The Cold Snap Edward Bellamy,2023-01-05 'The Cold Snap' (1898) is a short story by the American author, Edward Bellamy, most famous for his socialist and utopian novel 'Looking Backward: 2000-1887' (1888) This tale eloquently describes a bitterly cold night that befalls a family living in New England, as they huddle together for survival and await the safety of sunrise. It is a tender, romantic depiction of family life and the power of the weather. This heartwarming short story is perfect for fans of Bellamy's other short stories, such as 'Hooking Watermelons', 'Lost' and 'A Love Story Reversed'. Edward Bellamy (1850 - 1898) was an American author, journalist and political activist. His novel 'Looking Backward: 2000-1887' (1888) was one of the most successful books published in the United States in the 19th century and influenced a generation of intellectuals. Referenced in many Marxist publications of the time, the book inspired the formation of Nationalist Clubs dedicated to spreading his political ideas. Bellamy's other works include the novels 'Six to One' (1878), 'Dr. Heidenhoff's Process' (1880), 'Miss Ludington's Sister' (1885), 'Equality' (1897) and 'The Duke of Stockbridge; a Romance of Shays' Rebellion (1900)', as well as several short stories, such as 'The Blindman's World', 'To Whom This May Come', and 'With the Eyes Shut'.

Cold Snap Marc Cameron,2023-03-28 Cameron's books are riveting page-turners. -- Mark Greaney, #1 New York Times bestselling author The bestselling author of the latest Tom Clancy, Jack Ryan novels delivers an adrenaline-filled new thriller featuring Deputy US Marshal Arliss Cutter! Stranded with three violent prisoners in the deadly Alaskan wilderness, Cutter will become the hunter and the hunted... An Instant USA Today Bestseller After an early spring thaw on the Alaskan coast, Anchorage police discover a gruesome new piece of evidence in their search for a serial killer: a dismembered human foot. In Kincaid Park, a man is arrested for attacking a female jogger. Investigators believe they have finally have their suspect. But one deputy is sure they have the wrong man. In the remote northern town of Deadhorse, Alaska, Supervisory Deputy US Marshal Arliss Cutter escorts four very dangerous handcuffed prisoners onto a small bush plane en route to Fairbanks. Cutter's expecting a routine mission and a nonstop flight--or so he thinks. When the plane goes down in the wilderness, all hell breaks loose. The prisoners murder the pilot and a guard and torch the plane. But their nightmare's just beginning. Back in Anchorage, deputy Lola Teariki has traced the dismembered foot to a missing girl--and the serial psychopath who slaughtered her. It's one of the prisoners on Cutter's flight... Now it's a deadly game of survival. With no means of communication, few supplies, and

ravenous grizzly bears and wolves lurking in the shadows, Cutter has to battle the unforgiving elements while the killer wants his head on a stick. Here in Alaska, nature can be cruel--but this time, human nature is crueler... Well-developed characters complement the nonstop action. Cameron viscerally conveys Alaska's austere beauty as well as its unexpected dangers. --Publishers Weekly

Forecast Joe Shute,2021-06-24 Join Joe Shute as he travels across Britain tracing the history of our seasons and discovering how they are changing. We talk about them. We plan our lives around them. The changing seasons are part of us all. But what happens when the weather changes beyond recognition? Joe Shute has spent years unpicking Britain's love affair with the weather, poring over the centuries of folklore, customs and rituals our seasons have inspired. But in recent years Shute has noticed a curious thing: the British seasons are changing far faster and far more profoundly than we realise. Daffodils in December, frogspawn in November, swallows that no longer fly home, floods, wildfires and winters without snow. Nothing is behaving as it should, sending nature into an increasing state of flux. In *Forecast*, Shute travels all over Britain tracing the history of

the seasons, and discovering the extent to which we are now growing disconnected from them. While documenting these warped rhythms caused by the changing weather, he records the parallels in his personal journey as he and his wife struggle to conceive a child. This is a book that races to keep up with the march of the seasons as they rapidly change course. It examines how the weather is reshaping the world around us, and asks what happens to centuries of culture, memory and identity when the very thing they subsist on is slipping away.

The Day the War Ended Martin Gilbert,2007-04-01 One of Britain's most acclaimed historians presents the experiences and ramifications of the last day of World War II in Europe May 8, 1945, 23:30 hours: With war still raging in the Pacific, peace comes at last to Europe as the German High Command in Berlin signs the final instrument of surrender. After five years and eight months, the war in Europe is officially over. This is the story of that single day and of the days leading up to it. Hour by hour, place by place, this masterly history recounts the final spasms of a continent in turmoil. Here are the stories of combat soldiers and ordinary civilians, collaborators and resistance fighters, statesmen and war criminals, all recounted in vivid, dramatic detail. But this is more than a moment-by-moment account, for Sir Martin Gilbert uses every event as a point of departure, linking each to its long-term consequences over the following half century. In our attempts to understand the world we inherited in 1945, there is no better starting point than *The Day the War Ended*.
