The Just City Susan S. Fainstein,2011-05-16 For much of the twentieth century improvement in the situation of disadvantaged communities was a focus for urban planning and policy. Yet over the past three decades the ideological triumph of neoliberalism has caused the allocation of spatial, political, economic, and financial resources to favor economic growth at the expense of wider social benefits. Susan Fainstein's concept of the just city encourages planners and policymakers to embrace a different approach to urban development. Her objective is to combine progressive city planners' earlier focus on equity and material well-being with considerations of diversity and participation so as to foster a better quality of urban life within the context of a global capitalist political economy. Fainstein applies theoretical concepts about justice developed by contemporary philosophers to the concrete problems faced by urban planners and policymakers and argues that, despite structural obstacles, meaningful reform can be achieved at the local level. In the first half of *The Just City*, Fainstein draws on the work of John Rawls, Martha Nussbaum, Iris Marion Young, Nancy Fraser, and others to develop an approach to justice relevant to twenty-first-century cities, one that incorporates three central concepts: diversity, democracy, and equity. In the book's second half, Fainstein tests her ideas through case studies of New York, London, and Amsterdam by evaluating their postwar programs for housing and development in relation to the three norms. She concludes by identifying a set of specific criteria for urban planners and policymakers to consider when developing programs to assure greater justice in both the process of their formulation and their effects.

The Intermediality of Narrative Literature Jørgen Bruhn,2016-06-29 This book argues that narrative literature very often, if not always, include significant amounts of what appears to be extra-literary material – in form and in content – and that we too often ignore this dimension of literature. It offers an up to date overview and discussion of intermedial theory, and it facilitates a much-needed dialogue between the burgeoning field of intermedial studies on the one side and the already well-developed methods of literary analysis on the other. The book aims at working these two fields together into a productive working method. It makes evident, in a methodologically succinct way, the necessity of approaching literature with an intermedial terminology by way of a relatively simple but never the less productive three-step analytic method. In four in-depth case studies of Anglophone texts ranging from Nabokov, Chandler and Tobias Wolff to Jennifer Egan, it demonstrates that medialities matter.

Ultra-Solutions Paul Watzlawick,1988 In his international best seller, *The Situation Is Hopeless, But Not Serious*, Paul Watzlawick showed us how to become unhappiness experts. Now in a new volume he turns to our strivings for ultra-solutions--those final solutions that do away with the problem and just about everything else. (A perfect ultra-solution lies in that old medical joke: The operation was successful, but the patient died.)

The Essential Haiku Basho Matsuo,Issa Kobayashi,2013 *The Essential Haiku* brings together Robert Hass's

beautifully fresh translations of the three great masters of the Japanese haiku tradition: Matsuo Basho (1644-94), the ascetic and seeker, and the haiku poet most familiar to English readers; Yosa Buson (1716-83), the artist, a painter renowned for his visually expressive poetry; and Kobayashi Issa (1763-1827), the humanist, whose haiku are known for their poignant or ironic wit. Each haiku master's section of the book is prefaced with an eloquent and informative introduction by Robert Hass, followed by a selection of over 100 poems and then by other poetry or prose by the poet, including journals and nature writing. Opening with Hass's superb introductory essay on haiku, the book concludes with a section devoted to Basho's writings and conversations on poetry. The seventeen-syllable haiku form is rooted in a Japanese tradition of close observation of nature, of making poetry from subtle suggestion. Each haiku is a meditation, a centring, a crystalline moment of realisation. Reading them has a way of bringing about calm and peace within the reader. The symbolism of the seasons and the Japanese habit of mind blend together in these poems to create an alchemy of reflection that is unsurpassed in literature. Infused by its great practitioners with the spirit of Zen Buddhism, the haiku served as an example of the power of direct observation to the first generation of American modernist poets like Ezra Pound and William Carlos Williams as well as an example of spontaneity and Zen alertness to the new poets of post-war America and Britain. Universal in its appeal, Robert Hass's *The Essential Haiku* is the definitive introduction to haiku and its greatest poets, and has been a bestseller in America for twenty years. 'I know that for years I didn't see how deeply personal these poems were or, to say it another way, how much they have the flavour - Basho might have said the scent - of particular human life, because I had been told and wanted to believe that haiku were never subjective. I think it was D.H. Lawrence who said the soul can get to heaven in one leap but that, if it does, it leaves a demon in its place. Better to sink down through the level of these poems - their attention to the year, their ideas about it, the particular human consciousness the poems reflect, Basho's profound loneliness and sense of suffering, Buson's evenness of temper, his love for the materials of art and for the colour and shape of things, Issa's pathos and comedy and anger' - Robert Hass

The Life of Texts Kiene Brillenburg Wurth, Ann Rigney, 2019-11-08 This innovative introduction to literary studies takes 'the life of texts' as its overarching frame. It provides a conceptual and methodological toolbox for analysing novels, poems, and all sorts of other texts as they circulate in oral, print, and digital form. It shows how texts inspire each other, and how stories migrate across media. It explains why literature has been interpreted in different ways across time. Finally, it asks why some texts fascinate people so much that they are reproduced and passed on to others in the form of new editions, in adaptations to film and theatre, and, last but not least, in the ways we look at the world and act out our lives. The Life of Texts is designed around particular issues rather than the history of the discipline as such. Each chapter concentrates on a different aspect of 'the life of texts' and introduces the key debates and concepts relevant to its study. The issues discussed range from aesthetics and narrative to intertextuality and intermediality, from reading practices to hermeneutics and

semiotics, popular culture to literary canonisation, postcolonial criticism to cultural memory. Key concepts and schools in the field have been highlighted in the text and then collected in a glossary for ease of reference. All chapters are richly illustrated with examples from different language areas.
