Bulova Aaron Sigmond, 2018-03-06 *Bulova: A History of Firsts* chronicles the extraordinary American watch company in a fittingly unusual manner: by recounting an epic, multi-generational picaresque that runs from the Gilded Age up through present-day New York City. Joseph Bulova, the man behind the movement by which America would set its time, was an iconoclastic industrialist who introduced standardized mass production to fine

mechanical watchmaking, fostering in turn a corporate culture of innovation that endures today. Less a traditional corporate history than an exactly curated periodical, this profound new title features eight visually captivating chapters comprising an essay each by luminaries including style journalists David Coggins and Matthew Hranek, music-industry legend Nile Rodgers, advertising writer Stuart Elliott, noted horology authority Jack Forster and more, all edited by luxury historian Aaron Sigmond.

A Geography Of Time Robert N. Levine, 2008-08-01 In this engaging and spirited book, eminent social psychologist Robert Levine asks us to explore a dimension of our experience that we take for granted—our perception of time. When we travel to a different country, or even a different city in the United States, we assume that a certain amount of cultural adjustment will be required, whether it's getting used to new food or negotiating a foreign language, adapting to a different standard of living or another currency. In fact, what contributes most to our sense of disorientation is having to adapt to another culture's sense of time. Levine, who has devoted his career to studying time and the pace of life, takes us on an enchanting tour of time through the ages and around the world. As he recounts his unique experiences with humor and deep insight, we travel with him to Brazil, where to be three hours late is perfectly acceptable, and to Japan, where he finds a sense of the long-term that is unheard of in the West. We visit communities in the

United States and find that population size affects the pace of life—and even the pace of walking. We travel back in time to ancient Greece to examine early clocks and sundials, then move forward through the centuries to the beginnings of "clock time" during the Industrial Revolution. We learn that there are places in the world today where people still live according to "nature time," the rhythm of the sun and the seasons, and "event time," the structuring of time around happenings (when you want to make a late appointment in Burundi, you say, "I'll see you when the cows come in"). Levine raises some fascinating questions. How do we use our time? Are we being ruled by the clock? What is this doing to our cities? To our relationships? To our own bodies and psyches? Are there decisions we have made without conscious choice? Alternative tempos we might prefer? Perhaps, Levine argues, our goal should be to try to live in a "multitemporal" society, one in which we learn to move back and forth among nature time, event time, and clock time. In other words, each of us must chart our own geography of time. If we can do that, we will have achieved temporal prosperity.

Critical Theory Today Lois Tyson, 2012-09-10 Critical Theory Today is the essential introduction to contemporary critical theory. It provides clear, simple explanations and concrete examples of complex concepts, making a wide variety of commonly used critical theories accessible to novices without sacrificing any theoretical rigor or thoroughness. This new edition provides in-depth coverage of the most common approaches to literary analysis today: feminism, psychoanalysis, Marxism, reader-response theory, new criticism, structuralism and semiotics, deconstruction, new historicism, cultural criticism, lesbian/gay/queer theory, African American criticism, and postcolonial criticism. The chapters provide an extended explanation of each theory, using examples from everyday life, popular culture, and literary texts; a list of specific questions critics who use that theory ask about literary texts; an interpretation of F. Scott Fitzgerald's *The Great Gatsby* through the lens of each theory; a list of questions for further practice to guide readers in applying each theory to different literary works; and a bibliography of primary and secondary works for further reading.

Samson and the Pirate Monks Nate Larkin, 2007-02-18 With no-holds-barred honesty and poignant storytelling, Nate Larkin introduces a model of community and friendship that is reinvigorating men's ministry across the country, a model he calls The Samson Society. Too many men see the biblical hero Samson as their model for manhood--a rugged individualist of the highest order. Yet, Samson's solitary successes were eventually overcome by moral weaknesses. Larkin, through the story of his own past and the stories of those in The Samson Society, offers a radical, refreshing alternative.

The Red Circle Brandon Webb, John David Mann, 2012-04-10 Explosive, revealing, and intelligent, The Red Circle provides a uniquely personal glimpse into one of the most challenging and secretive military training courses in the world. Now including an excerpt from The Killing School: Inside the World's Deadliest Sniper Program BEFORE HE COULD FORGE A BAND OF ELITE WARRIORS... HE HAD TO BECOME ONE HIMSELF. Brandon Webb's experiences in the world's most elite sniper corps are the stuff of legend. From his grueling years of training in Naval Special Operations to his combat tours in the Persian Gulf and Afghanistan, The Red Circle provides a rare and riveting look at the inner workings of the U.S. military through the eyes of a covert operations specialist. Yet it is Webb's distinguished second career as a lead instructor for the shadowy sniper cell and Course Manager of the Navy SEAL Sniper Program that trained some of America's finest and deadliest warriors-including Marcus Luttrell and Chris Kyle-that makes his story so compelling. Luttrell credits Webb's training with his own survival during the ill-fated 2005 Operation Redwing in Afghanistan. Kyle went on to

become the U.S. military's top marksman, with more than 150 confirmed kills. From a candid chronicle of his student days, going through the sniper course himself, to his hair-raising close calls with Taliban and al Qaeda forces in the northern Afghanistan wilderness, to his vivid account of designing new sniper standards and training some of the most accomplished snipers of the twenty-first century, Webb provides a rare look at the making of the Special Operations warriors who are at the forefront of today's military.

Games and Bereavement Sabine Harrer, 2019-03-31 How can videogames portray love and loss? *Games and Bereavement* answers this question by looking at five videogames and carrying out a participatory design study with grieverers. Sabine Harrer highlights possible connections between grief and videogames, arguing that game design may help make difficult personal feelings tangible. After a brief literary review of grief concepts and videogame theory, the book deep-dives into examples of tragic inter-character relationships from videogame history. Building on these examples, the book presents a case study on pregnancy loss as a potential grief experience that can be validated through game design dialogue.

The Idea Factory Jon Gertner, 2012-03-15 The definitive history of America's greatest incubator of innovation and the birthplace of some of the 20th century's most influential technologies "Filled with colorful characters and inspiring lessons . . . *The Idea Factory* explores one of the most critical issues of our time: What causes innovation?" —Walter Isaacson, *The New York Times Book Review* "Compelling . . . Gertner's book offers fascinating evidence for those seeking to understand how a society should best invest its research resources." —*The Wall Street Journal* From its beginnings in the 1920s until its demise in the 1980s, Bell Labs—officially, the research and development wing of AT&T—was the biggest, and arguably the best, laboratory

for new ideas in the world. From the transistor to the laser, from digital communications to cellular telephony, it's hard to find an aspect of modern life that hasn't been touched by Bell Labs. In *The Idea Factory*, Jon Gertner traces the origins of some of the twentieth century's most important inventions and delivers a riveting and heretofore untold chapter of American history. At its heart this is a story about the life and work of a small group of brilliant and eccentric men-Mervin Kelly, Bill Shockley, Claude Shannon, John Pierce, and Bill Baker-who spent their careers at Bell Labs. Today, when the drive to invent has become a mantra, Bell Labs offers us a way to enrich our understanding of the challenges and solutions to technological innovation. Here, after all, was where the foundational ideas on the management of innovation were born.
