce them: Pin Yin = to spell sound). The Mandarin is displayed with Simplified Chinese characters as opposed to complex Traditional characters and was not translated after the English but rather written alongside it by the author, who speaks both languages. The audio album Little Byron - Tutorial and Narrations is a set of pronunciation tutorials and narration tracks offered to accompany Little Byron, the storybook. Visit iTunes to select individual tracks, or visit CDBaby.com to purchase the full album at a discounted price!

Analysing Chinese Language and Discourse across Layers and Genres Wei Wang, 2020-08-15 Aspirational and expanding, this book examines contemporary Chinese language and discourse across a spectrum of linguistic layers and genres in diverse social contexts. Addressing issues ranging from the usual focus on language per se, or language use in reaction to the immediate settings, to the connections between properties of texts and social practices (ideologies, stancetaking, power relations, etc.), the updated and exemplary research projects presented in the volume demonstrates a developing trajectory of research in Chinese language and discourse. With its empirical focus and stress on the role of language and discourse in social practice, this important new book discusses various language features as well as gender, stancetaking, and identity in Chinese discourse. This is a vital discussion for anyone interested in contemporary Chinese language and discourse studies. In examination of different layers of language (i.e. from lexical items and sentence structures to discourse features and discursive practices) across different genres of texts, the research projects have drawn on a variety of linguistic approaches and methodologies, including functional linguistics, applied linguistics, sociolinguistics and various approaches to discourse analysis. Researchers and students of Chinese linguistics, sociolinguistics,

discourse studies, translation studies, and China studies in general will find this volume an indispensable reference and an enjoyable read.

Mandarin Chinese Words and Parts of Speech Chu-Ren Huang, Shu-Kai Hsieh, Keh-Jiann Chen, 2017-07-14 This monograph is a translation of two seminal works on corpus-based studies of Mandarin Chinese words and parts of speech. The original books were published as two pioneering technical reports by Chinese Knowledge and Information Processing group (CKIP) at Academia Sinica in 1993 and 1996, respectively. Since then, the standard and PoS tagset proposed in the CKIP report have become the de facto standard in Chinese corpora and computational linguistics, in particular in the context of traditional Chinese texts. This new translation represents and develops the principles and theories originating from these pioneering works. The results can be applied to numerous

fields; Chinese syntax and semantics, lexicography, machine translation and other language engineering bound applications. Suitable for graduate and scholars in the fields of linguistics and Chinese, *Mandarin Chinese Words and Parts of Speech* provides a comprehensive survey of the issues around wordhood and PoS.
