**Google Apps Deciphered** Scott Granneman,2008-12-04 This is the eBook version of the printed book. If the print book includes a CD-ROM, this content is not included within the eBook version. Google Apps Deciphered Compute in the Cloud to Streamline Your Desktop Use Google Apps to Improve Productivity and Collaboration, Reduce Costs, and Eliminate Technology Hassles! Google Apps gives you virtually all the business and productivity software you need—all of it free, or available at extremely low cost. Because the suite of Google Apps runs on Google's network in the cloud, you avoid the hassles that go with desktop software. Getting started with Google Apps is easy—but if you want to make the most of it, you'll need expert guidance that Google's online help doesn't provide. Get all the help you need, right here. This is your start-to-finish guide to setting up Google Apps, migrating to it, customizing it, and using it to improve productivity, communications, and collaboration. Scott Granneman introduces every leading component individually, and shows exactly how to make them work together for you on the web or by integrating them with your favorite desktop apps. You'll find practical insights on Google Apps email, calendaring, contacts, wikis, word processing, spreadsheets, presentations, video, and even Google's new web browser Chrome. And, drawing on his extensive experience helping companies move to Google Apps, Granneman presents tips and tricks you simply won't find anywhere else. Coverage includes • Choosing the right edition of Google Apps for you • Setting up Google Apps so it will be easier to use and manage • Migrating your email, contacts, and calendars to Google Apps • Administering and securing Google Apps • Integrating Google Apps with other software and services • Leveraging Google Sites to collaborate across teams, organizations, or the entire world • Making the most of Google Talk voice calls and instant messaging • Implementing Google's office productivity tools, including Docs, Spreadsheets, and Presentations • Using policy management and message recovery to control and secure your messaging • Customizing efficient Google Apps Start Pages for you and your colleagues • Sharing important and useful videos with your colleagues • Maximizing the innovative features of Google's new web browser, Chrome SCOTT GRANNEMAN is an author, teacher, and entrepreneur with extensive experience in Google Apps migration, setup, and training. As Adjunct Professor at Washington University, he teaches popular courses on technology, security, and the Internet. A monthly columnist for SecurityFocus and Linux Magazine, he has authored four books on open source technologies, including The Linux Phrasebook. As a principal at WebSanity, he manages the firm's UNIX server environment, and helps develop its Content Management System, which is used by educational, business, and non-profit clients nationwide. www.1and100zeroes.com

<u>Wicked, Incomplete, and Uncertain</u> Jason Swarts,2018-09-01 Technology users are compulsive integrators, hybridizers, and bricoleurs, whose unpredictable applications and innovations create a challenging task for support-documentation writers. In Wicked, Incomplete, and Uncertain, Jason Swarts shows how to document technologies that may hybridize into forms that not even their designers would have anticipated and offers insight into the evolving role of a technical writer in an age of increasing user reliance on YouTube tutorials, message boards, and other resources for guidance. Technical writers traditionally create large volumes of idealized tasks and procedures in help documentation, but this is no longer the only approach, or even the best approach. Shifting responsibility for user support to users via crowdsourcing is a risky alternative. Just as with other mass-collaborative enterprises, contributors to a forum may not be aware of the kind of knowledge they are creating or how their contributions connect with those made by others. Wicked, Incomplete, and Uncertain describes the kinds of writing and help practices in which user forums engage, why users seem to find these forums credible and appealing, and what companies can learn about building user communities to support this form of assistance. Through investigation of user-forum activities, Swarts identifies a new set of contributions that technical communicators can make—not only by creating content but also by curating content, shaping conversations, feeding information back into the user community, and opening channels of discovery and knowledge creation that can speak to users and software developers alike

**Everything for Everyone** Nathan Schneider,2018-09-11 The origins of the next radical economy is rooted in a tradition that has empowered people for centuries and is now making a comeback. A new feudalism is on the rise. While monopolistic corporations feed their spoils to the rich, more and more of us are expected to live gig to gig. But, as Nathan Schneider shows, an alternative to the robber-baron economy is hiding in plain sight; we just need to know where to look. Cooperatives are jointly owned, democratically controlled enterprises that advance the economic, social, and cultural interests of their members. They often emerge during moments of crisis not unlike our own, putting people in charge of the workplaces, credit unions, grocery stores, healthcare, and utilities they depend on. Everything for Everyone chronicles this revolution--from taxi cooperatives keeping Uber at bay, to an outspoken mayor transforming his city in the Deep South, to a fugitive building a fairer version of Bitcoin, to the rural electric co-op members who are propelling an aging system into the future. As these pioneers show, co-ops are helping us rediscover our capacity for creative, powerful, and fair democracy.
