*Directory of Federal Real Property, 1992* Canada. Treasury Board. Bureau of Real Property Management,1992 This directory is the central record and only complete listing of real property holdings of the Government of Canada. The purpose of the directory is to maintain a contemporary record of basic information concerning the real property holdings of the Government of Canada. It includes national listings and international listings. It also provides a list of contact names.

**Electrified Voices** Dmitri Zakharine,Nils Meise,2013 The aim of this book is to explore the phenomenon of the electrified voice through interdisciplinary approaches such as media and technology studies, social history, and comparative cultural studies. The book focuses on three problem clusters: reflections on the societal level about the task of electronic voice transmission; the mediation of gender- and occupation-specific vocal stereotypes in audio and audio-visual formats; and the genesis of such vocal stereotypes in national radio and film cultures. Such a historicizing approach to societal experience in the field of voice mediation, including the use and interpretation of voice media, is today of great relevance in light of the collective learning processes currently triggered by rapid advances in technology.

*Ionosphere and Applied Aspects of Radio Communication and Radar* Nathan Blaunstein,Eugeniu Plohotniuc,2008-05-13 A Complete Reference for the 21st Century Until recently, much of the communications technology in the former Eastern bloc countries was largely unknown. Due to the historically competitive nature of East/West relations, scientific groups operated independently, without the benefit of open communication on theoretical frameworks and experimental technologies. As these countries have begun to bridge the gap and work in a more cooperative environment, the need has grown for a comprehensive guide which assimilates all the information in this vast knowledge bank. *Ionosphere and Applied Aspects of Radio Communication and Radar* meets the demand for an updated reference on this continually evolving global technology. This book examines the changes that have occurred in the past two or three decades. It thoroughly reviews ionospheric radio propagation, over-horizon and above-horizon radars, and miniature ionospheric stations used for investigating nonregular phenomena occurring in the ionosphere. In addition, it also comprehensively discusses land-satellite and satellite-satellite communications. This volume also reviews an area that has been all

but ignored in previous works: the effects of plasma irregularities on radio waves propagation through the inhomogeneous ionosphere. Here, a heavy focus is placed on the effects of these irregular phenomena. And due to the recent wireless revolution, more attention than ever has been aimed on improving the efficiency of land-satellite and satellite-satellite communication networks, which are fully addressed. Included are— Transport processes and photochemistry reactions occurring in the regular homogeneous ionosphere Nonlinear phenomena occurring in the irregular ionosphere Instabilities in the inhomogeneous disturbed ionosphere Various ambient natural and artificial sources and corresponding plasma irregularities Written by two leading scientists, this book will be an invaluable guide to anyone working in this ever-changing field.
