- 🔍 **Lissiidiology Vol 11. Energy and Biological Aspects of Self-Consciousness Refocusings** Oris Oris,2013-03-09 In the first chapter of Volume 11 (the 7th chapter of Commentaries to Fundamentals of Lissiidiology), Oris describes in detail functioning of formo-creators of the brain, how the memory is accessed, how biological structures of the brain are associated with energy-information structures of self-consciousness, how various self-consciousness levels are differentiated and reprojected at the moment of so-called “death”. This chapter also describes functioning of “the intestinal brain”, how it is possible to cure at a distance (the technique of ethereal projection), gives the meaning of the esoteric term “astral plane” from the point of view of lissiidiology. The second chapter tells us that biological forms can exist in different continuums and explains the interrelationship between our lifespan and quality of active levels of our self-consciousness. It also provides information on the following subjects: it is possible to “live one’s life many times” in higher-quality scenarios, cycles of changing male and female manifestations within the structure of a multidimensional human form, physical principles of organization of higher-frequency levels of the universal reality with a detailed description of the nature of boson and fermion fields, and types of particles that are carriers of such interaction.
- 🔍 **B-sides, Undercurrents and Overtones** George Plasketes,2009 There are undercurrents and peripheral taste preferences that are a defining part of our individual and collective cultural experience. Music is no exception. This book adapts the ‘A-side/B-side’ dichotomy from the 45 r p m for use as a conceptual, historical, and cultural framework for threading together popular music and media texts.

Music is a human activity which involves structured and audible sounds, which is used for artistic or aesthetic, entertainment, or ceremonial purposes. The traditional or classical European aspects of music often listed are those elements given primacy in European-influenced classical music: melody, harmony, rhythm, tone color/timbre, and form. A more comprehensive list is given by stating the aspects of sound: pitch, timbre, loudness, and duration. Common terms used to discuss particular pieces include melody, which is a succession of notes heard as some sort of unit; chord, which is a simultaneity of notes heard as some sort of unit; chord progression, which is a succession of chords (simultaneity succession); harmony, which is the relationship between two or more pitches; counterpoint, which is the simultaneity and organization of different melodies; and rhythm, which is the organization of the durational aspects of music.
