Geometric Programming for Communication Systems Mung Chiang, 2005 Recently Geometric Programming has been applied to study a variety of problems in the analysis and design of communication systems from information theory and queuing theory to signal processing and network protocols. Geometric Programming for Communication Systems begins its comprehensive treatment of the subject by providing an in-depth tutorial on the theory, algorithms, and modeling methods of Geometric Programming. It then gives a systematic survey of the applications of Geometric Programming to the study of communication systems. It collects in one place various published results in this area, which are currently scattered in several books and many research papers, as well as to date unpublished results. Geometric Programming for Communication Systems is intended for researchers and students who wish to have a comprehensive starting point for understanding the theory and applications of geometric programming in communication systems.

Software Abstractions Daniel Jackson, 2012 An approach to software design that introduces a fully automated analysis giving designers immediate feedback, now featuring the latest version of the Alloy language. In Software Abstractions Daniel Jackson introduces an approach to software design that

draws on traditional formal methods but exploits automated tools to find flaws as early as possible. This approach—which Jackson calls “lightweight formal methods” or “agile modeling”—takes from formal specification the idea of a precise and expressive notation based on a tiny core of simple and robust concepts but replaces conventional analysis based on theorem proving with a fully automated analysis that gives designers immediate feedback. Jackson has developed Alloy, a language that captures the essence of software abstractions simply and succinctly, using a minimal toolkit of mathematical notions. This revised edition updates the text, examples, and appendixes to be fully compatible with Alloy 4.

Vessel Health and Preservation: The Right Approach for Vascular Access

Nancy L. Moureau, 2019-06-10 This Open access book offers updated and revised information on vessel health and preservation (VHP), a model concept first published in poster form in 2008 and in JVA in 2012, which has received a great deal of attention, especially in the US, UK and Australia. The book presents a model and a new way of thinking applied to vascular access and administration of intravenous treatment, and shows how establishing and maintaining a route of access to the bloodstream is essential for patients in acute care today. Until now, little thought has been given to an intentional process to guide selection, insertion and management of vascular access devices (VADs) and by default actions are based on crisis management when a quickly selected VAD fails. The book details how VHP establishes a framework

or pathway model for each step of the patient experience, intentionally guiding, improving and eliminating risk when possible. The evidence points to the fact that reducing fragmentation, establishing a pathway, and teaching the process to all stakeholders reduces complications with intravenous therapy, improves efficiency and diminishes cost. As such this book appeals to bedside nurses, physicians and other health professionals.

Becoming Wild Carl Safina, 2020-04-14 A NEW YORK TIMES NOTABLE BOOK OF 2020 In this superbly articulate cri de coeur, Safina gives us a new way of looking at the natural world that is radically different.--The Washington Post New York Times bestselling author Carl Safina brings readers close to three

non-human cultures—what they do, why they do it, and how life is for them. A New York Times Notable Books of 2020 Some believe that culture is strictly a human phenomenon. But this book reveals cultures of other-than-human beings in some of Earth's remaining wild places. It shows how if you're a sperm whale, a scarlet macaw, or a chimpanzee, you too come to understand yourself as an individual within a particular community that does things in specific ways, that has traditions. Alongside genes, culture is a second form of inheritance, passed through generations as pools of learned knowledge. As situations change, social learning—culture—allows behaviors to adjust much faster than genes can adapt. *Becoming Wild* brings readers into intimate proximity with various nonhuman individuals in their free-living communities. It presents a revelatory account of how animals function beyond our usual view. Safina shows that for non-humans and humans alike, culture comprises the answers to the question, "How do we live here?" It unites individuals within a group identity. But cultural groups often seek to avoid, or even be hostile toward, other factions. By showing that this is true across species, Safina illuminates why human cultural tensions remain maddeningly intractable despite the arbitrariness of many of our differences. *Becoming Wild* takes readers behind the curtain of life on Earth, to witness from a new vantage point the most world-saving of perceptions: how we are all connected.

Tensors: Geometry and Applications J. M. Landsberg,2011-12-14 Tensors are ubiquitous in the sciences. The geometry of tensors is both a powerful tool for extracting information from data sets, and a beautiful subject in its own right. This book has three intended uses: a classroom textbook, a reference work for researchers in the sciences, and an account of classical and modern results in (aspects of) the theory that will be of interest to researchers in

geometry. For classroom use, there is a modern introduction to multilinear algebra and to the geometry and representation theory needed to study tensors, including a large number of exercises. For researchers in the sciences, there is information on tensors in table format for easy reference and a summary of the state of the art in elementary language. This is the first book containing many classical results regarding tensors. Particular applications treated in the book include the complexity of matrix multiplication, P versus NP, signal processing, phylogenetics, and algebraic statistics. For geometers, there is material on secant varieties, G-varieties, spaces with finitely many orbits and how these objects arise in applications, discussions of numerous open questions in geometry arising in applications, and expositions of advanced topics such as the proof of the Alexander-Hirschowitz theorem and of the Weyman-Kempf method for computing syzygies.

Political Advertising in the United States Erika Franklin Fowler, Michael M. Franz, Travis N. Ridout, 2021-11-24 Political Advertising in the United States examines the volume, distribution, content, and effects of political advertising in congressional and presidential elections. The book considers the role of television ads using extensive data on ad airings on local broadcast stations. It also analyzes newly available data on paid digital ads, including ads on Facebook, Instagram, Google, and YouTube. The book covers the role of outside groups in airing ads, including the rise of dark

money groups and gaps in existing federal campaign finance laws around transparency of outside group spending. The authors consider how ad sponsors design and target ads. They also review the positive and negative implications of an electoral system where billions are spent on paid advertising. With detailed analysis of presidential and congressional campaign ads and discussion questions in each chapter, this accessibly written book is a must-read for students, scholars, and practitioners who want to understand the ins and outs of political advertising. New to the Second Edition • Covers the spending, content, and tone of political advertising in the 2016 and 2020 presidential elections and the 2018 midterms, looking ahead to 2022 and 2024. • Addresses the interference of foreign actors in elections and their connection to political advertising. • Expands the discussion of digital political advertising and incorporates this topic into every chapter. • Adds a new chapter specifically addressing digital ad content and spending. • Includes data from the Facebook, Google, and Snapchat ad libraries and explores the role of these companies in regulating the sale of political advertising. • Incorporates new data on the effects of race and gender in advertising, including what is known about the way in which advertising may activate prejudicial attitudes.

Life Cycle Impact Assessment Michael Z. Hauschild, Mark A.J. Huijbregts, 2015-03-24 This book offers a detailed presentation of the principles and practice of life cycle impact assessment. As a volume of the LCA compendium, the book is structured according to the LCIA framework developed by the International Organisation for Standardisation (ISO) passing through the phases of definition or selection of impact categories, category indicators and characterisation models (Classification); calculation of category indicator results (Characterisation); calculating the magnitude of category indicator results relative to reference information (Normalisation); and converting indicator results of different impact categories by using numerical factors based on value-choices (Weighting). Chapter one offers a historical overview of the development of life cycle impact assessment and

presents the boundary conditions and the general principles and constraints of characterisation modelling in LCA. The second chapter outlines the considerations underlying the selection of impact categories and the classification or assignment of inventory flows into these categories. Chapters three through thirteen explore all the impact categories that are commonly included in LCIA, discussing the characteristics of each followed by a review of midpoint and endpoint characterisation methods, metrics, uncertainties and new developments, and a discussion of research needs. Chapter-length treatment is accorded to Climate Change; Stratospheric Ozone Depletion; Human Toxicity; Particulate Matter Formation; Photochemical Ozone Formation; Ecotoxicity; Acidification; Eutrophication; Land Use; Water Use; and Abiotic Resource Use. Thank You for My Service Mat Best, Ross Patterson, Nils Parker, 2019-08-20 NEW YORK TIMES BESTSELLER • The unapologetic, laugh-your-ass-off military memoir both vets and civilians have been waiting for, from a five-tour Army Ranger turned YouTube phenomenon and zealous advocate for veterans Members of the military's special operations branches share a closely guarded secret: They love their jobs. They relish the opportunity to fight. They are thankful for it, even, and hopeful that maybe, possibly, they'll also get to kill a bunch of bad guys while they're at it. You don't necessarily need to thank them for their service—the pleasure is all theirs. In this hilarious and personal memoir, readers ride shotgun alongside former Army Ranger and private military contractor and current social media phenomenon Mat Best, into the action and its aftermath, both abroad and at home. From surviving a skin infection in the swampy armpit of America (aka Columbus, Georgia) to kicking down doors on the outskirts of Ramadi, from blowing up a truck full of enemy combatants to witnessing the effects of a suicide bombing right in front of your face, *Thank You for My Service* gives readers who love America and love the good guys fresh insight into what it's really like inside the minds of the men and women on the front lines. It's also a sobering yet steady

glimpse at life for veterans after the fighting stops, when the enemy becomes self-doubt or despair and you begin to wonder why anyone should be thanking you for anything, least of all your service. How do you keep going when something you love turns you into somebody you hate? For veterans and their friends and families, Thank You for My Service will offer comfort, in the form of a million laughs, and counsel, as a blueprint for what to do after the war ends and the real fight begins. And for civilians, this is the insider account of military life you won't find anywhere else, told with equal amounts of heart and balls. It's Deadpool meets Captain America, except one went to business school and one went to therapy, and it's anyone's guess which is which.
