**Meaning and Relevance** Deirdre Wilson, Dan Sperber, 2012-03-22 When people speak, their words never fully encode what they mean, and the context is always compatible with a variety of interpretations. How can comprehension ever be achieved? Wilson and Sperber argue that comprehension is a process of inference guided by precise expectations of relevance. What are the relations between the linguistically encoded meanings studied in semantics and the thoughts that humans are capable of entertaining and conveying? How should we analyse literal meaning, approximations, metaphors and ironies? Is the ability to understand speakers' meanings rooted in a more general human ability to understand other minds? How do these abilities interact in evolution and in cognitive development? Meaning and Relevance sets out to answer these and other questions, enriching and updating relevance theory and exploring its implications for linguistics, philosophy, cognitive science and literary studies.

**Trans Medicine** Stef M. Shuster, 2021-06-15 Creating worthy patients, 1950-1970 -- Legitimacy wars between physical and mental healthcare providers -- Making it up : evidence in contemporary trans medicine -- Medical uncertainty : working with trans patients -- Uncertain expertise in trans medicine -- Conclusion: Rethinking the treatment of gender.

**Metarepresentation** Eun-Ju Noh, 2000-12-21 Eun-Ju Noh's book provides a close look at linguistic metarepresentation showing how beliefs, utterances, and propositions are represented and how they are inferred. The author explains how metarepresentation works in various types of uses: quotations, negation, echo questions, and conditionals in terms of truth conditions and pragmatic enrichment. Ample examples are provided from the English language. The relevance-theory approach gives room for extralinguistic parameters to be considered, and suggestions are made for further research in cross-linguistic studies and metarepresentation.

**Market Integration and Public Services in the European Union** Marise Cremona, 2011-03-03 In a period when the nature and scope of the European internal market is hotly contested, this collection offers a topical analysis of the most pressing issues relating to market integration and public services in the EU. As the debate continues over the balance between state control and market freedom, questions are also raised about the relationship between EU regulation and national policy choices and the 'joint responsibility' of the Union and the Member States. Outlining the most important current issues relating to market integration and public services in the EU, this book also addresses the underlying, systemic questions of the relation between public services and markets, and services and the consumer. Chapters also examine the application of state aids and procurement law to public services. The final two chapters focus on two public service sectors where the mix of Treaty rules, case law, and legislation has operated in rather different ways: public service media and health services

**How Interpretation Makes International Law** Ingo Venzke, 2012-09-06 Challenging the classic narrative that sovereign states make the law that constrains them, this book argues that treaties and other sources of international law form only the starting point of legal authority. Interpretation can shift the meaning of texts and, in its own way, make law. In the practice of interpretation actors debate the meaning of the written and customary laws, and so contribute to the making of new law. In such cases it is the actor's semantic authority that is key - the capacity for their interpretation to be accepted and become established as new reference points for legal discourse. The book identifies the practice of interpretation as a significant space for international lawmaking, using the key examples of the UN High Commissioner for Refugees and the Appellate Body of the WTO to show how international institutions are able to shape and develop their constituent instruments by adding layers of interpretation, and moving the terms of discourse. The book applies developments in linguistics to the practice of international legal interpretation, building on semantic pragmatism to overcome traditional explanations of lawmaking and to offer a fresh account of how the practice of interpretation makes international law. It discusses the normative implications that arise from viewing interpretation in this light, and the implications that the importance of semantic changes has for understanding the development of international law. The book tests the potential of international law and its doctrine to respond to semantic change, and ultimately ponders how semantic authority can be justified democratically in a normative pluriverse.

**The Semantics-Pragmatics Controversy** Kristin Börjesson, 2014-08-22 Currently, there is a great number of approaches to the semantics-pragmatics distinction on the market. This book is unique in that it offers a comprehensive overview, comparison and critical evaluation of these approaches. Taking as a starting point the notorious difficulty of differentiating so-called literal from non-literal (or figurative) meaning, it covers a wide range of the key current topics in semantics and pragmatics, e.g., the saying/meaning distinction, minimalism vs. contextualism, unarticulated constituents, indexicalism, (generalised) conversational implicatures, speech acts, levels of meaning in interpretation, the role of context in interpretation, the nature of lexical meaning. Notably, rather than taking a solely theoretical perspective, the book integrates psycho- and neurolinguistic perspectives, considering experimental results concerning the (differences in) processing of the various types of

meaning covered. In terms of topics covered and perspectives taken, it is equally well suited for undergraduate as well as postgraduate students of linguistics and/or philosophy of language.

**Modality in Argumentation** Andrea Rocci, 2017-03-08 This book addresses two related questions that have first arisen in Toulmin's seminal book on the uses of argument. The first question is the one of the relationship between the semantic analysis of modality and the structure of arguments. The second question is the one of the distinctive place, or role, of modality in the fundamental structure of arguments. These two questions concern how modality, as a semantic category, relates to the fundamental structure of arguments. The book addresses modality and argumentation also according to another perspective by looking at how different linguistic modal expressions may be taken as argumentative indicators. It explores the role of modal expressions as argumentative indicators by using the Italian modal system as a case study. At the same time, it uses predictions/forecasts in the business-financial daily press to investigate the relation between modality and the context of argumentation.

**State Aid Law of the European Union** Herwig Hofmann, Claire Micheau, Bucura C. Mihaescu-Evans, 2016 Rules controlling State aid and subsidies on the EU and the WTO level can have a decisive influence on both regulatory and distributive decision-making. This field of law has grown exponentially in importance and complexity over the past decades. Rules on State aid and subsidies control are one of the key instruments to ensure that public spending and regulatory measures do not lead to discriminatory distortions of competition. As a consequence, hardly any part of national law is free from review under criteria of State aid and subsidy regulation. In turn, State aid and subsidies law is linked to economic, constitutional, administrative law of the EU and the Member States as well as to public international law. This book brings together leading experts from academia, the judiciary, civil servants from the European Commission, and practicing lawyers to provide expert opinion and commentary on the diverse dimensions of the complex and vital area of law. Critically analysing and explaining developments and current approaches in State aid law and subsidies, the chapters take into account not only the legal dimensions but also the economic and political implications. They address the EU law applicable to State aid in the aftermath of the recent State Modernization reform, and coverage includes: an in-depth analysis of the notion of State aid as interpreted by the Court's cases-law and the Commission's practice; the rules on compatibility of State aid with the internal market; the rules governing the procedure before the Commission; the litigation before the Court of Justice of the European Union; and analysis of the other trade defense instruments, including WTO subsidy law and EU anti-subsidy law.

*Legacies of the Permanent Court of International Justice* Malgosia Fitzmaurice, Christian J. Tams, 2013-01-09 'Legacies of the Permanent Court of International Justice' assesses the continuing relevance of the first 'world court' and shows how, for better or worse, it has shaped our thinking about binding legal dispute resolution.

*Klaus Vogel on Double Taxation Conventions* Ekkehart Reimer, Alexander Rust, 2022-01-18 Klaus Vogel on Double Taxation Conventions is regarded as the international gold standard on the law of tax treaties. This article-by-article commentary has been completely revised and updated to give you a full and current account of double tax conventions (DTCs). DTCs form the backbone of international taxation, but they raise many interpretational questions. This market leading work will provide you with the answers. Based on the OECD/G20 Multilateral Instrument, the OECD MC and Commentary published in 2017 and the most recent amendments to the UN MC, the book also includes relevant case law and scholarly literature up to and including 2020. Previous editions of the Vogel have been routinely relied on by courts around the world including Australia, Canada, Germany, India, South Africa, the Netherlands and United Kingdom. What's new in this edition? There have been many important developments in this area since the last edition in 2015. The authors discuss these developments and the effect they will have upon practitioners working in this area. They also provide a wealth of new and revised case law, along with the DTCs of emerging countries. You'll find: Reports about major features in the DTC practice of many leading jurisdictions, such as: the DTC practice of Austria, Canada, France, Germany, India, the Netherlands, Switzerland, the UK and the US Sections on divergent country practice covering their national models and networks of bilateral DTCs Thorough analysis of the OECD and UN model, as well as the implementation of these models in practice Amendments of bilateral DTCs, textual or in substance, on the basis of the 2017 Anti-BEPS Multilateral Instrument Coverage of a full range of the latest tax treaties around the world, including important treaties between OECD and BRICS countries This new Fifth Edition of Klaus Vogel on Double Taxation Conventions continues to reflect the unchallenged role of the OECD. The OECD MC, accompanied by the official Commentary, guidelines, reports and other recommendations, has sustained its position as the most important legal instrument in the area of DTCs. On occasion, the UN MC and Commentary diverge from the OECD texts. When this happens, the authors deal with the specifics of the UN MC in separate annotations and analyses, explaining and making sure you understand the differences. **The Book of Genesis in Jewish and Oriental Christian Interpretation** Judith Frishman, Lucas van Rompay, 1997 This volume consists of sixteen essays, most of which are revised versions of papers read at a symposium held in May 1995 in Jerusalem at the Hebrew University and the Institute for Advanced Studies. Students of various religious and cultural traditions present their research in Jewish and Christian biblical interpretation. Fields covered include the Second Temple Period (Dead Sea Scrolls and the Life of Adam and Eve), Rabbinic literature, Early Greek

and Syriac Antiochene exegesis, Syriac literature, Armenian reflections of Greek and Syriac exegesis (esp. the Armenian translations and reworkings of Eusebius of Emesa, Ephrem the Syrian and Jacob of Edessa), Ethiopic commentary tradition. Particular attention is devoted to the interrelationship between various traditions, e.g. Jewish and Christian, Greek and Syriac, Syriac and Armenian. The volume gives some telescoped insight into the cultural complexity of the Near East in Late Antiquity, where dynamic processes of cultural and religious interaction were continuously at work.

*The Idea of a Text and the Nature of Textual Meaning* Anders Pettersson,2017-04-15 In his account of text and textual meaning, Pettersson demonstrates that a text as commonly conceived is not only a verbal structure but also a physical entity, two kinds of phenomena which do not in fact add up to a unitary object. He describes this current notion of text as convenient enough for many practical purposes, but inadequate in discussions of a theoretically more demanding nature. Having clearly demonstrated its intellectual drawbacks, he develops an alternative, boldly revisionary way of thinking about text and textual meaning. His careful argument is in challenging dialogue with assumptions about language-in-use to be found in a wide range of present-day literary theory, linguistics, philosophical aesthetics, and philosophy of language.
