Discourse on the Method René Descartes,1996-01-01 Descartes' ideas not only changed the course of Western philosophy but also led to or transformed the fields of metaphysics, epistemology, physics and mathematics, political theory and ethics, psychoanalysis, and literature and the arts. This book reprints Descartes' major works, Discourse on Method and Meditations, and presents essays by leading scholars that explore his contributions in each of those fields and place his ideas in the context of his time and our own. There are chapters by David Weissman on metaphysics and psychoanalysis, John Post on epistemology, Lou Massa on physics and mathematics, William T. Bluhm on politics and ethics, and Thomas Pavel on literature and art. These essays are accompanied by others by David Weissman and by Stephen Toulmin that introduce the idea of intellectual lineages, discuss the period in which Descartes wrote, and reexamine the premises of his philosophy in light of contemporary philosophical, political, and social thinking.

This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

**Introductory Grammar of Amharic** Wolf Leslau,2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's Traite de langue amharique (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language.The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.
