You Saw Me on the Radio Dave South,2019-10-03 For forty-eight years, Dave South was the radio voice of Southwest Conference and Texas A&M University football, basketball, and baseball. Along the way, he amassed a treasure trove of unforgettable stories, anecdotes, and conversations with noteworthy personalities, both on and off the field. In *You Saw Me on the Radio*, he collects some of his favorite stories from the broadcast booth, locker room, and other behind-the-scenes locations. This collection of lively tales is organized around themes such as "Memorable Games," "Players," "Interviews," "Goofs," and "Fans." These good-natured

recollections of a long and colorful career are accompanied by a gallery of photographs gathered from South's interactions with Aggie sports greats, iconic venues, and other people, places, and events that have created treasured sports memories over almost five decades. With a wink and a generous dose of self-deprecating humor, South relates some of his most embarrassing gaffes and miscues, including the time he conducted an awkward interview with the Treasurer of the United States—while having no idea who she was or what she did. He tells about the infamous “yellow spot” on Kyle Field. He reveals the truth behind “beanie weenies,” the culinary secret weapon of Texas A&M football recruiters. And of course, South pays heartfelt tribute to the coaches, players, fans, and fellow broadcasters who became his friends through the years. Loaded with accounts of unforgettable contests, hilarious moments, and poignant memories, *You Saw Me on the Radio* is sure to be a favorite for fans of Texas A&M University athletics and sports lovers everywhere. The author's proceeds from the sale of this book will benefit the Wounded Warrior Project.

Ionospheric Sounders in Aircraft Robert W. Gowell, Roger W. Whidden,1968 Investigation of ionospheric phenomena over large areas of the world has been pursued by Air Force Cambridge Research Laboratories since 1953 by means of ionospheric sounders carried in large aircraft. Technical details of the first airborne ionospheric sounding system utilizing a modified C-3A Automatic Ionosphere Recorder in a JKC-97 aircraft, are described briefly. Emphasis is given to the limitations and special considerations connected with an airborne ionospheric sounder such as adequate antenna, types of interference, power, effects of temperature and vibration, and peculiarities of airborne data. Mutual operation with other projects on the aircraft conducting various photometric measurements, is discussed in regard to the severe rf interference produced by the ionospheric sounder. (Author).

Radio and Social Transformation in China Wei Lei,2019-04-18 The first systematic, comprehensive and critical English-language study of radio in China, this book documents a historical understanding of Chinese radio from the early twentieth century to the present. Covering both public matters and private lives, *Radio and Social Transformation in China* analyses a range of themes

from healthcare, migration and education, to intimacy, family and friendship. Through a concentrated and thorough scrutiny of a variety of new genres and radio practices in post-Mao China, it also investigates the interaction between radio and social change, particularly in the era of economic reform. Building on the core theoretical concept of 'compressed modernity', each of the radio genres explored is shown to embody China's efforts to achieve modernity, while simultaneously exemplifying radio's capacity to manage the challenges that have arisen from the country's distinctive and perhaps unique process of modernization. Written in an engaging style, this book makes an important contribution to radio history internationally. As such, it will be of great interest to students and scholars of broadcast media, radio and Communication Studies, as well as Chinese culture and society.
