Protection from these faults is therefore an essential part of electrical engineering, and the various forms of protection that have developed constitute a central component of any course of study related to power systems. Particularly in recent decades, however, the demands of decarbonization and reduced dependency on fossil fuels have driven innovation in the field of power systems. With new systems and paradigms come new kinds of faults and new protection needs, which promise to place power systems protection once again at the forefront of research and development. Protection of Modern Power Systems offers the first classroom-ready textbook to fully incorporate developments in renewable energy and ‘smart’ power systems into its overview of the field. It begins with a comprehensive guide to the principles of power system protection, before surveying the systems and equipment used in modern protection schemes, and finally discussing new and emerging protection paradigms. It promises to become the standard text in power system protection classrooms. Protection of Modern Power Systems readers will also find: Treatment of the new faults and protection paradigms produced by the introduction of new renewable generators Discussion of SmartGrids—intelligently-controlled active systems designed to integrate renewable energy into the power system—and their protection needs Detailed exploration of Synchronized Measurement Technology and Intelligent Electronic Devices Accompanying website to include Solutions Manual for instructors Protection of Modern Power Systems is an essential resource for students, researchers, and system engineers looking for a working knowledge of this critical subject.

**Paratrooper: My Life with the 101st Airborne Division** Michael B. Kitz-Miller, 2015-08-17 Paratrooper is the autobiography of a young man's time with the famed 101st Airborne Division "Screaming Eagles." With not the finances to finish his senior year in college and a looming draft, it leads to his enlisting in the U.S. Army. With thoughts of Officer's Candidate School, Private Michael B. Kitz-Miller heads for a newly designed Basic Training course for soldiers planning to attend Airborne School. High performance results in Leadership School and Acting Sergeant in Advanced Infantry School. At Airborne School he is a runner-up for Honor Graduate from his original class of 1,000 soldiers. Finally, the new paratrooper boards a bus for Ft. Campbell and the 101st. His first job is as an M-60 machine gunner, scoring expert his first time on the weapons range. Numerous operations follow – Cold Eagle, Swift Strike II, Desert Strike and the surprise Operation Delawar, jumping into Iran in 1964 as part of the U.S. STRIKE Command. All produce commendations and after winning the Division Soldier-of-the-Month competition a promotion to Sergeant. He soon becomes part of the Battalion Mountaineering cadre. The rigors of Recondo School and its incredible 35 percent graduation rate follow, offering a shot at Honor Graduate. Having won Battalion and Brigade competitions, the young paratrooper enters and finds himself a finalist in the Division's Soldier-of-the-Year competition. Tough career decisions follow. The story ends with Sergeant Kitz-Miller's opportunity, 50 years later to compare key issues that confronted him as a soldier with those of today. The evaluation of Officers and NCOs, leadership and mentoring are but a few. His final chapters on Just War Theory and current Rules of Engagement provide provocative ideas about how to address our current policies on terrorist states. Above all, it is the story of a very successful Paratrooper that loved the Airborne Infantry.

**101 Damns** Ned Boulting,2014-11-06 Join Ned Boulting as he reports on his dozen-th Tour de France, an event in which blokes do amazing things on bikes, and, we’re oft told, the biggest annual sporting event in the world. 101 Damns is a chance to relive the 2014 race, stage for stage, fall after fall, tantrum by tantrum; just the good bits mind, without all the aerial shots of castles. Or sunflowers. (Though it does wax lyrical about some stunning Alpine scenery . . . and, with the race starting in Yorkshire, even some stunning scenery not far from Bradford). From Leeds to Paris (how often do you say that?), Ned details the minutiae of his encounters with the likes of Vincenzo Nibali, David Millar, Chris Froome, Chris Boardman (or ‘Broadman’ as some would have it), Marcel Kittel, Mrs Cavendish (Mark’s wife), Peter Sagan and the rest. Their endeavours, achievements, humour and occasional rancour, sit alongside his own decade-long quest for the ideal end-of-race T-shirt. Ned weaves together the interesting, amusing and unheralded threads of the race itself, and reflects on his own perennial struggle to get round, get on and get by. 101 Damns encapsulates all that is incredible – and incredibly ordinary – about the greatest race on earth.
