Nick and Tesla and the High-Voltage Danger Lab Bob Pflugfelder, Steve Hockensmith, 2013-11-05 Nick and Tesla are bright 11-year-old siblings with a knack for science, electronics, and getting into trouble. When their parents mysteriously vanish, they're sent to live with their Uncle Newt, a brilliant inventor who engineers top-secret gadgets for a classified government agency. It's not long before Nick and Tesla are embarking on adventures of their own—engineering all kinds of outrageous MacGyverish contraptions to save their skin: 9-volt burglar alarms, electromagnets, mobile tracking devices, and more. Readers are invited to join in the fun as each story contains instructions and blueprints for five different projects. In Nick and Tesla's High-Voltage Danger Lab, we meet the characters and learn how to make everything from rocket launchers to soda-powered vehicles. Learning about science has never been so dangerous—or so much fun!

A Litter of Golden Mysteries (Cozy Dog Mystery): #11 in the Golden Retriever Mystery Series - 8 Golden Retriever Mysteries + Flash Fiction Neil S Plakcy, 2023-10-25 Stop by for some comfortable visits to Stewart's Crossing, where reformed computer hacker Steve Levitan and his crime-sniffing golden retriever Rochester are nose to the ground in this collection of mystery short stories that take place between novels. In the first of these stories, Steve is learning to love the big, goofy golden he has inherited on the death of his neighbor, and Rochester shows him how to open his heart and his home to his sweetheart Lili. From then on, Rochester tugs Steve along on a roller coaster of cases, from theft to murder to the discovery of an abandoned baby. Familiar characters from Stewart's Crossing drop by, including Steve's best friend, SCPD detective Rick Stemper. Of course there are a lot of opportunities for Rochester to tussle with his BFF, Rick's Aussie Rascal. Check in with old friends like Gail Dukowski, the owner of the Chocolate Ear, and Steve's childhood piano teacher Edith Passis. Joey Capodilupo, Mark Figueroa, and their snow-white golden Brody make an appearance, along with Lili's ex, journalist Van Dryver, who makes a surprising appearance to help out with an investigation into Amish puppy mills. "The golden retriever mysteries are barking good!" - Sparkle Abbey, author of the Pampered Pet mystery series.

Biohacked Brandon J. Weichert, 2023-05-16 When COVID-19 erupted from Wuhan, China under mysterious circumstances, the Communist Party of China covered up its existence for as long as possible. It is now apparent that there is more to COVID than what the authorities wish for us to know. Biohacked: China's Race to Control Life details the decades-long pursuit by the Chinese Communists to dominate the biotechnology industry—to control the very building blocks of life on Earth—to further their political control at home and their supremacy abroad. More appalling than the egregious cover-up that China's rulers engaged in with COVID-19 is the fact that Western scientists, pharmaceutical companies, and research labs have contributed to China's rapid (and dangerous) growth in the biotech industry—so much so that China, not the United States, may become the seat of the biotechnology industry. The Chinese leadership believes that biotechnology is a critical industry for the Communist Party to achieve its "China Dream" of becoming the world's dominant superpower by 2049. In China's biotech sector, truly macabre practices are being developed, from ambitious cloning programs to the creation of potential pathogens that China's military plans to use in "specific genetic attacks" against Beijing's growing list of political enemies. To stop the threat, author Brandon J. Weichert proposes the world's nations create a comprehensive set of treaties for regulating biotechnology research and development. Further, Weichert calls for Washington to slow the transfer of advanced biotechnology knowledge and funding from the United States to China using means like the Foreign Corrupt Practices Act and the Committee on Foreign Investment in the United States (CFIUS). Unless an all-of-government (and society) approach is taken to curbing irresponsible biotech development in China, then another—deadlier—COVID-19-like pandemic could be at hand.

and the Sky Fell Justin C. Denton, 2021-07-13 Somebody's playing a game with us. —General Beringer, War Games During the course of the SARS-nCoV-2/COVID-19 pandemic, described in this book as "the event," many questions have been asked. Who is responsible for this event? Where did this virus come from? What happened in the Wuhan Institute of Virology (WIV)? Why did this happen? And many others. In this book, many of these questions are answered, the dots are connected, and the navigation buoys anchored to steer by in this most terrible fact-filled account of the proceedings that have caused the event. The entire world has been played and is the victim of crimes against humanity. Read and learn how this all transpired, and do your own homework. Follow the path and take the trip outlined in these pages. The book delves into the locations, people, and events that are headline stories and have made an impact on so many around the globe. This book will inform you, make you think, and help you understand the event that continues now and in the foreseeable future.

Inside the Enemy's Computer Clement Guitton, 2017-08-01 Attribution - tracing those responsible for a cyber attack - is of primary importance when classifying it as a criminal act, an act of war, or an act of terrorism. Three assumptions dominate current thinking: attribution is a technical problem; it is unsolvable; and it is

unique. Approaching attribution as a problem forces us to consider it either as solved or unsolved. Yet attribution is far more nuanced, and is best approached as a process in constant flux, driven by judicial and political pressures. In the criminal context, courts must assess the guilt of criminals, mainly based on technical evidence. In the national security context, decision-makers must analyse unreliable and mainly non-technical information in order to identify an enemy of the state. Attribution in both contexts is political: in criminal cases, laws reflect society's prevailing norms and powers; in national security cases, attribution reflects a state's will to maintain, increase or assert its power. However, both processes differ on many levels. The constraints, which reflect common aspects of many other political issues, constitute the structure of the book: the need for judgement calls, the role of private companies, the standards of evidence, the role of time, and the plausible deniability of attacks.

Environmental Geology Laboratory ,2003-11-14 This easy-to-use, easy-to-learn-from laboratory manual for Environmental Geology employs an interactive question-and-answer format that engages the reader at the start of each exercise. Taking a developmental approach to learning, this manual emphasizes principles over rote memorization. The entire manual is written in a clear and inviting style, and includes scores of helpful hints to coach students as they tackle problems.

Transfusion Medicine and Scientific Developments A.W.M.M. Koopman-van Gemert,2017-07-05 Transfusion Medicine and Scientific Developments focuses on unknown aspects of blood cells and transfusion practice. Blood transfusion medicine has become a sophisticated and specialized field of medicine. Some aspects will be discussed in this book. The book has been divided into three sections. The first section includes chapters describing the immunological and coagulation-assisting functions of red blood cells and methods to measure their life span. The second section discusses the role of platelets in inflammatory processes. The third section reviews functional dose of RBC transfusions and transfusion practice in various clinical settings.

Deception Rand Paul,2023-10-10 Senator Rand Paul was on to Anthony Fauci from the start. Wielding previously unimaginable power, Fauci misled the country about the origins of the Covid pandemic and shut down scientific dissent. One of the few leaders who dared to challenge America's Doctor was Senator Rand Paul, himself a physician. Deception is his indictment of the catastrophic failures of the public health bureaucracy during the pandemic. Senator Paul presents the evidence that: The Covid virus was likely the product of gain-of-function research at the Wuhan lab in China—research funded in part by the U.S. government. Taxpayer dollars for that research were deceptively funneled to Wuhan without the required regulatory review. Fauci and his scientific yes-men knew from day one about Covid's origin and tried to cover it up. Fauci and his allies ruthlessly attacked everyone—including highly qualified scientists—who threatened to reveal the truth about the pandemic. Why? Hundreds of millions of dollars of grants and unreported royalties were at stake, and heads would roll if the truth got out. It almost worked. At Fauci's insistence, the government imposed needlessly extreme lockdowns on Americans at the cost of immense personal and economic destruction. Covid-19 was deadly, but the real killer was the coverup, led by America's most durable medical bureaucrat—a man for whom the truth was too often expendable. Senator Paul makes a powerful case that funding dangerous bioengineering in a totalitarian country is madness. If we don't heed this warning, the next pandemic could be far worse.

Lethal Imagination Michael A. Bellesiles,1999-03 Examining the role of violence in America's past, this collection of essays explores its history and development from slave patrols in the colonial South to gun ownership in the 20th century. The contributors focus not only on individual acts such as domestic violence, murder, duelling, frontier vigilantism and rape, but also on group and state-led acts such as lynchings, slave uprisings, the establishment of rifle clubs, legal sanctions of heterosexual aggression, and invasive medical experiments on women's bodies.

The Dogs that Follow Their Detective Dreams # 2: the Mystery of the Stolen Gemstones Kitty Katie Can 2. Sarah Cantu,Sarah Cantu,2007-08-01 If you've read the first book of The Dogs that Follow their Detective Dreams, you'll enjoy this one. After the eight dogs find a new home, they have to solve a mystery for the first time. While California's famous sleuths are away on vacation, it's up to these puppies to step up and save the county. Their town's local museum has been robbed. But not long ago, the museum was robbed of some valuables and restored by the Feline & K9 Companions. It is about time that these eight dogs learn more about the past of the museum's first robbery before dealing with the second. But trouble awaits and these pups are about to take some pretty dangerous risks. Without a doubt, hopefully they will solve safely and save the county. Or will these plans interfere? Learn how a first experience may lead you more than where you expect to go.

High Definition Television Philip J. Cianci,2014-01-10 The 40-year history of high definition television technology is traced from initial studies in Japan, through its development in Europe, and then to the United States, where the first all-digital systems were implemented. Details are provided about advances in HDTV technology in Australia and Japan, Europe's introduction of HDTV, Brazil's innovative use of MPEG-4 and China's terrestrial standard. The impact of HDTV on broadcast facility conversion and the influx of computer systems and information technology are described, as well as the contributions of the first entrepreneurial HD videographers and engineers. This thoroughly researched volume highlights several of the landmark high-definition broadcasts from 1988 onward, includes input gathered from more than 50 international participants, and concludes with the rollout of consumer HDTV services throughout the world.
