The Greened House Effect Jeff Wilson, 2013-05-24 With greater public awareness of the need for energy independence, the issue of how we can make our existing homes more resource efficient is becoming ever more critical. Residential buildings make up a large fraction of our energy needs, largely due to heating and air-conditioning. So it's no longer enough to simply do the small stuff, like switching to compact fluorescent bulbs, or turning down the thermostat at night. In *The Greened-House Effect*, author Jeff Wilson brings his twenty-five years of construction experience and knowledge of home building to bear on making our current houses cleaner, greener, and healthier. Think of a deep-energy retrofit (DER) as a home makeover - one that represents a significant investment, but that saves money from the get-go by capturing the energy you drop on the ground every month, every year, through inefficiency, poor design, or simply living in a typical older home. Using his own family's DER of their 1942 home as a prime example, Wilson weaves a readable narrative at a practical, hammer-and-nail level. He presents the solutions to our building and energy problems, making them seem possible for average homeowners and small contractors by offering the right set of information, skills, and materials. More technical information is presented in sidebars and graphs, and numerous color photos illustrate the process, including: Testing the energy efficiency of your home and learning where improvements need to be made Issues of local building codes and regulations Financing and paying for a DER Major components of the DER, such as roofs, exterior walls, basements, and home systems Wilson's building experience, along with his lifelong passion for energy issues, all come together to form an inspirational, can-do approach to making our neighborhood, our community, our nation, and our world a better place - one home at a time.

Fluorescent thermal imaging method for investigating transient effects in high-temperature superconductor tapes and coils Gyuráki, Roland, 2022-02-24 This work presents the development and application of high-speed fluorescent thermal imaging for quench analysis in high-temperature superconductors (HTS). Using a fluorescent coating, with a temperature-dependent light emission, temperature changes can be calculated over 2D surfaces. The technique uncovered peculiar transient effects in novel HTS tape architectures and also helped to verify and better understand hot spot development in both insulated and non-insulated, HTS-wound pancake coils.

Thermal Imaging Techniques to Survey and Monitor Animals in the Wild Kirk J Havens, Edward J. Sharp, 2015-09-22 Thermal Imaging Techniques to Survey and Monitor Animals in the Wild: A Methodology provides a manual for anyone interested in understanding thermal imaging and its usefulness in solving a wide range of problems regarding the observation of wildlife. In the last decade, the cost of thermal imaging technology has significantly decreased, making the equipment more widely available. This book offers an overview of thermal physics and the thermal imager, along with a methodology to optimize the window of opportunity so that wildlife can be observed and studied in their natural habitat. Users will find the knowledge and tools to formulate a sound survey design, with detailed sections on the theory and performance characteristics of thermal imaging cameras utilizing cooled quantum detectors as the sensitive element and additional information on the uncooled micro bolometric imagers which have been introduced into the camera market in past decades. The methodology presented is logical and simple, yet it presents a detailed understanding of the topic and how it applies to the critically interlinked disciplines of biology, physics, micrometeorology, and animal physiology. Covers the technical aspects of thermal imaging allowing readers to design better experiments Provides a clear description of the properties of thermal imaging Includes approaches to consider before integrating thermal cameras into a field
