*The Customer-Funded Business* John Mullins, 2014-07-03 Who needs investors? More than two generations ago, the venture capital community – VCs, business angels, incubators and others – convinced the entrepreneurial world that writing business plans and raising venture capital constituted the twin centerpieces of entrepreneurial endeavor. They did so for good reasons: the sometimes astonishing returns they've delivered to their investors and the astonishingly large companies that their ecosystem has created. But the vast majority of fast-growing companies never take any venture capital. So where does the money come from to start and grow their companies? From a much more agreeable and hospitable source, their customers. That's exactly what Michael Dell, Bill Gates and Banana Republic's Mel and Patricia Ziegler did to get their companies up and running and turn them into iconic brands. In *The Customer Funded Business*, best-selling author John Mullins uncovers five novel approaches that scrappy and innovative 21st century entrepreneurs working in companies large and small have ingeniously adapted from their predecessors like Dell, Gates, and the Zieglers: Matchmaker models (Airbnb) Pay-in-advance models (Threadless) Subscription models (TutorVista) Scarcity models (Vente Privee) Service-to-product models (GoViral) Through the captivating stories of these and other inspiring companies from around the world, Mullins brings to life the five models and identifies the questions that angel or other investors will – and should! – ask of entrepreneurs or corporate innovators seeking to apply them. Drawing on in-depth interviews with entrepreneurs and investors who have actually put these models to use, Mullins goes on to address the key implementation issues that characterize each of the models: when to apply them, how best to apply them, and the pitfalls to watch out for. Whether you're an aspiring entrepreneur lacking the start-up capital you need, an early-stage entrepreneur trying to get your cash-starved venture into take-off mode, an intrapreneur seeking funding within an established company, or an angel investor or mentor who supports high-potential ventures, this book offers the most sure-footed path to starting, financing, or growing your venture. John Mullins is the author of *The New Business Road Test* and, with Randy Komisar, the widely acclaimed *Getting to Plan B*.

**Alphabet Juice** Roy Blount Jr.,Roy Blount,2008-10-14 Ali G: How many words does you know? Noam Chomsky: Normally, humans, by maturity, have tens of thousands of them. Ali G: What is some of 'em? —Da Ali G Show Did you know that both mammal and matter derive from baby talk? Have you noticed how wince makes you wince? Ever wonder why so many h-words have to do with breath? Roy Blount Jr. certainly has, and after forty years of making a living using words in every medium, print or electronic, except greeting cards, he still can't get over his ABCs. In Alphabet Juice, he celebrates the electricity, the juju, the sonic and kinetic energies, of letters and their combinations. Blount does not prescribe proper English. The franchise he claims is “over the counter.” Three and a half centuries ago, Thomas Blount produced Blount’s Glossographia, the first dictionary to explore derivations of English words. This Blount’s Glossographia takes that pursuit to other levels, from Proto-Indo-European roots to your epiglottis. It rejects the standard linguistic notion that the connection between words and their meanings is “arbitrary.” Even the word arbitrary is shown to be no more arbitrary, at its root, than go-to guy or crackerjack. From sources as venerable as the OED (in which Blount finds an inconsistency, at whisk) and as fresh as Urbandictionary.com (to which Blount has contributed the number-one definition of alligator arm), and especially from the author’s own wide-ranging experience, Alphabet Juice derives an organic take on language that is unlike, and more fun than, any other.
