Born Reading Jason Boog, 2014-07-15 A program for parents and professionals on how to raise kids who love to read, featuring interviews with childhood development experts, advice from librarians, tips from authors and children's book publishers, and reading recommendations for kids from birth up to age five. Every parent wants to give his or her child a competitive advantage. In *Born Reading*, publishing insider (and new dad) Jason Boog explains how that can be as simple as opening a book. Studies have shown that interactive reading—a method that creates dialogue as you read together—can raise a child's IQ by more than six points. In fact, interactive reading can have just as much of a determining factor on a child's IQ as vitamins and a healthy diet. But there's no book that takes the cutting-edge research on interactive reading and shows parents, teachers, and librarians how to apply it to their day-to-day lives with kids, until now. *Born Reading* provides step-by-step instructions on interactive reading and advice for developing your child's interest in books from the time they are born. Boog has done the research, talked with the leading experts in child development, and worked with them to compile the "Born Reading Essential Books" lists, offering specific

titles tailored to the interests and passions of kids from birth to age five. But reading can take many forms—print books as well as ebooks and apps—and Born Reading also includes tips on how to use technology the right way to help (not hinder) your child’s intellectual development. Parents will find advice on which educational apps best supplement their child’s development, when to start introducing digital reading to their child, and how to use tech to help create the readers of tomorrow. Born Reading will show anyone who loves kids how to make sure the children they care about are building a powerful foundation in literacy from the beginning of life.

Social Media Curation Joyce Kasman Valenza, 2014-01-01

This issue of Library Technology Reports draws from 17 in-depth interviews to show how libraries are using social media to collect, organize, share, and interpret—in short, how to tell a digital story.

How and Why to Read and Create Children's Digital Books

Natalia Kucirkova, 2018-12-03 *How and Why to Read and Create Children's Digital Books* outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps

and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. *How and Why to Read and Create Children's Digital Books* is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of creating and sharing. Praise for *How and Why to Read and Create Children's Digital Books* 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary

practice. The author is an accomplished storyteller, and whether you know, as yet, little about the value of digital literacy in the storymaking process, or you are an accomplished digital player, this book is full of evidence-informed ideas, explanations and inspiration.' Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Cathy Burnett, Professor of Literacy and Education, Sheffield Hallam University

Thinking With Your Eyes Ryan Hendrix,Kari Zweber

Palmer,Nancy Tarshis,Michelle Garcia Winner,2021-01-29 NOTE:

This storybook includes a read-aloud option which is accessible on Google and IOS devices. Blast off with the gang to an alien planet in outer space. In storybook 3 of the We Thinkers! Vol. 1 social emotional learning curriculum for ages 4-7, Molly, Evan, Jesse, and Ellie learn how to communicate with friendly aliens by thinking with their eyes since they don't speak Bleep! Bleep! Bloop! They quickly learn that our eyes are like arrows that point to what we are looking at and probably thinking about, too. They figure out what the aliens might be thinking and feeling by using their eyes to follow what the alien's eyes are pointed toward and the expression on its face. It's so much fun to figure out what's going on in a situation, communicate, and make new friends—all by using our eyes! Continue building on this important social concept with the fundamental concepts taught in storybooks 4-10, which align with the corresponding teaching units within the related curriculum. Best practice: teach these concepts in order, starting with storybook 1 of 10 while using the corresponding curriculum.

Freckleface Strawberry: Monster Time! Julianne Moore,2017
Freckleface Strawberry wants to play monster at recess! But what if her friends have other ideas?

The Future of the Book Geoffrey Nunberg,1996-12-19 A dozen essays from a July 1994 conference at the University of San Marino argue that a total shift to electronic information media would trigger wrenching social and cultural dislocations. Among their perspectives are the pragmatics of the new, farewell to the information age, toward meta-reading, hypertext and authorship, and the body of the text. They avoid the usual fetish arguments such as curling up in bed or leather bindings and pipes. Novelist Umberto Eco provides an afterward. No index or word search.

Early Literacy Skills Builder ,2010-09-01 Apply the science of reading to students with moderate-to-severe developmental disabilities, including autismThe Early Literacy Skills Builder program incorporates systematic instruction to teach both print and

phonemic awareness. ELSB is a multi-year program with seven distinct levels and ongoing assessments so students progress at their own pace. Five years of solid research have been completed through the University of North Carolina at Charlotte, proving ELSB to be a highly effective literacy program and more effective than a sight-word only program. ELSB is based upon the principles of systematic and direct instruction. It incorporates scripted lessons, least-prompt strategies, teachable objectives, built-in lesson repetition, and ongoing assessments. The seven ELSB levels contain five structured lessons each. All students begin at Level 1. If a student struggles here, go back and administer Level A. Instruction is one-on-one or in small groups. Teach scripted lessons daily in two 30-minute sessions. On the completion of each level, formal assessments are given. ELSB includes everything you need to implement a multi-year literacy curriculum.

The Inn at Little Washington Cookbook Patrick

O'Connell, 2011-11-02 110 sparkingly original recipes from the world-renowned self-taught chef and founder of the three-star Michelin restaurant The Inn at Little Washington Patrick O'Connell, a self-taught chef who read cookbooks to learn how to cook, began his culinary career with a catering business in an old farmhouse,

cooking on a wood stove with an electric frying pan purchased for \$1.49 at a garage sale. To O’Connell’s surprise, the pan was able for boil, sauté, and deep fry for parties of up to 300 guests, which sharpened his awareness of how much could be done with very little. In 1978, his catering business evolved into a country restaurant and Inn, operating out of a defunct garage in a small Virginia town affectionately referred to as “Little” Washington. Now a multiple James Beard Award–winning and Michelin star restaurant, The Inn at Little Washington was America’s first five-star Inn. In *The Little Inn at Washington Cookbook*, O’Connell assembles elegant, simple, and straightforward recipes that elevate everyday ingredients. With helpful, detailed instructions, O’Connell teaches you how to make over one hundred dishes, from Fresh Tuna Tartare on Tuna Carpaccio with Wasabi Mayonnaise and Miniature Caramelized Onion Tartlets to Rockfish Roasted with White Wine, Tomatoes, and Black Olives on Toasted Couscous and Steamed Lobster with Grapefruit Butter Sauce. He also includes delicious desserts, such as Rosemary Crème Brûlée and Double-Pumpkin Roulade, and savory sides, like Creamy Garlic Polenta and My Grandmother’s Baked Beans. With over three hundred stunning, mouthwatering photographs and thoughtful

reflections from O'Connell, *The Inn at Little Washington Cookbook* is a fresh and glorious resource and a romantic culinary journey through the Virginia countryside.
