### Don't Pay for Your MBA Laurie Pickard,2017-11-02

Discover the secrets and tips to get the business education you need, the faster and cheaper way. The average debt load for graduates of the top business schools has now exceeded \$100,000. For most young professionals, this means spending the first half of their career in the red and feeling pressure to take the first position offered to them so that they can start paying off their debt. However, it doesn't have to be that way. Author and businesswoman Laurie Pickard discovered a way to get the business education she needed to land her dream job while avoiding the massive school loans that plague so many. In *Don't Pay for Your MBA*, she shares all that she learned so that others can benefit as well. Pickard discovered that the same prestigious business schools that offer the MBAs so many covet also offer MOOCs (massive online open courses) for low or even no cost. Within these pages, you will learn how to: Define your goals and tailor a curriculum that is geared toward your dream job Master the language of business Build a strong network Choose a concentration and deepen your expertise Showcase your nontraditional education in a way that attracts companies Don't fall for the lies that pressure countless graduates every year into MBA programs and insurmountable debt. *The Executive Mba* Jason A. Price,2011-02-03 More than

ever before, students and employers are choosing the Executive MBA as a means to obtain the coveted MBA degree. From changing careers to working up the corporate ladder, know your business school options: full time, part time, online, and Executive MBA. Boost lifetime earning power, develop life-long friendships, expand business and social network, and immediately apply the training and education at work. There are over 250 accredited business schools in the United States and over 300 worldwide that offer an Executive MBA. In this book, learn from EMBA graduates, employers, hiring managers, financial aid officers, and career experts. Discover how full-time employment while in business school brings a wealth of experience into the classroom. Understand why the executive-model is the future of business educational delivery. Read how it is the most practical method to get an MBA given our busy lives. If your five year plan included an MBA, then this book is for you. Consider these Questions: - Is the time right, and can you make the commitment? - Can you continue to work while in school? - How can you get your employer to help pay? - Is the EMBA the best option for me?

**The Relevance of Executive MBA Programs** Janis W. Dietz, 1997-12 Investment in executive education has grown steadily since its inception during the last century. Several studies have attempted to measure the effectiveness of executive programs; prior research has indicated that some programs lack relevance. This study addressed the topic from the perspective of corporations, whose future executive education decisions are affected by the relevance of current programs, and program alumni. In a partial replication of a 1959 Harvard study, which queried graduates of 39 residential programs, I surveyed the 1993-1995 executive MBA graduates of four schools: UCLA,

University of Colorado, University of Utah, and University of Washington. The main research question was: Are executive education programs meeting the needs of their mid-career students ? In addition to the above, the changing workplace prompted the following queries: Is there a difference between the satisfaction of the students with the programs in 1959 and now? Are the programs affected by lack of security in the workplace. Are people using the EMBA to change employers? Do sponsoring companies use the skills learned? Do women have a problem with the 'glass ceiling'? In addition to collecting the surveys, I interviewed the four program directors, 10 corporate executives whose responsibilities include executive education, and 24 of the 157 alumni who returned the questionnaire. Frequency distribution, correlation analysis, and stepwise multiple regression were used to analyze the survey data. The major findings were: EMBA students today are satisfied with the relevance of their education; Students are dissatisfied with schools that employ professors with outdated or inadequate teaching skills; Instability in today's workplace is prompting some people to change jobs or go into their own business once their EMBA is completed; Corporations will continue to invest in these programs, but there is more specific succession planning in conjunction with the career path expected for the employee; There continues to be little ethnic diversity in the programs.

#### Rethinking Management Education for the 21st Century

Charles Wankel, Robert DeFillippi, 2002-09-01 We have assembled a distinguished international panel of leaders and scholars in management education whose contributions reflect diverse perspectives on management theory and practice. Gerald Ferris and his associates conceptualize political skill to include self and social astuteness, influence

and control, networking and building social capital, and genuineness/sincerity. Their chapter describes methods for developing and shaping such skills. Nick Nissley examines how arts-based learning is informing the practice of management education. How artful ways of knowing are being practiced in organizations. Anne McCarthy and associates provide a cutting-edge balanced assessment of both service learning theory and its current practice. Godshalk and Foster-Curtis present four models of online MBA curricula focused on part-time students including curricular issues, technology requirements, and funding and institutional commitment requirements for each model. Sabine Seufert examines eLearning models of web-based education and web education support services. Her chapter offers a breathtaking, panoramic view of six landscapes for eLearning business models and best practices emerging from both the corporate and academic sectors. Eric Dent's chapter is a thought-provoking critique of doctoral education and innovative suggestions for developing doctoral programs more attuned to the learning requirements of executive managers seeking doctoral education. Tom Moore examines competition within the market for executive education and observes how three sets of rivals have enjoyed distinctive market place perceptions. Antonacopoulou penetratingly critiques the confusion of training with learning in management education. Reed examines the processes of globalization and how their effects should be incorporated into management education.

*The Wisdom of Strategic Learning* Ian Cunningham, 2017-07-05 The Wisdom of Strategic Learning has enabled many organizations to develop a strategic approach to learning and development. Its premise that learning must be integrated with the strategic direction of the organization has been validated by numerous successful businesses which have implemented its tried and tested approaches. This second edition of Ian Cunningham's book updates and expands material on the importance of the self managed learning approach to create focused, active and committed employees. A new chapter on the role and development of staff in SML programmes has been added, along with new appendices, for example on selling the approach. With new case material including the use of online groups on the Internet, this practical, thought-provoking book shows how the ideas behind the learning organization can be applied for strategic advantage.

The Wisdom of Strategic Learning Ian Cunningham, 1994 Change means learning. There is no possibility for organizations to change unless the people in them learn. In this new book Ian Cunningham writes about his pioneering work in developing strategic learning. He shows the need to go beyond vague prescriptions for 'learning organizations'. Instead he advocates the value of a 'learning business' which integrates learning with the strategic direction of the organization. He elaborates practical examples of implementing strategic learning, using self managed learning. For the organization, self managed learning has a strategic advantage in creating a focused, active and committed team. Ian Cunningham's powerful, tried-and-tested approach is backed by evaluation research evidence and by its success in organizations such as Shell in the Netherlands, the Hiram Walker Group in the

UK and Valmet in Finland.

communication, and delivery best practices. Persuading with Data provides an integrated instructional guide to data visualization, strategic communication, and delivery best practices. Persuading with Data is for anyone who has to explain analytical results to others. It synthesizes a wide range of skills needed by modern data professionals, providing a complete toolkit for creating effective business communications. Readers will learn how to simplify in order to amplify, how to communicate data analysis, how to prepare for audience resistance, and much more. The book integrates practitioner and academic perspectives with real-world examples from a variety of industries, organizations, and disciplines. It is accessible to a wide range of readers—from undergraduates to mid-career and executive-level professionals—and has been tested in settings that include academic classes and workplace training sessions.
