The Builder ,1876

The Pyramid Builder's Handbook Derek Hitchins,2010-05-25 The designs of the pyramids of ancient Egypt evolved over time; they had connections with the ancient myths, legends, and with the stars as they were in ancient times. When pyramid dimensions are converted to 'cubits' and 'seked,' revealing relationships emerge that were obscured by using using modern units. All of the energy of building came from manpower, courtesy of the energy consumed in the workers' food and drink. The mathematics of ramp construction, and of the use of ramps to convey stones at the phenomenal rates apparently achieved, challenge pet theories of construction. Most captivating is a study of the culture of the builders, evidenced in models of villages and farms, scenes of food preparation, toys, statues, magic, and tomb art.

Encyclopedia of the Archaeology of Ancient Egypt Kathryn A. Bard,2005-11-03 The Encyclopedia opens with a general map of the region and a chronology of periods and dynasties, providing a context for the entries. The first section of the volume then comprises 14 overviews which explore the history and significance of each period. The main body of the text offers more than 300 alphabetically organized entries, written by some of the most eminent scholars in this field. Areas covered include: artefacts - glass, jewellery, sculpture archaeological practices - dating techniques, representational evidence, textual sources biographies - Howard Carter, Gertrude Caton Thompson, Gaston Maspero buildings - cult temples, private tombs, pyramid complexes geographical features - agriculture, climate, irrigation sites - Abydos, Dakhla Oasis, Thebes social organization - kingship, law, taxation The text is extensively illustrated with over 120 images. Each entry is followed by a selected further reading section which includes foreign language sources to supplement the available works in English.

Encyclopedia of Architecture: Industrialized construction to Polyesters ,1989

Encyclopedia of Architecture, Industrialized Construction to Polyesters Joseph A. Wilkes,1988 This is the third of a 5-volume set comprising a comprehensive architecture reference, with emphasis on architectural processes and building technology. The encyclopedia is being produced by John Wiley & Sons in collaboration with the American Institute of Architects. It will contain approximately 500 articles, representing the efforts of 600 contributors, and total 4000 pages. In addition to approximately 3000 illustrations, the encyclopaedia will contain 500 tables and 100 biographies of leading architectural professionals. The set offers practical coverage of design, engineering, construction, building types, materials, biographies of prominent architectural professionals and firms, and literature articles. The work will be of use to architects, libraries, and construction and engineering professionals.

The Pyramids of Giza Enzo George,2017-07-15 The Pyramids of Giza are 4,000-year-old tombs built for three Egyptian pharaohs. Though all have been looted over the years, they still hold many surprises and curiosities. And they reflect much about Egyptian culture at that time. This comprehensive volume covers the structures’ histories, including still-controversial theories about how they were built, and the latest excavations and discoveries. Modern photographs will give readers an idea of the pyramids’ magnitude, while a timeline will make them realize how truly enduring these extraordinary monuments are.

Numbers Don't Lie Vaclav Smil,2020-10-01 'My favourite author has done it again. Numbers Don't Lie is by far his most accessible book to date, and I highly recommend it to anyone who is curious about the world. I unabashedly recommend this book to anyone who loves learning' Bill Gates Is flying dangerous? How much do the world's cows weigh? And what makes people happy? From Earth's nations and inhabitants, through the fuels and foods that energize them, to the transportation and inventions of our modern world - and how all of this affects the planet itself - in Numbers Don't Lie, Professor Vaclav Smil takes us on a fact-finding adventure, using surprising statistics and illuminating graphs to challenge lazy thinking. Smil is on a mission to make facts matter, because after all, numbers may not lie, but which truth do they convey? 'Smil's title says it all: to understand the world, you need to follow the trendlines, not the headlines. This is a compelling, fascinating, and most important, realistic portrait of the world and where it's going' Steven Pinker 'The best book to read to better understand our world. It should be on every bookshelf!' Linda Yueh 'There is perhaps no other academic who paints pictures with numbers like Smil' Guardian Vaclav Smil is Distinguished Professor Emeritus at the University of Manitoba. He is the author of over forty books on topics including energy, environmental and population change, food production and nutrition, technical innovation, risk assessment and public policy. No other living scientist has had more books (on a wide variety of topics) reviewed in Nature. A Fellow of the Royal Society of Canada, in 2010 he was named by Foreign Policy as one of the Top 100 Global Thinkers. This is his first book for a more general readership.
