The Business of iPhone App Development Dave

Wooldridge,Michael Schneider,2010-08-26 The phenomenal success of the iPhone and the iPod touch has ushered in a “gold rush” for developers, but with well over 100,000 apps in the highly competitive App Store, it has become increasingly difficult for new apps to stand out in the crowd. Achieving consumer awareness and sales longevity for your iPhone app requires a lot of organization and some strategic planning. This book will show you how to incorporate marketing and business savvy into every aspect of the design and development process, giving your app the best possible chance of succeeding in the App Store. The Business of iPhone App Development was written by experienced developers with business backgrounds, taking you step-by-step through cost-effective marketing techniques that have proven successful for

professional iPhone app creators—perfect for independent developers on shoestring budgets. Although there are a few iPhone app marketing books on the horizon, they appear to tackle the subject from purely a marketer’s perspective. What makes this book unique is that it was written by developers for developers, showing you not only what to do, but also how to do it, complete with time-saving resources and ready-to-use code examples. No prior business knowledge is required. This is the book you wish you had read before you launched your first app!

Creator Culture Stuart Cunningham, David Craig, 2021-06-22
Explores new perspectives on social media entertainment There is a new class of cultural producers—YouTube vloggers, Twitch

gameplayers, Instagram influencers, TikTokers, Chinese wanghong, and others—who are part of a rapidly emerging and highly disruptive industry of monetized “user-generated” content. As this new wave of native social media entrepreneurs emerge, so do new formations of culture and the ways they are studied. In this volume, contributors draw on scholarship in media and communication studies, science and technology studies, and social media, Internet, and platform studies, in order to define this new field of study and the emergence of creator culture. *Creator Culture* introduces readers to new paradigms of social media entertainment from critical perspectives, demonstrating both relations to and differentiations from the well-established media forms and institutions traditionally within the scope of media studies. This volume does not seek to impose a uniform perspective; rather, the goal is to stimulate in-depth, globally-focused engagement with this burgeoning industry and establish a dynamic research agenda for scholars, teachers, and students, as well as creators and professionals across the media, communication, creative, and social media industries. Contributors include: Jean Burgess, Zoë Glatt, Sarah Banet-Weiser, Brent Luvaas, Carlos A. Scolari, Damián Fraticelli, José M. Tomasena, Junyi Lv, Hector Postigo,

Brooke Erin Duffy, Megan Sawey, Jarrod Walzcer, Sangeet Kumar, Sriram Mohan, Aswin Punathambekar, Mohamed El Marzouki, Elaine Jing Zhao, Arturo Arriagada, Jeremy Shtern, Stephanie Hill

Engaged Journalism Jake Batsell, 2015-02-03 Engaged

Journalism explores the changing relationship between news producers and audiences and the methods journalists can use to secure the attention of news consumers. Based on Jake Batsell's extensive experience and interaction with more than twenty innovative newsrooms, this book shows that, even as news organizations are losing their agenda-setting power, journalists can still thrive by connecting with audiences through online technology and personal interaction. Batsell conducts interviews with and observes more than two dozen traditional and startup newsrooms across the United States and the United Kingdom. Traveling to Seattle, London, New York City, and Kalamazoo, Michigan, among other locales, he attends newsroom meetings, combs through internal documents, and talks with loyal readers and online users to document the successes and failures of the industry's experiments with paywalls, subscriptions, nonprofit news, live events, and digital tools including social media, data-driven interactives, news games, and comment forums. He ultimately concludes that, for news

providers to survive, they must constantly listen to, interact with, and fulfill the specific needs of their audiences, whose attention can no longer be taken for granted. Toward that end, Batsell proposes a set of best practices based on effective, sustainable journalistic engagement.
