**Beer in East Asia** Paul Chambers,Nithi Nuangjamnong,2023-03-17 Chambers, Nuangjamnong, and their contributors look at how the development of the beer industry in East Asia presents a unique opportunity for understanding the region's political economy. Asia is both the world's largest beer-consuming and beer-producing region, and the fastest growing beer market. Per-capita consumption is lower than Europe, but catching up fast. Beer consumption is also widely understood to correlate closely with economic growth and urbanization, much more so than other alcoholic beverages like spirits. With ten country case studies from both Northeast and Southeast Asia, the contributors to this volume look at the history of beer production and consumption across East Asia through a lens of historical institutionalism and political economy. In doing so they not only examine the development of the beer industry in the region but also what it tells us about the countries themselves. They ask questions such as: To what extent have state versus societal actors influenced the path of beer production? How has beer production changed? Was there a critical juncture at which beer production abruptly changed course? A valuable resource for students and scholars of modern East Asian History, and particularly those with a focus on colonial history, industrial history, and state-society relations.

**The Impostor Leaders** Enda M. Larkin,2021-03-25 Taking a novel approach to the subject of leadership, this book uses its dark side as a vehicle to highlight some important leadership lessons, helping all managers to reflect on their own performance. The Impostor Leaders clarifies what is meant by genuine leadership, focusing on the fact that leading and managing go hand in hand. Based on this ability to consistently combine the leadership and management roles, this book describes in detail and practical terms, using real-world examples, the range of good and bad leader-types seen in organizations today. The Leadership Wheel is also introduced as a conceptual framework to isolate eight types of leaders across four categories. Appealing to leaders and managers across industry sectors, this book's substantial analysis of bad leadership gives readers a tangible framework against which to consider their own capabilities.

**Kansas Beer** Bob Crutchfield,2019-02-18 Prohibition came early to Kansas in 1881, driving more than 125 breweries out of business or underground. Refusing to even vote on the 1933 national repeal, the state remained dry until 1948, with liquor by the drink finally being approved in 1987. Lawrence's Chuck Magerl worked with the legislature to pen new laws allowing something (little known at the time) called a microbrewery. Chuck started the state's first brewery in over a century, appropriately named Free State Brewing Company. John Dean of Topeka's Blind Tiger Brewery counts more awards than any other brewer in the state, including Champion Brewer at the World Beer Cup in 2014. Props & Hops Brewing, in tiny Sylvan Grove, is owned and operated by an enterprising pilot who also owns and operates a crop-dusting business on the weekdays. Author Bob Crutchfield explores the state's breweries and recounts the Sunflower State's hoppy history.

**The Heineken Story** Barbara Smit,2014-11-06 Heineken is known all around the world, but few of the drinkers who eagerly watch the foam rise in their glass have heard of the business ploys, marketing tricks and extraordinary characters that transformed the Dutch family business into a global brand. Taking us on a journey from a small brewery in Amsterdam in 1864 to the present day, The Heineken Story tells the remarkable and sometimes controversial true story of one of the world's largest brewing companies, and of Alfred 'Freddy' Heineken, the singular business man who secured its position. From spectacular takeovers and inspired marketing campaigns, to a kidnapping that brought in the largest ransom ever paid for an individual, this is a gripping account of the battle for the international beer market. Barbara Smit has experience writing on family drama, marketing and consumer

culture, and in *The Heineken Story* she has put together a narrative that is meticulously researched, and fizzing with competition, personalities and betrayal.

**Prohibition in Atlanta** Ron Smith, Mary O. Boyle, 2015-06-15 After the Civil War, state and national Prohibition galvanized in Atlanta the issues of classism, racism and anti-immigrant sentiment. While many consider flappers and gangsters the iconic images of the era, in reality, it was marked with temperance zealotry, blind tigers and white lightning. Georgia's protracted and intense battle changed the industrial and social landscapes of its capital city and unleashed a flood of illegal liquor that continually flowed in the wettest city in the South. Moonshine was the toast of the town from mill houses to the state capitol. The state eventually repealed prohibition, but the social, moral and legal repercussions still linger seventy years later. Join authors Ron Smith and Mary O. Boyle as they recount the colorful history of Atlanta's struggle to freely enjoy a drink.

**The Economics of Beer** Johan F. M. Swinnen, 2011-10-27 Beer has been consumed across the globe for centuries and was the drink of choice in many ancient societies. Today it is the most important alcoholic drink worldwide, in terms of volume and value. The largest brewing companies have developed into global multinationals, and the beer market has enjoyed strong growth in emerging economies, but there has been a substantial decline of beer consumption in traditional markets and a shift to new products. There is close interaction between governments and markets in the beer industry. For centuries, taxes on beer or its raw materials have been a major source of tax revenue and governments have regulated the beer industry for reasons related to quality, health, and competition. This book is the first economic analysis of the beer market and brewing industry. The introduction provides an economic history of beer, from monasteries in the early Middle Ages to the recent 'microbrewery movement', whilst other chapters consider whether people drink more beer during recessions, the effect of television on local breweries, and what makes a country a 'beer drinking' nation. It comprises a comprehensive and unique set of economic research and analysis on the economics of beer and brewing and covers economic history and development, supply and demand, trade and investment, geography and scale economies, technology and innovation, health and nutrition, quantity and quality, industrial organization and competition, taxation and regulation, and regional beer market developments.

Chapters examine topics such as government policies (e.g., taxation, legislation, regulations), how beer and beerscapes are presented and perceived (e.g., marketing, neolocalism, roles of women, use of media), and the importance of place (e.g., terroir of ingredients, social and economic impacts of beer, beer clubs). Collectively, the chapters underscore political, cultural, urban, and human-environmental geographies that underlie beer, brewing, and the beer industry.
