C. Montgomery

Times Tables Book Nishi Singh, 2016-02-07 This little book has times tables from 1 to 20 with 12 rows of multiplication. That is all children should ideally learn! This book is suitable for children from the ages of pre-school and upwards. They can memorize the tables then test it afterwards. There is no magic formula for learning the times tables, they must do it the hard way which is to memorize them by heart. It will take months so there is no need for parents to get upset and panic if they aren't able to memorize it in an instance. Remember each child is different. Just ask your child to memorize these times tables one by one.

Times Tables Pull the Tab Arcturus Publishing, 2020-03-15

Memorize in Minutes Alan Walker, 2000 Uses pictures, stories and activities to help children learn the multiplication tables.

Multiplication Tables and Flashcards Jack Goldstein, 2013-04-25 Despite living in the age of calculators, smartphones and computers, it is still important for children to learn basic mental arithmetic. Teachers across the world still stress the importance of learning multiplication tables (sometimes called times tables). This eBook has three sections. The first contains a simple number grid for reference. The second contains each multiplication table between two and twelve - children will learn these by reading and repeating them. The third section contains 'flashcards' - each page asks a multiplication question between 1×1 and 12×12 ; turn over the page to reveal the answer. Note that in the flashcard section, this is split further into easy (between one and four), medium (five to eight) and hard (nine to twelve) - meaning that children do not have to have learned all their tables before taking the fun test. Containing everything a parent or teacher will need to get their children learning the most important mental arithmetic, this book is essential for your child's development.

Times Tables Magic: Learn Multiplications in a Quick and Fun Way C. Montgomery, 2020-03-07 Discover a way to instantly recall times tables in a fun way for children young and old In 1 WEEK have your child learn the multiplication facts up to the 12 times table Improve right brained learning, and learn the multiplication facts in a fun visual way This is a proven method SIMPLE, and FUN method to learn multiplication for kids and or grownups! Through the use of memory hooks in the shape of characters, the stories go through the tables 3 is a butterfly, so 3×3 is the story of the two butterflies swimming a race and the big red balloon in the shape of a 9 is cheering them on! When pupils read 3×3 they recall the story of 9- the big red balloon cheering. Try it yourself and recall the answer in a few days time. It's a clever proven method engaging the right side of the brain and it works! Everyone said the best way was to just know the numbers and learn them by rote, but I just knew there had to be a better way than this. I started researching how memory and recall worked. The brain has it's own powerhouse technique for remembering things, and the use of color, imagination and association aid recalling intricate facts - fast! I decided to use these to teach my children the times tables, and it worked! Like magic. I've been asked to share the stories I created and hope this works for you and your children -and not just saves you time, but is a way of sitting down and letting both your imaginations go wild! Enjoy the journey! To keep the book simple and easy to learn it excludes the 2's, 10's, and the very easy 11 times tables up to 10 - but included 11×11 , and 11×12 . It's ideal for elementary schoolers, 3rd graders, even teaching maths for dyslexia. They WILL have fun!

Mastery of the math facts is the foundation for all future math learning. Lay that foundation now, and make it solid, with Addition Facts That Stick!

Know Your Times Tables! Andrew Ashcroft, 2017-11-19 This is a simple book of lists for a child to train with. There are no distracting pictures or complicated puzzles. It is intended to complement teaching which should begin at a concrete level so that the child understands what multiplication is about and for. A thorough knowledge of multiplication tables makes it easier for a child to understand later Mathematics where this knowledge is intrinsic to success. From working with multiplication, teaching in school often moves to division, fractions, area, volume and equations amongst other concepts. Children can feel very stressed if they are not equipped with a sound knowledge of the multiplication tables. This book gives a structure to learning. Many children have enjoyed the rhymes and rhythms of verses, poems and songs learned earlier on and being able to recite multiplication tables builds partly on these experiences. Mathematics should be multi-sensory. Seeing and reciting aloud are two of these elements. Discussion is important too. One can also look at the number-patterns in the lists or ask questions about them. Have little quizzes or ask questions in an everyday

context, e.g. 'How many days are there in five weeks?' (7×5) 'How many shoes are there if I own four pairs?' (2×4) It is not a book to write in. From the 'two times table' to the 'ten times table' there are two versions of each table. First, the complete table with both factors and the product. Second, the table without the product so that the child can read the table aloud and supply the product. With the edge of a sheet of paper, one can also cover over the products in the first list and lift the paper to check. Knowing multiplication tables is great for a child's self-esteem. However, children need adults. The best way to learn is little and often, one table at a time, for a few minutes each day with the guidance of a patient and loving adult. The intention of this book is to give structure to this learning which is a great gift and a key to success in Mathematics. ANDREW ASHCROFT is an experienced teacher of Mathematics and knows that children aged 7 - 10 who succeed in learning multiplication facts feel more confident later with new concepts that are based on multiplication. He has also helped teenagers who struggle with Mathematics and saw how damaging it was to their success and self-esteem that they had not learned multiplication tables and were struggling with new concepts that required this understanding. This book is for parents interested in helping their children and teachers who want a clear uncluttered list for their pupils to practice with.

Day Break Studies Mary Louise James, 2020-09-09 Day Break Studies Time Tables The Key To Math By: Mary Louise James Do you remember when we were young? Playing hide and seek? 5, 10, 15, 20, it is not so popular today. DAY BREAK STUDIES use repetition as a learning exercise (repeat over & over) as our way to get learning across to our students. By using their fingers in the beginning to count, will lead to growth in memory. Remember never to teach with fear & punishment, teach with praise and reward. The goal is to motivate children to have a desire to learn. Programs will be for pre-k, kindergartens to 12yrs old.

Harry's Magic Tables Stephanie Moraghan, 2012-02-10 Rhymes x pictures = times tables made easy! Nine year old Harry Moraghan never found maths easy. Then he discovered he REALLY hated it when it came to learning multiplication tables So Harry's mum invented an ingenious way of remembering his tables by using rhymes and pictures. In two weeks Harry had all his multiplication tables down pat. Soon after, Harry's teacher gave the class a test. Harry finished it in five minutes and got every question right! News of Harry's Magic Tables spread like wildfire in his school. In no time, the book was shared with some lucky classmates, friends, cousins, and eventually complete strangers too! Now many happy children know their tables inside out - and so can you!
