Music Apps for Musicians and Music Teachers Elizabeth C. Axford,2015-02-19

In today's digital age, learning and creating music has never been so easy and affordable. Anyone can enhance their musical knowledge, skills, and creativity with the multitude of music apps available. However, sifting through thousands of music apps in the Apple App Store and Google Play can be a daunting task for any musician or music instructor. But not anymore! Having spent countless hours researching the most interesting useful, educational, fun, and easy-to-use music apps, Elizabeth C. Axford in Music Apps for Musicians and Music Teachers surveys the landscape of music-related apps for both iOS and Android mobile devices, including tablets and smartphones. Music Apps for Musicians and Music Teachers lists hundreds of music-related apps organized by category, including singing, musical instruments, music theory and composition, songwriting, improvisation, recording, evaluating music performances, listening to music, music history and literature, music appreciation, and more. App developers are listed with each app, including links to their websites for updates and support. The book sections and chapters align with the newly revised National Standards for Music Education released in 2014 by the National Association for Music Education. Suggested activities for educators are provided, as well as key terms and a bibliography. Music Apps for Musicians and Music Teachers is for anyone interested in music, whether hobbyist or professional. It enhances the

ability to learn on the go by offering musicians, music students, and music instructors a list of the most useful music apps available.

Seven Myths About Education Daisy Christodoulou, 2014-03-14 In this controversial new book, Daisy Christodoulou offers a thought-provoking critique of educational orthodoxy. Drawing on her recent experience of teaching in challenging schools, she shows through a wide range of examples and case studies just how much classroom practice contradicts basic scientific principles. She examines seven widely-held beliefs which are holding back pupils and teachers: - Facts prevent understanding - Teacher-led instruction is passive - The 21st century fundamentally changes everything - You can always just look it up -We should teach transferable skills - Projects and activities are the best way to learn - Teaching knowledge is indoctrination. In each accessible and engaging chapter, Christodoulou sets out the theory of each myth, considers its practical implications and shows the worrying prevalence of such practice. Then, she explains exactly why it is a myth, with reference to the principles of modern cognitive science. She builds a powerful case explaining how governments and educational organisations around the world have let down teachers and pupils by promoting and even mandating evidence-less theory and bad practice. This blisteringly incisive and urgent text is essential reading for all teachers, teacher

training students, policy makers, head teachers, researchers and academics around the world.

The iPad Project Book Michael E. Cohen, Dennis Cohen, Lisa L. Spangenberg, 2010-09-09 Bridging the gap between the palm-sized iPod touch and a full-sized computer, Apple's iPad offers enough screen area and horsepower to perform the day-to-day tasks most people want to do. Packed with practical knowledge, this book will walk readers through how to manage their most common projects, from the simple (setting up a calendar event) to the complex (planning a vacation) and everything in between. Readers will learn to use the iPad tools and applications by using them to create practical real-world projects and to master everyday tasks. In this practical hands-on guide, you'll learn how to Organize a party: Set up the calendar event, create invitations, invite attendees, and mail out the invites. Build a recipe scrapbook: Write up recipes in Pages (or find recipes via one of the useful recipe apps) and import pictures of the finished dish to go with the recipe in the book. Even learn iPad kitchen tips! Plan a vacation: Buy tickets, find destination activities, and map out directions. Watch videos: Stream videos with Air Video, convert high-quality movies from DVDs, and buy or rent videos from the iTunes Store. Get smart: Learn another language with one of the many translation apps available, and build an illustrated deck of flash cards with common words and phrases. Plus many more useful projects—both big and small—to help you do stuff with your iPad.

The Elements of Power David S. Abraham,2015-10-28 Our future hinges on a set of elements that few of us have even heard of. In this surprising and revealing book, David S. Abraham unveils what rare metals are and why our electronic gadgets, the most powerful armies, and indeed the fate of our

planet depend on them. These metals have become the building blocks of modern society; their properties are now essential for nearly all our electronic, military, and “green” technologies. But their growing use is not without environmental, economic, and geopolitical consequences. Abraham traces these elements’ hidden paths from mines to our living rooms, from the remote hills of China to the frozen Gulf of Finland, providing vivid accounts of those who produce, trade, and rely on rare metals. He argues that these materials are increasingly playing a significant role in global affairs, conferring strength to countries and companies that can ensure sustainable supplies. Just as oil, iron, and bronze revolutionized previous eras, so too will these metals. The challenges this book reveals, and the plans it proposes, make it essential reading for our rare metal age.

The Last Mission Of The Seventh Cavalry Charley Brindley, 2020-08-17 A unit of the Seventh Cavalry is on a mission over Afghanistan when their plane is hit by something. The soldiers bail out of the crippled plane, but when the thirteen men and women reach the ground, they are not in Afghanistan. A unit of the Seventh Cavalry is on a mission over Afghanistan when their plane is hit by something. The soldiers bail out of the crippled plane, but when the thirteen men and women reach the ground, they are not in Afghanistan. Not only are they four thousand miles from their original destination but it appears they have descended two thousand years into the past where primitive forces fight each other with swords and arrows. The platoon is thrown into a battle where they must choose sides quickly or die. They are swept along in a tide of events so powerful that their courage, ingenuity and weapons are tested to the limits of their durability and strength.
