Reinforcement Learning, second edition Richard S. Sutton,Andrew G. Barto,2018-11-13 The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis,

and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

Trap the Devil Ben Coes, 2017-06-20 WALL STREET JOURNAL BESTSELLER * USA TODAY BESTSELLER Intense and gripping...Coes' name should be on the lips of every reader who enjoys Vince Flynn and the Brads (Taylor and Thor). -Booklist (starred review) on Trap the Devil Only one man stands between a powerful cabal planning an invisible coup of the U.S. government and their

brutal goals—Dewey Andreas. A group of some of the most powerful people in the government, the military, and the private sector, has begun a brutal plan to quietly take over the reins of the U.S. government. They've begun to remove the people who stand in their way—and replace them with their own sympathizers and puppets. They've already taken out the Speaker of the House—whose death was made to look like an accidental drowning—and the president and vice president are next. Once they have their own people in place, they plan to start a bloody, brutal war on an unimaginable scale. On restricted duty while he recovers from injuries incurred on a previous mission, Dewey Andreas is sent to Paris by CIA Director Hector Calibrisi. The Secretary of State is going there for secret talks, and Dewey is to be an extra layer of security above the State Department team. But what should be an easy mission couldn't go more wrong. The cabal has sent in a hit man to take out the Secretary of State and lay the blame for this murder at the feet of Dewey himself. With the Secretary of State dead, shot by Dewey's weapon, Dewey is on the run and out in the cold, desperately trying to unravel the plot before the conspirators succeed in killing millions of innocents.
