**Black Dionysus** Kevin J. Wetmore, Jr., 2010-03-22 Many playwrights, authors, poets and historians have used images, metaphors and references to and from Greek tragedy, myth and epic to describe the African experience in the New World. The complex relationship between ancient Greek tragedy and modern African American theatre is primarily rooted in America, where the connection between ancient Greece and ancient Africa is explored and debated the most. The different ways in which Greek tragedy has been used by playwrights, directors and others to represent and define African American history and identity are explored in this work. Two models are offered for an Afro-Greek connection: Black Orpheus, in which the Greek connection is metaphorical, expressing the African in terms of the European; and Black Athena, in which ancient Greek culture is reclaimed as part of an Afrocentric tradition. African American adaptations of Greek tragedy on the continuum of these two models are then discussed, and plays by Peter Sellars, Adrienne Kennedy, Lee Breuer, Rita Dove, Jim Magnuson, Ernest Ferlita, Steve Carter, Silas Jones, Rhodessa Jones and Derek Walcott are analyzed. The concepts of colorblind and nontraditional casting and how such practices can shape the reception and meaning of Greek tragedy in modern American productions are also covered.

The Theology of Battlestar Galactica Kevin J. Wetmore, Jr.,2014-01-10 The reimagined television series Battlestar Galactica (2005 to 2009 on the Sci Fi Channel), features religion and theology among its central concerns—but does not simply use its myriad faiths as plot devices or background material. Battlestar Galactica is, in and of itself, a theological text. Over the course of 87 episodes and two television movies, the series’ narrative arc explores the meanings of salvation, prophecy, exile, apocalypse, resurrection, and messianism, and clearly demonstrates the working of a divine will in a material world. The book offers a systematic theology for each of Battlestar Galactica’s invented religions and surveys echoes of American Christianity in the groundbreaking series.

**Heartwarming: How Our Inner Thermostat Made Us Human** Hans Rocha IJzerman,2021-02-02 An illuminating investigation of core body temperature regulation and its powerful effect on human civilization. A hot cup of tea, coffee, or cocoa is calming and comforting—but how can holding a warm mug affect our emotions? In Heartwarming, social psychologist Hans Rocha IJzerman explores temperature through the long lens of evolution. Besides breathing, regulating body temperature is one of the most fundamental tasks for any animal. Like huddling penguins, we humans have long relied on one another to maintain our temperatures; over millennia, this instinct for thermoregulation has shaped our lives and culture. Temperature contributed to our evolution—our upright walking, our loss of fur, and our big brains—and now continues to affect our lives in unexpected ways, and the link from a warm mug to our emotions is anything but straightforward. Studies have shown, for example, that a chilly

deliberation room can predispose a jury to convict and that a cold day can make us more likely to buy a house. Our mind-body connection works the other way, too: thinking about friendly or caring people can make us feel warmer. Understanding how we subconsciously strive to keep our temperature in an optimal range can help us in our relationships, jobs, and even in the world of social media. As IJzerman illuminates how temperature affects human sociality, he examines fascinating new questions: How will climate change impact society? Why are some people chronically cold, and others overheated? Can thermoregulation keep relationships closer, even across a distance? The answers offer new insights for all of us who want to better understand our bodies, our minds, and each other. Heartwarming takes readers on an engaging journey through the world, seen from the perspectives of coldness and warmth.

**The Complete Talking Heads** Alan Bennett, 2010-04-01 Alan Bennett's award-winning series of solo pieces is a classic of contemporary drama, universally hailed for its combination of razor-sharp wit and deeply felt humanity. In *Bed Among the Lentils*, a vicar's wife discovers a semblance of happiness with an Indian shop owner. In *A Chip in the Sugar*, a man's life begins to unravel when he discovers his aging mother has rekindled an old

flame. In *A Lady of Letters*, a busybody pays a price for interfering in her neighbor's life. First produced for BBC television in 1988 to great critical acclaim, the Talking Heads monologues also appeared on the West End Stage in London in 1992 and 1998. In 2002, seven of the pieces were performed at the Tiffany Theater in Los Angeles for a highly praised brief engagement, and in 2003 a selection of the monologues premiered in New York at the Minetta Lane Theatre. These extraordinary portraits of ordinary people confirm Alan Bennett's place as one of the most gifted, versatile, and important writers in the English Language.

*Winter World* Bernd Heinrich, 2009-10-13 From flying squirrels to grizzly bears, and from torpid turtles to insects with antifreeze, the animal kingdom relies on some staggering evolutionary innovations to survive winter. Unlike their human counterparts, who must alter the environment to accommodate physical limitations, animals are adaptable to an amazing range of conditions. Examining everything from food sources in the extremely barren winter land-scape to the chemical composition that allows certain creatures to survive, Heinrich's *Winter World* awakens the largely undiscovered mysteries by which nature sustains herself through winter's harsh, cruel exigencies.

**Hot, Flat, and Crowded** Thomas L. Friedman, 2009-11-05 Thomas L. Friedman's phenomenal number-one bestseller *The World is Flat* has helped millions of readers see the world in a new way. In this essential new book, Friedman takes a fresh and provocative look at two of the biggest challenges we face today: the global environmental crisis and America's surprising loss of focus and national purpose since 9/11. It is a groundbreaking account of where we stand now, and he shows us how the solutions to these two big problems are linked - how we can restore the world and revive America at the same time. Friedman explains how global warming, rapidly growing populations, and the astonishing expansion of the world's middle class through globalization have produced a planet that is 'hot, flat, and crowded'. In just a few years, it will be too late to fix things - unless there is a worldwide effort to replace our wasteful, inefficient energy practices with a strategy for clean energy, energy efficiency, and conservation that Friedman calls Code Green. This is a great challenge, Friedman explains, but also a great opportunity, and one that we cannot afford to miss. He argues that this cannot happen without American commitment and leadership. In vivid, entertaining chapters, Friedman makes it clear that the green revolution we need is like no revolution the world has seen. It will be the biggest innovation project in history; it will be hard, not easy; and it will change everything, from what you put into your car to what you see on your electric bill. But the payoff will be more than just cleaner air. It will inspire us to summon all the intelligence, creativity, boldness and concern for the common good that are our greatest human resources. *Hot, Flat, and Crowded* is classic Thomas L. Friedman: fearless, incisive, forward-looking, and rich in surprising common sense about the challenge - and the promise - of the future.
