Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education Haas, Leslie, Tussey, Jill, 2021-01-15 The idea of storytelling goes beyond the borders of language, culture, or traditional education, and has historically been a tie that bonds families, communities, and nations. Digital storytelling offers opportunities for authentic academic and non-academic literacy learning across a multitude of genres. It is easily accessible to most members of society and has the potential to transform the boundaries of traditional education. As concepts around traditional literacy education evolve and become more culturally and linguistically relevant and responsive, the connections between digital storytelling and disciplinary literacy warrant consideration. *Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education* develops a conceptual framework around pedagogical connections to digital storytelling within K-12 disciplinary literacy practices. This essential reference book supports student success through the integration of digital storytelling across content areas and grade levels. Covering topics that include immersive storytelling, multiliteracies, social justice, and pedagogical storytelling, it is intended for stakeholders interested in innovative K-12 disciplinary literacy skill development, research, and practices including but not limited to curriculum directors, education faculty, educational researchers, instructional facilitators, literacy professionals, teachers, pre-service teachers, professional development coordinators, teacher preparation programs, and students.

In each chapter, the current state of knowledge and key research questions in the field for future study are identified, with clear messages provided at the end of each chapter. Focusing on empirical studies and strong theoretical frameworks, this book covers four key parts: Understanding the learning potential of children's apps; Key app challenges; Empirical evidence; Future avenues. The New Landscape of Mobile Learning Charles Miller, Aaron Doering, 2014-02-24 The New Landscape of Mobile Learning is the first book to provide a research based overview of the largely untapped array of potential tools that m-Learning offers educators and students in face-to-face, hybrid, and distance education. This cutting edge guide provides: • An essential explanation of the emergence and role of Apps in education • Design guidelines for educational Apps • Case studies and student narratives from across the US describing successful App integration into both K-12 and Higher Education • Robust, research-based evaluation criteria for educational Apps Although many believe that Apps have the potential to create opportunities for transformative mobile education, a disparity currently exists between the individuals responsible for creating Apps (i.e. developers who often have little to no instructional experience) and the ultimate consumers in the classroom (i.e. K-20 educators and students). The New Landscape of Mobile Learning bridges this gap by illuminating critical design, integration, and evaluation narratives from leaders in the instructional design, distance education, and mobile learning fields.

How and Why to Read and Create Children's Digital Books Natalia Kucirkova, 2018-12-03 How and Why to Read and Create Children's Digital Books outlines effective ways of using digital books in early years and primary classrooms, and specifies the educational potential of using digital books and apps in physical spaces and virtual communities. With a particular focus on apps and personalised reading, Natalia Kucirkova combines theory and practice to argue that personalised reading is only truly personalised when it is created or co-created by reading communities. Divided into two parts, Part I suggests criteria to evaluate the educational quality of digital books and practical strategies for their use in the classroom. Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. How and Why to Read and Create Children's Digital Books is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. All are inspired to approach children's reading on and with screens with an agentic perspective of

creating and sharing. Praise for How and Why to Read and Create Children's Digital Books 'This is an exciting and innovative book – not least because it is freely available to read online but because its origins are in primary practice. Liz Chamberlain, Open University 'At a time when children's reading is increasingly on-screen, many teachers, parents and carers are seeking practical, straightforward guidance on how to support children's engagement with digital books. This volume, written by the leading expert on personalised e-books, is packed with app reviews, suggestions and insights from recent international research, all underpinned by careful analysis of digital book features and recognition of reading as a social and cultural practice. Providing accessible guidance on finding, choosing, sharing and creating digital books, it will be welcomed by those excited by the possibilities of enthusing children about reading in the digital age.' Secret Lives of Children in the Digital Age Linda Laidlaw, Joanne O'Mara, Suzanna Wong, 2021-12-27 Secret Lives of Children in the Digital Age: Disruptive Devices and Resourceful Learners offers an examination of the impact on children, their families and their teachers, as digital technologies and new literacy practices have rapidly transformed how children learn, play and communicate. While ease of access to enormous knowledge bases presents many benefits and advantages, mobile screen technologies are often perceived by parents and teachers as disruptive and worrisome. Developed from a wide range of the authors' research over the past decade to an examination of remote learning during the COVID 19 pandemic, this book posits that while teachers, parents and governments are focused on protecting children, what is often neglected is children's own agency and capacity to engage with mobile technologies in ways that support them in pursuing their own interests, pleasures and learning. This text works to disrupt boundaries in research, policy and practice, between home and school, and across virtual and actual worlds, positioning children as both users of media texts and coproducers of digitally mediated knowledge, with peers, family and teachers. Secret Lives of Children in the Digital Age brings together over a decade of shared research, conversations, writing and friendships across diverse geographies. Over the past decade, digital technologies have rapidly transformed how children learn, play and communicate. Tablet devices such as iPads are now ubiquitous in the lives of many children. Such devices are easy to use and provide multimodal options (i.e. operable via touch, speech, and icons, as well as conventional text). Users do not need to be conventionally literate to have access to powerful search engines, social media platforms, a range of 'apps' and games, or to be able to share their own creations on publication venues such as YouTube, TikTok and more. While such ease of access can present many benefits and advantages when positioned in relation to children's use, but this access is not without concern, since mobile screen technologies are often perceived by parents and teachers as disruptive and worrisome, with popular media ramping up fears via publication of sensational articles. Secret Lives of Children in the Digital Age contributes to research on digital literacies, and offers a pedagogical examination of digital possibilities for bringing playfulness and innovation into learning.
