Communicating Science Toss Gascoigne,Bernard Schiele,Joan Leach,Michelle Riedlinger,Luisa Massarani,Bruce V. Lewenstein,Peter Broks,2020-09-14 Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession—and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research, and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around the globe in science centres, university courses and research, publications and conferences as well as tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to questions of the social place of science? Communicating Science describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that their science communication story has been told.

London's Urban Landscape Christopher Tilley, 2019-05-07 London's Urban Landscape is the first major study of a global city to adopt a materialist perspective and stress the significance of place and the built environment to the urban landscape. Edited by Christopher Tilley, the volume is inspired by phenomenological thinking and presents fine-grained ethnographies of the practices of everyday life in London. In doing so, it charts a unique perspective on the city that integrates ethnographies of daily life with an analysis of material culture. The first part of the volume considers the residential sphere of urban life, discussing in detailed case studies ordinary residential streets, housing estates, suburbia and London's mobile 'linear village' of houseboats. The second part analyses the public sphere, including ethnographies of markets, a park, the social rhythms of a taxi rank, and graffiti and street art. London's Urban Landscape returns us to the everyday lives of people and the manner in which they understand their lives. The deeply sensuous character of the embodied experience of the city is invoked in the thick descriptions of entangled relationships between people and places, and the paths of movement between them. What stories do door bells and house facades tell us about contemporary life in a Victorian terrace? How do antiques acquire value and significance in a market? How does living in a concrete megastructure relate to the lives of the people who dwell there? These and a host of other questions are addressed in this fascinating book that will appeal widely to all readers interested in London or contemporary urban life.

Trafficking Culture Simon Mackenzie, Neil Brodie, Donna Yates, Christos Tsirogiannis, 2019-08-15 Trafficking Culture outlines current research and thinking on the illicit market in antiquities. It moves along the global trafficking chain from 'source' to 'market', identifying the main roles and routines involved. Using original research, the authors explore the dynamics of this 'grey' market, where legal and illegal goods are mixed and conflated. It compares and contrasts this illicit trade with other 'transnational criminal markets', such as the illegal trades in wildlife and diamonds. The analytical frames of organized crime and white-collar crime, drawn from criminology, provide a fresh perspective on a problem that has tended to be seen as archaeological, rather than criminological. Bringing insights from both disciplines together, this book represents a productive discourse between experts in these two fields, working together for several years to produce the evidence base that is reported here. Innovative forms of regulation are the most productive way to explore crime control in this field, and this book provides a series of propositions about practical crime reduction measures for the future. It will be invaluable to academics working in the fields of archaeology, criminology, art history, museum studies, and heritage. The book will also be a vital resource for professionals in the field of cultural property protection and preservation.
